RE WEAVE CREMORNE

SENITHA DE SILVA

SRD766 - ARCHITECTURAL DESIGN THESIS PART 2

AS A WHOLE CREMORNE TO HAVE DISTINCT RESIDENTIAL, COMMERCIAL AND RECREATIONAL PRECINCTS TO ACT IN SYMBIOSIS.

PROPOSED INFRASTRUCTURE TO ENHANCE CREMORNES PUBLIC LIFE WITHOUT INTERUPTING PRIVATE LIFE. RECREATIONAL FACILITIES ARE FOCUSED ALONG CREMORNE AND BALMAIN STREET AS THESE STREETS ARE RELATIVELY BIGGER STREETS WITH BETTER TRAFFIC FLOW

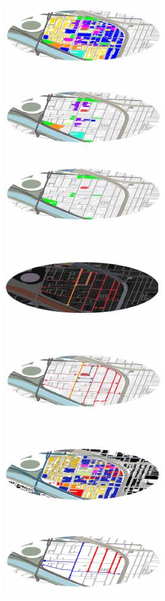

DESIGNATED PUBLIC GREENSPACES ARE DESIGNED TO BE EASILY ACCESED TO ONE ANOTHER VIA FOOT THROUGH MOONBY STREETS.

ALTERNATE STREET STRATEGIES AT NIGHT TIME TO ENHANCE NIGHT LIFE ACTIVITES

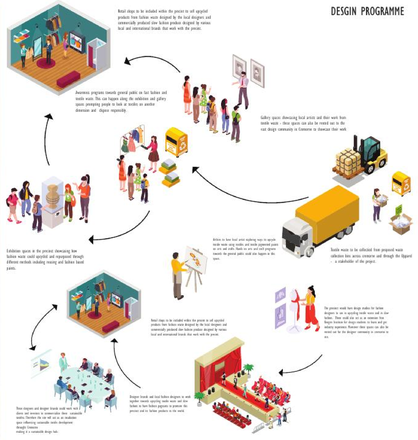

CREMORNE'S STREETS HAVE BEEN RE IMAGINED TO ENHANCE PUBLIC LIFE AND PEDESTRIAN MOVEMENTS ACROSS CREMORNE.

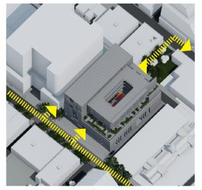

NO SIGNIFICANT ZONING ALONG CREMORNE STREET. CREMORNE HAS A HIGH DENSITY OF BUILT UP AREA WITH LITTLE TO NO PRODUCTIVE GREEN SPACE

CREMORNE HAS A 4 X 3 GRID SEPERATED BY STREET THAT CONNECTS RICHMOND TO SOUTH YARRA AND MELBOURNE TO BURNLEY - ALL STREETS PASSING THROUGH MAJOR BUSINESSES AND MIXED USE BUILDINGS IN CREMORNE. SOME STREETS HAVE POTENTIAL TO BE OPENED UP FOR BETTER CIRCULATION OF DISTRIBUTION STREETS, MOST STREETS ARE NARROW (8 - 8.5 M) AND ONE WAY - LOOPED CIRCULATION SYSTEM CAN BE SEEN WITH LITTLE TO NO PEDESTRIAN FOCUS.
