

RE WEAVE CREMORNE

PROJECT PROCESS PORTFOLIO

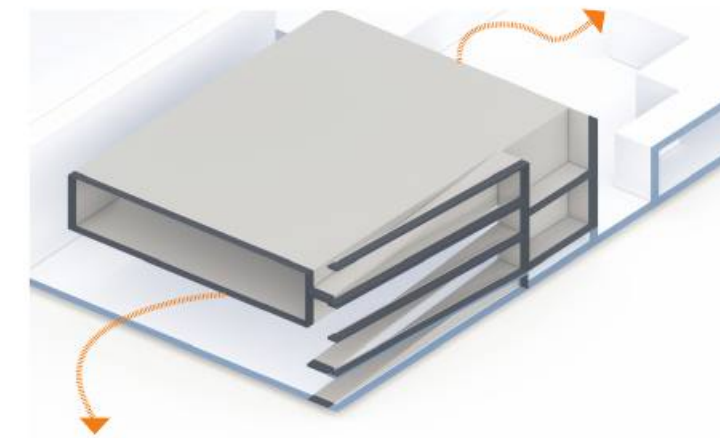

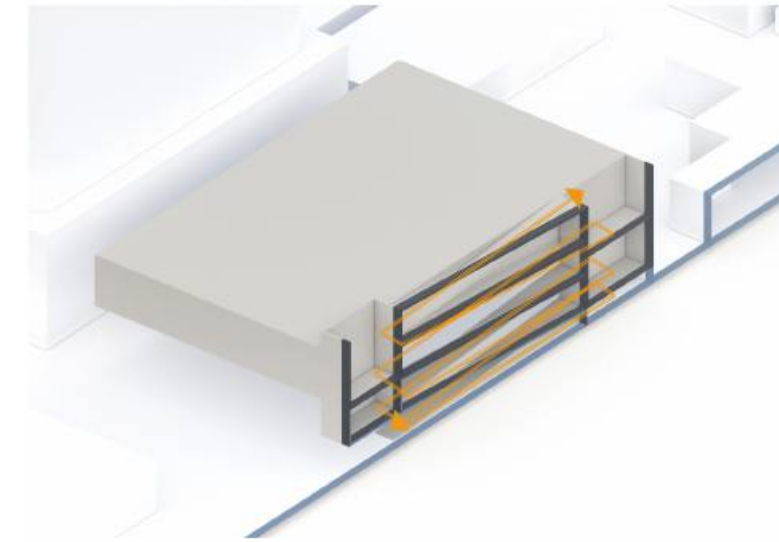

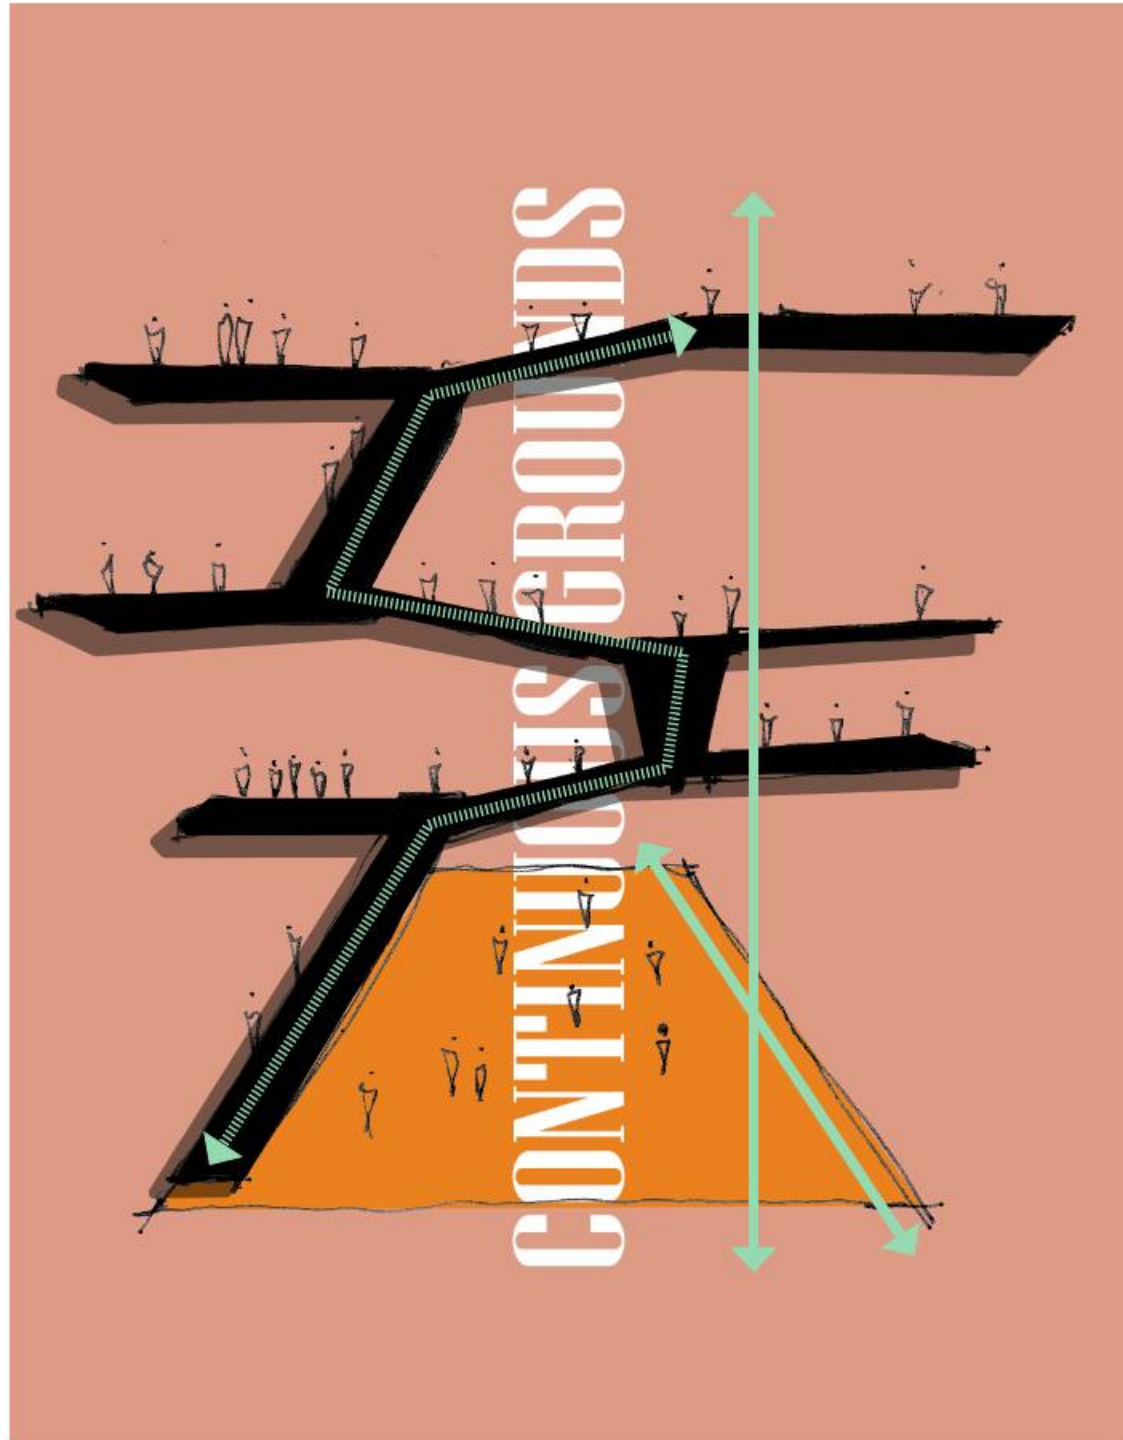

SENITHA DE SILVA

BRUTALISM

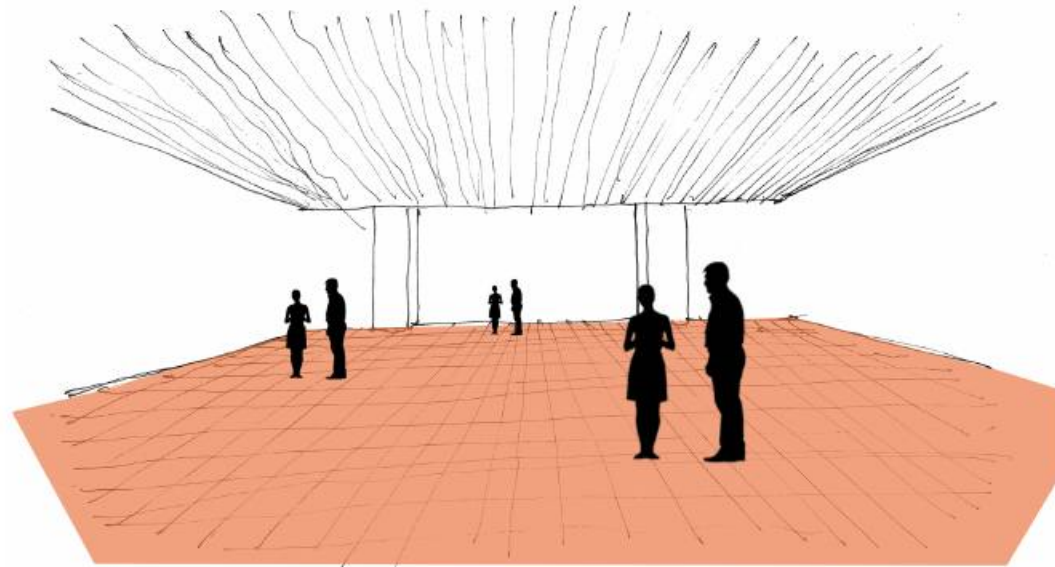

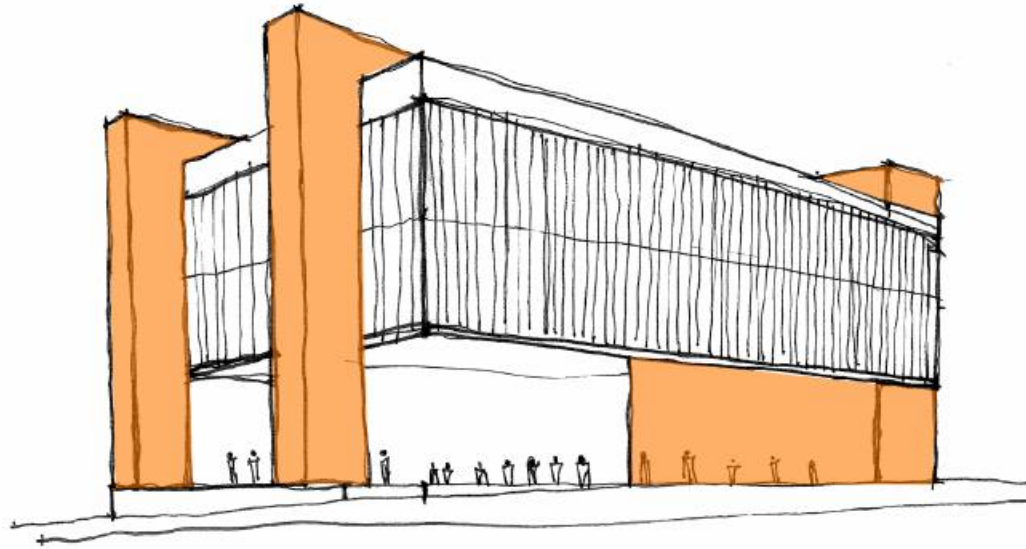

BRUTALISM - HISTORICALLY, BRUTALISM HAS BEEN USED AS AN ARCHITECTURAL STYLE TO MAKE A "STATEMENT". FOR EXAMPLE, CAPITOL COMPLEX, CHANDIGARH BY LE COBUSIER IS WAS DESIGNED TO EXPRESS FREEDOWN AND BREAK FROM COLONIALISM. ANOTHER ASPECT THAT I THOUGHT WHEN COMING UP WITH THESE ITERATIONS IS TO USE BRUTALISM TO MAKE A STATEMENT - SLOW AND SUSTAINABLE FASHION INSTED OF FAST FASHION.

THE IDEA FOR THE DESIGN IS TO HAVE MINIMAL IMPACTS ON PEDESTRIAN FLOW IN THE STREETSCAPES. THEREFORE HAVING A CONTINUOUS GROUND ACROSS THE SITE CONNECTING CREMORNE STREET AND DOVER STREET ENSURES SMOOTH PEDESTRIAN FLOW ACROSS THE SITE. THIS ALSO ATTRACTS PEOPLE TO GET ENGAGE IN EXHIBITION SPACES AND AWARENESS ACTIVITIES THAT HAPPENS IN THE SITE. MOREOVER THE SHOPPING ARCADE, RECREATIONAL SPACES AND ROOF TOP PUBLIC GREEN SPACES WOULD FURTHER ACT AS PUBLIC ATTRCTORS.

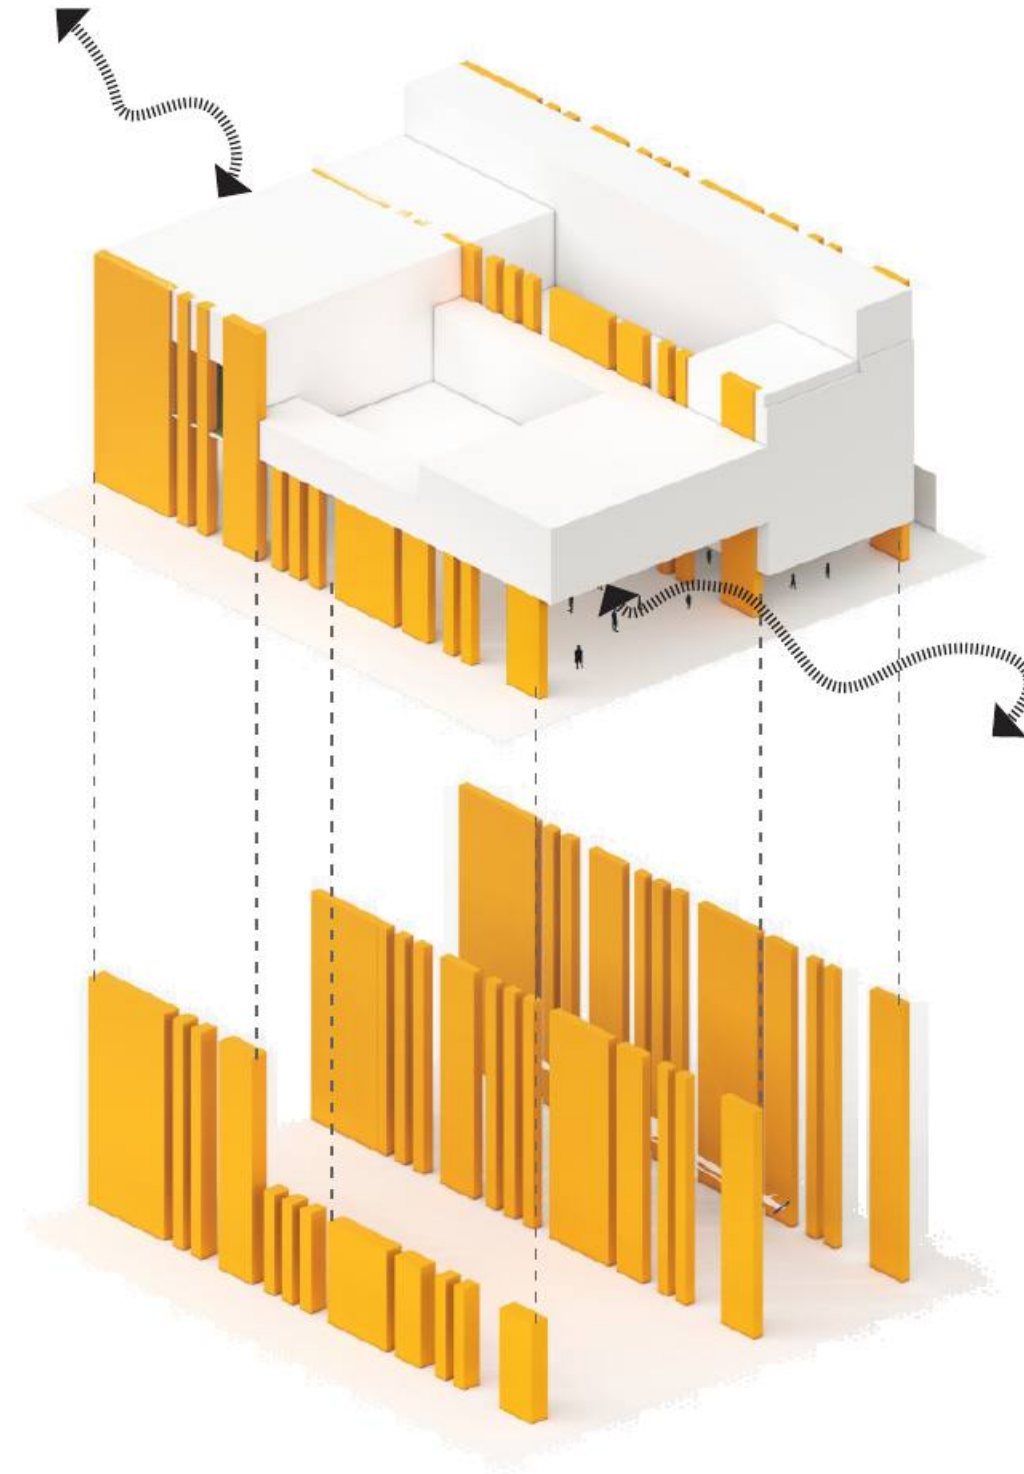

2 PRECEDENCE ANALYSIS - STRUCTURAL WALLS

MUSEUM OF ARTS SAO PAULO (MASP) - LINA BO BARDI

2 PRECEDENCE ANALYSIS - STRUCTURAL WALLS

DESIGN INFLUENCE

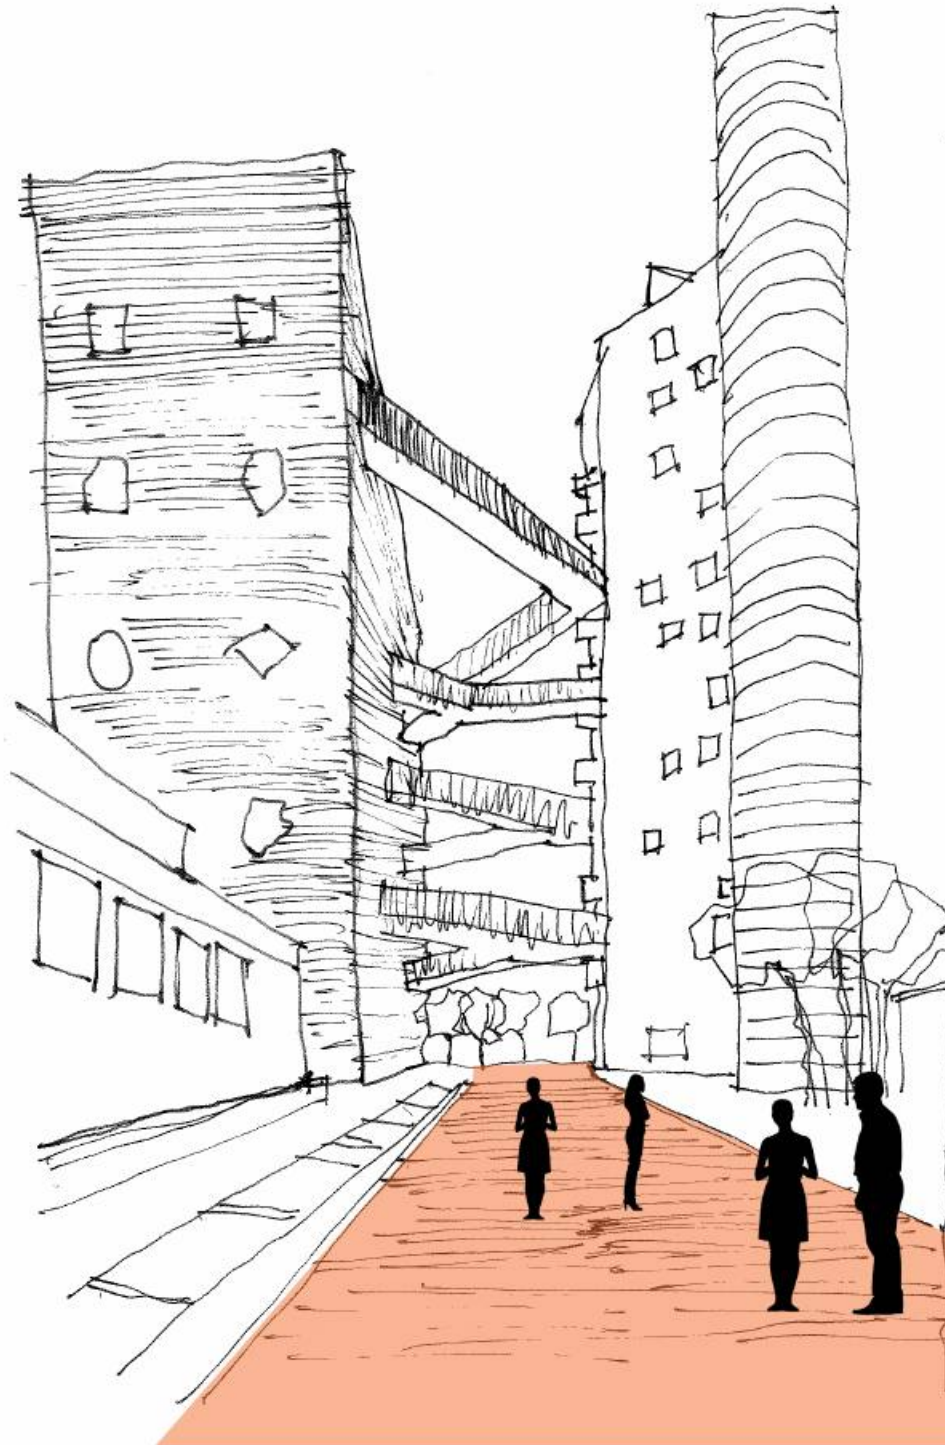

THE USE OF A SIMILAR STRUCTURAL SYSTEM TO MASP CREATES A LARGE UN-INTERRUPTED OPENING SUITABLE FOR A MULTI FUNCTIONAL SPACE. THIS SPACE COULD ALSO ACT AS A THOROUGHFARE, CONNECTING CREMORNE STREET AND DOVER STREET BY A PEDESTRIAN LINK.

RE WEAVE CREMORNE FOCUSES ON A SIMILAR STRUCTURAL SYSTEM TO THE MASP. THE STRUCTURAL WALLS (SHEAR WALLS) BEAR THE LOAD OF THE HORIZONTAL CONTINUOUS GROUND.

2 PRECEDENCE ANALYSIS - CONTINUOUS GROUNDS

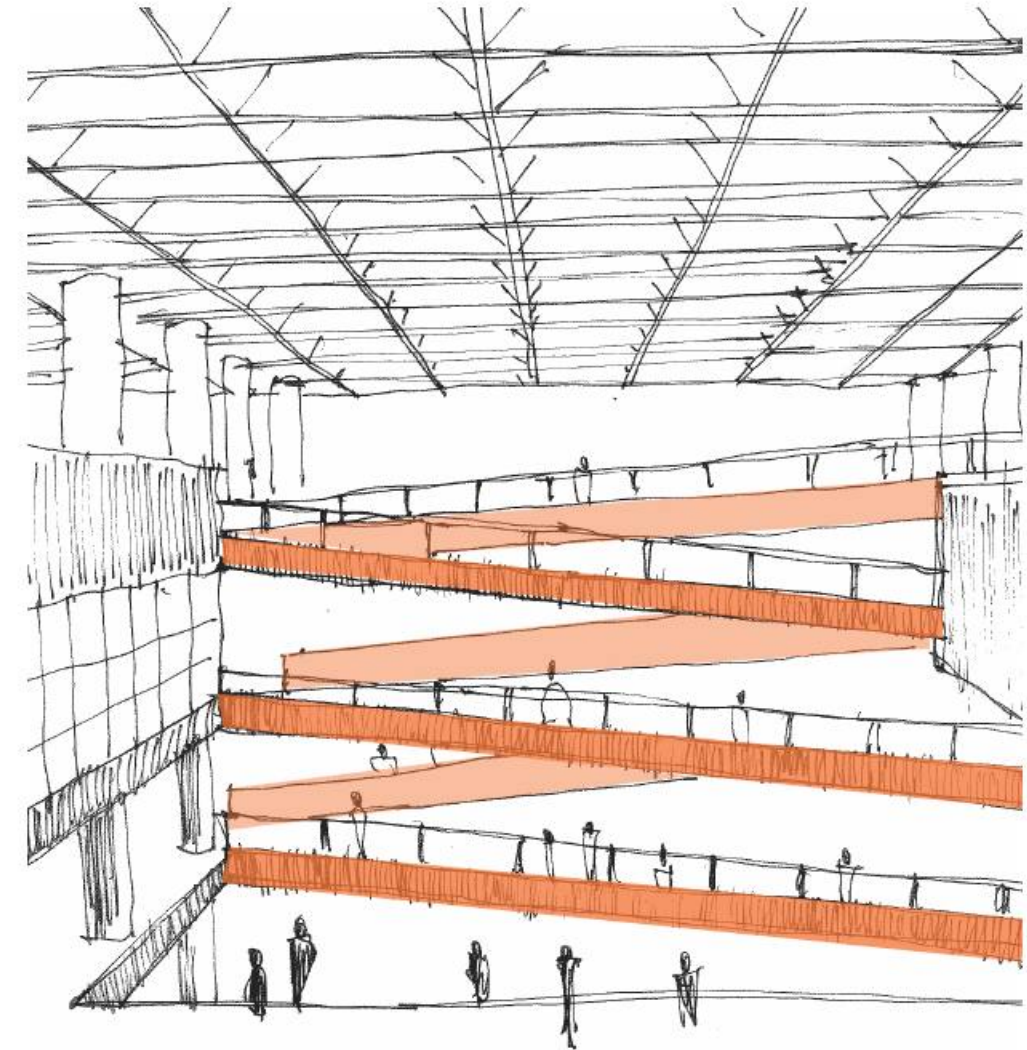

SESC POMPEIA
LINA BO BARDI

SESC POMPEIA DEMONSTRATES URBAN POROSITY BY ALLOWING THE BUILDING TO FUNCTION AS AN EXTENSION OF THE CITY RATHER THAN AS A CLOSED OBJECT. LINA BO BARDI KEEPS THE GROUND LEVEL OPEN AND ACCESSIBLE, ALLOWING PEDESTRIAN MOVEMENT TO FLOW NATURALLY BETWEEN THE SURROUNDING STREETS AND THE INTERIOR OF THE COMPLEX. BY REMOVING FENCES, RIGID THRESHOLDS AND DEFENSIVE BOUNDARIES, THE ARCHITECTURE ENCOURAGES OPENNESS, ENCOUNTER AND COLLECTIVE USE, REINFORCING THE IDEA OF PUBLIC SPACE AS SOMETHING THAT SHOULD REMAIN ACCESSIBLE AND SHARED BY EVERYONE.

2 PRECEDENCE ANALYSIS - CONTINUOUS GROUNDS

FACULTY OF ARCHITECTURE, UNIVERSITY OF SAO PAULO
JOAO BATISTA VILANOVA ARTIGAS

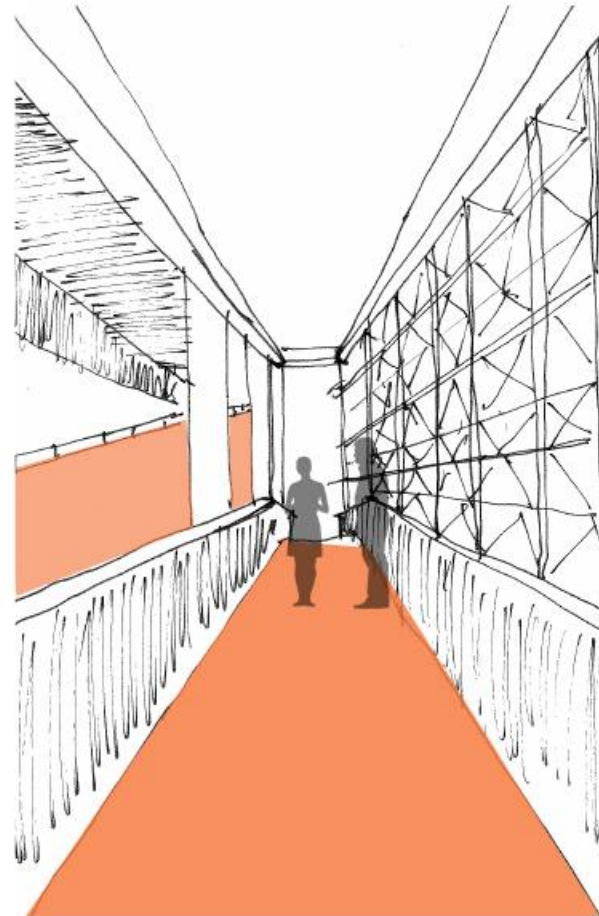

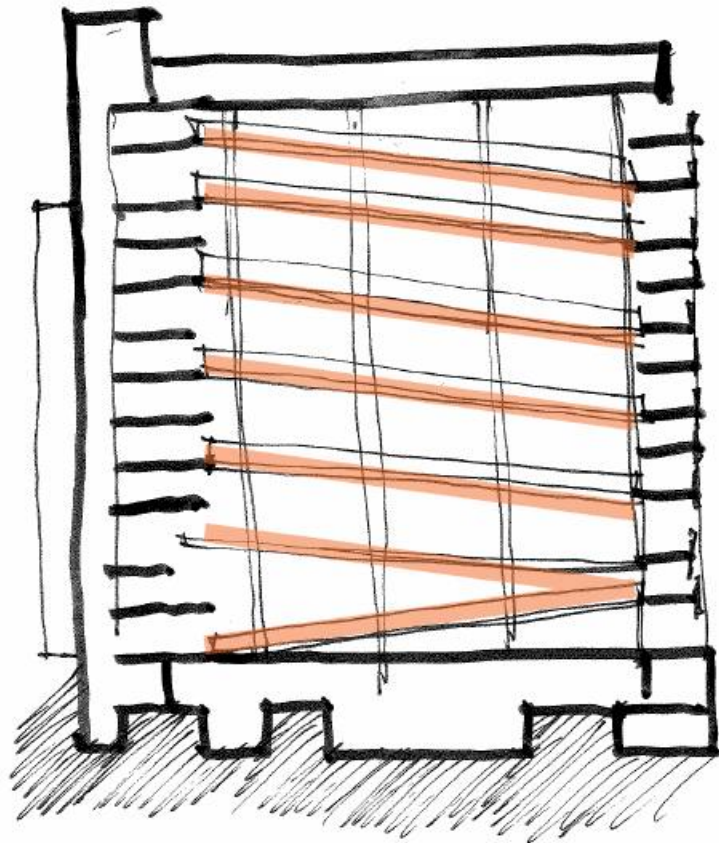

THE RAMP SYSTEM TRANSFORMS CIRCULATION INTO A CONTINUOUS ARCHITECTURAL EXPERIENCE. RATHER THAN SEPARATING EACH FLOOR AS AN ISOLATED LEVEL, THE RAMPS CONNECT THE BUILDING THROUGH A GRADUAL SEQUENCE OF MOVEMENT, MAKING THE INTERIOR FEEL LIKE ONE CONTINUOUS GROUND PLANE. THIS CREATES STRONG VISUAL AND SPATIAL CONNECTIONS BETWEEN LEVELS, ENCOURAGES INFORMAL ENCOUNTERS, AND ALLOWS MOVEMENT TO BECOME PART OF THE SOCIAL LIFE OF THE BUILDING RATHER THAN SIMPLY A MEANS OF GETTING FROM ONE FLOOR TO ANOTHER.

2 PRECEDENCE ANALYSIS - CONTINUOUS GROUNDS

SESC 24 DE MAIO

PAULO MENDES DA ROCHA, MMBB ARQUITETOS

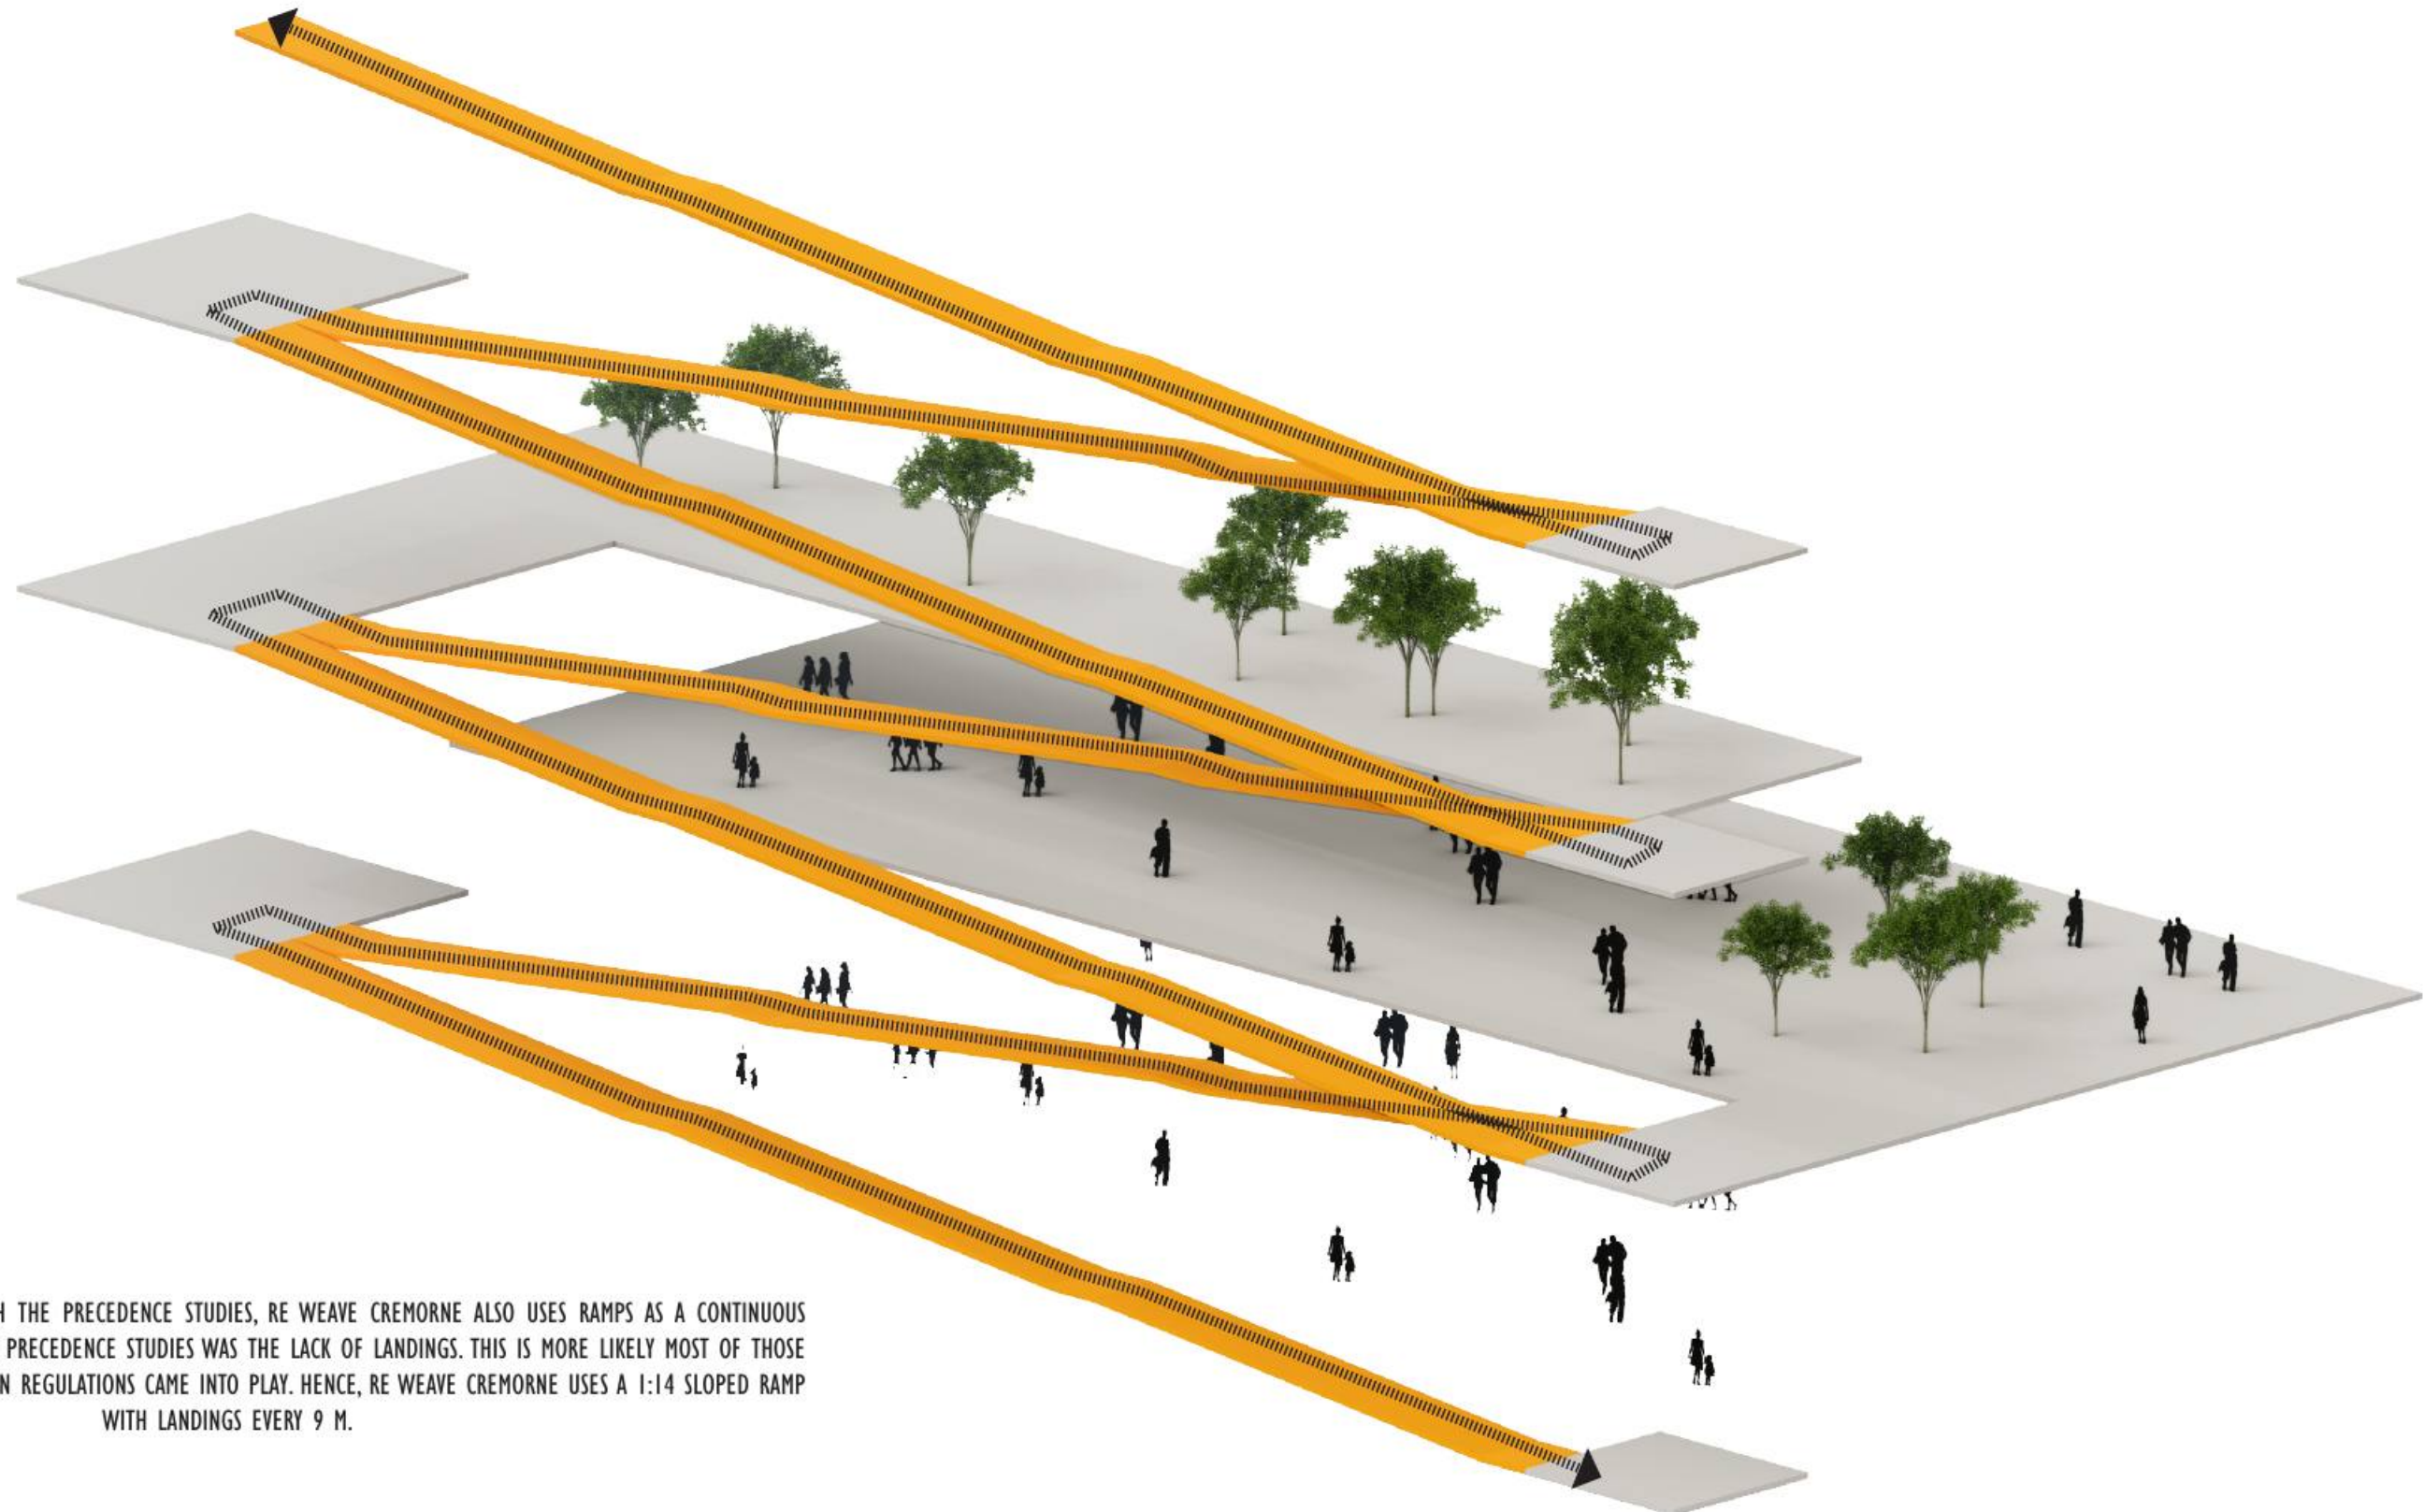

AT SESC 24 DE MAIO, THE RAMP SYSTEM CREATES A CONTINUOUS GROUND THAT EXTENDS MOVEMENT VERTICALLY THROUGH THE BUILDING. RATHER THAN TREATING EACH FLOOR AS A SEPARATE DESTINATION, PAULO MENDES DA ROCHA AND MMBB USE RAMPS TO CONNECT DIFFERENT PROGRAMS IN ONE UNINTERRUPTED SPATIAL SEQUENCE. CIRCULATION BECOMES PART OF THE ARCHITECTURE ITSELF, ENCOURAGING GRADUAL MOVEMENT, VISUAL CONNECTION AND INTERACTION BETWEEN LEVELS WHILE MAKING THE BUILDING FEEL LIKE AN EXTENSION OF THE CITY RATHER THAN A STACK OF ISOLATED FLOORS.

2 PRECEDENCE ANALYSIS - CONTINUOUS GROUNDS

DESIGN RESPONSE

USING THE IDEOLOGIES SEEN THROUGH THE PRECEDENCE STUDIES, RE WEAVE CREMORNE ALSO USES RAMPS AS A CONTINUOUS GROUND. A COMMON TRAIT OF ALL THE PRECEDENCE STUDIES WAS THE LACK OF LANDINGS. THIS IS MORE LIKELY MOST OF THOSE BUILDINGS WERE BUILT BEFORE MODERN REGULATIONS CAME INTO PLAY. HENCE, RE WEAVE CREMORNE USES A 1:14 SLOPED RAMP WITH LANDINGS EVERY 9 M.

2 PRECEDENCE ANALYSIS - ATMOSPHERES

PETER ZUMTHOR - THEORY OF ATMOSPHERES

01. THE BODY OF ARCHITECTURE

ARCHITECTURE GAINS ITS PHYSICAL PRESENCE THROUGH THE WAY STRUCTURE, MATERIALS AND SURFACES COME TOGETHER. THIS ASSEMBLED BODY SURROUNDS US, SHAPING OUR SENSE OF ENCLOSURE, TOUCH AND SHELTER.

02. MATERIAL COMPATIBILITY

MATERIALS CREATE ATMOSPHERE THROUGH THEIR RELATIONSHIPS WITH ONE ANOTHER. THEIR TEXTURE, WEIGHT, FINISH AND PROXIMITY INFLUENCE HOW THEY ARE EXPERIENCED TOGETHER, CREATING HARMONY, CONTRAST OR TENSION.

03. THE SOUND OF SPACE

EVERY SPACE HAS AN ACOUSTIC CHARACTER SHAPED BY ITS FORM, MATERIALS AND CONSTRUCTION. THE WAY IT CARRIES SOUND OR HOLDS SILENCE INFLUENCES OUR EMOTIONS, MEMORIES AND AWARENESS OF OTHERS.

07. TENSION BETWEEN INTERIOR AND EXTERIOR

ARCHITECTURE ESTABLISHES A RELATIONSHIP BETWEEN THE WORLD WITHIN AND THE WIDER WORLD OUTSIDE. THE BOUNDARIES BETWEEN THEM SHAPE OUR EXPERIENCE OF PRIVACY, EXPOSURE, ENCLOSURE AND CONNECTION.

08. LEVELS OF INTIMACY

INTIMACY GROWS FROM THE RELATIONSHIP BETWEEN OUR BODIES AND THE SIZE, WEIGHT AND PROXIMITY OF OUR SURROUNDINGS. DIFFERENT SPATIAL PROPORTIONS CAN MAKE US FEEL SHELTERED, CONNECTED TO OTHERS OR UPLIFTED BY A SENSE OF OPENNESS.

09. THE LIGHT ON THINGS

LIGHT GIVES MATERIALS THEIR VISIBLE PRESENCE AND SHAPES HOW WE PERCEIVE SPACE. THROUGH ITS RELATIONSHIP WITH SHADOW, IT REVEALS DEPTH, TEXTURE AND THE CHANGING MOOD OF ARCHITECTURE.

04. THE TEMPERATURE OF A SPACE

THE TEMPERATURE OF A SPACE IS EXPERIENCED BOTH PHYSICALLY AND EMOTIONALLY. MATERIALS, AIR AND BODILY CONTACT CONTRIBUTE TO A FEELING OF WARMTH, COOLNESS AND COMFORT THAT SHAPES ITS ATMOSPHERE.

05. SURROUNDING OBJECTS

THE THINGS PEOPLE SURROUND THEMSELVES WITH GIVE A SPACE PERSONAL MEANING AND A SENSE OF BELONGING. THROUGH EVERYDAY USE AND ATTACHMENT, INHABITANTS CREATE A LIFE WITHIN ARCHITECTURE THAT CONTINUES BEYOND THE ARCHITECT'S INTENTIONS.

06. BETWEEN COMPOSURE AND SEDUCTION

ARCHITECTURE BALANCES THE DESIRE TO PAUSE WITH THE CURIOSITY TO MOVE AND DISCOVER. ITS ATMOSPHERE UNFOLDS OVER TIME, OFFERING PLACES OF STILLNESS AND GENTLE INVITATIONS TO EXPLORE.

A1. ARCHITECTURE AS SURROUNDINGS

ARCHITECTURE BECOMES MEANINGFUL AS PART OF THE PLACES WHERE EVERYDAY LIFE UNFOLDS. OVER TIME, FAMILIAR BUILDINGS AND SPACES BECOME PART OF OUR MEMORIES AND SENSE OF BELONGING.

A2. COHERENCE

COHERENCE EMERGES WHEN PLACE, USE, MATERIALS AND FORM SUPPORT ONE ANOTHER AS A COMPLETE WHOLE. EACH ELEMENT FEELS NECESSARY, AND THE ARCHITECTURE FINDS ITS PURPOSE THROUGH THE WAY IT IS INHABITED.

09. THE LIGHT ON THINGS

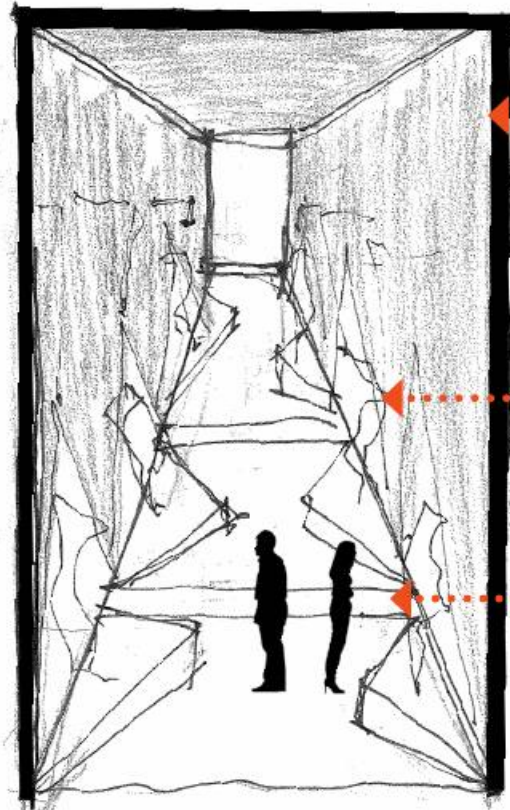

LIGHT GIVES MATERIALS THEIR VISIBLE PRESENCE AND SHAPES HOW WE PERCEIVE SPACE. THROUGH ITS RELATIONSHIP WITH SHADOW, IT REVEALS DEPTH, TEXTURE AND THE CHANGING MOOD OF ARCHITECTURE.

These images were generated through AI (chat gpt astra).

These images were generated through AI (chat gpt astra).

2 PRECEDENCE ANALYSIS - ATMOSPHERES

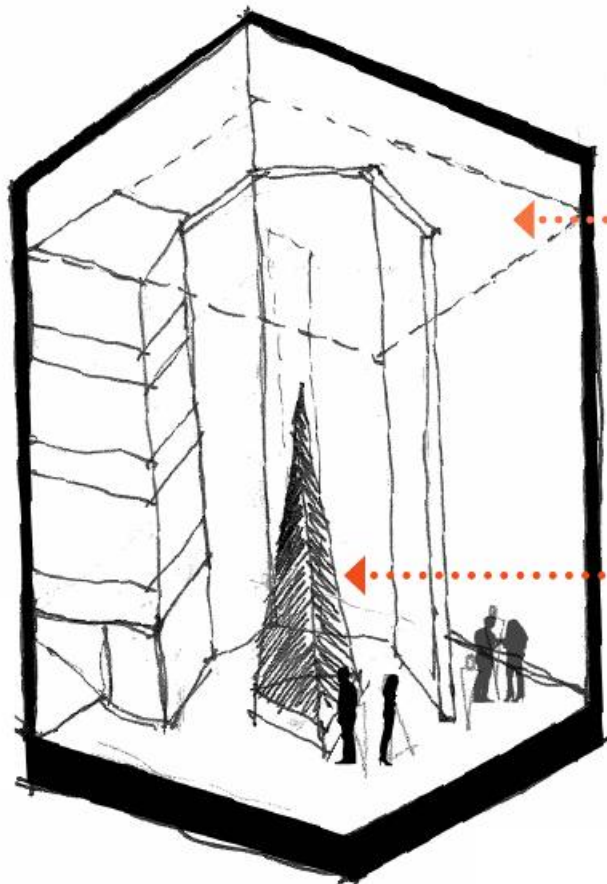

DESIGN INTENTION

MATERIAL COMPATIBILITY - DIFFERENT TEXTURES AND SHADES OF CONCRETE, COULD TRIGGER CERTAIN EMOTIONS, SUCH AS MELONCHOLY, ANGER, TRAGEDY, THRILL AND HORROR. ON THE OTHER HAND, PIGMENTED CONCRETE COULD CREATE HAPPYNESS, PLAYFUL

BETWEEN COMPOSURE AND SEDUCTION - SUBTLE CHANGES IN FORMS, SHAPES AND DISTURPTIONS COULD SLOW DOWN MOVEMENT, GIVING A PURPOSEFUL ATTENTION TOWARDS EXHIBITS

LEVELS OF INTIMACY - NARROW TALL RAMPS SPACES COULD CREATE EMOTIONS OF MELONCHOLY. SUCH SPACES COULD BE USED TO ENHANCE THE ATMOSPHERES A SPECIFIC STATEMENT OR GIVE AWARENESS ON SUCH INCIDENTS.

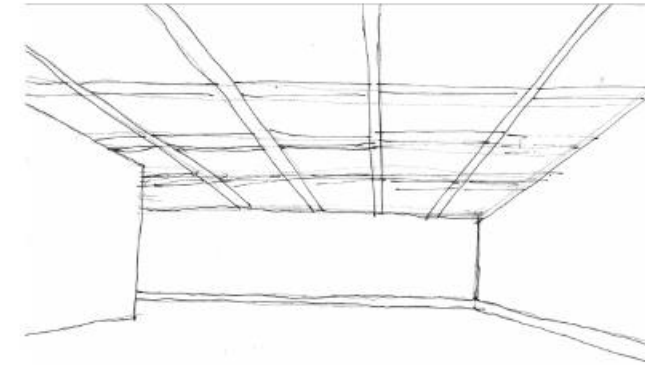

LIGHTS ON THINGS - LIGHTING ON A DARK SPACE, COULD HIGHLIGHT CERTAIN THINGS, LIKE HOW SPOTLIGHTS CAN HIGHLIGHT EXHIBITS. CAN LIGHT HIGHLIGHT A SOURCE SURFACE? USUALLY NOT BECAUSE OF GLARE. BUT LED PANELS ARE DESIGNED TO HIGHLIGHT VISUALS OF ITS SOURCE. WHICH COULD CREATE CERTAIN ATMOSPHERES AND CURATE SPECIFIC INFORMATION.

2 PRECEDENCE ANALYSIS - ATMOSPHERES

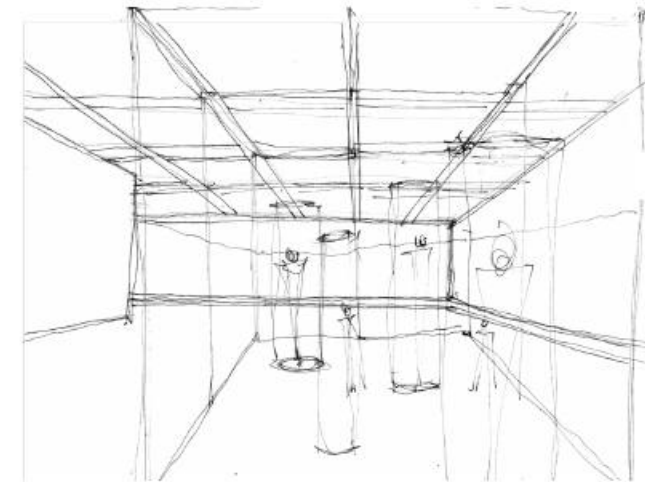

DESIGN INTENTION

BODY OF ARCHITECTURE
MATERIAL COMPATIBILITY

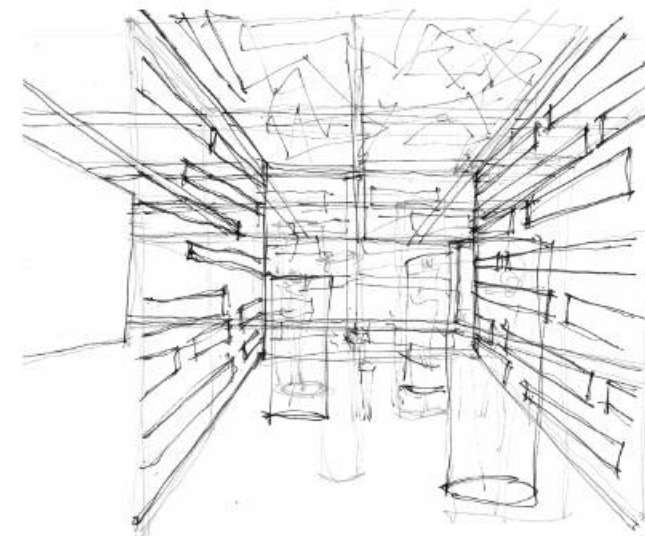

A MULTI FUNCTIONAL SPACE COVERED BY DARK CONCRETE WALLS - CREATES A CANVAS

SURROUNDING OBJECTS
BETWEEN COMPOSURE AND SEDUCTION

THE SPACE GETS EXHIBITS, TRANSFORMABLE PARTITIONS AND LIGHTING.

LIGHTS ON THINGS
TEMPERATURE OF SPACE

A DIFFERENT CURATION OF THE SPACE COULD INCLUDE LED PANELS, SCULPTURES AND STRIP LIGHTS TO CREATE A DIFFERENT EMOTION

3 DESIGN METHOD - DESIGNING WITH MUSIC

INTRODUCTION

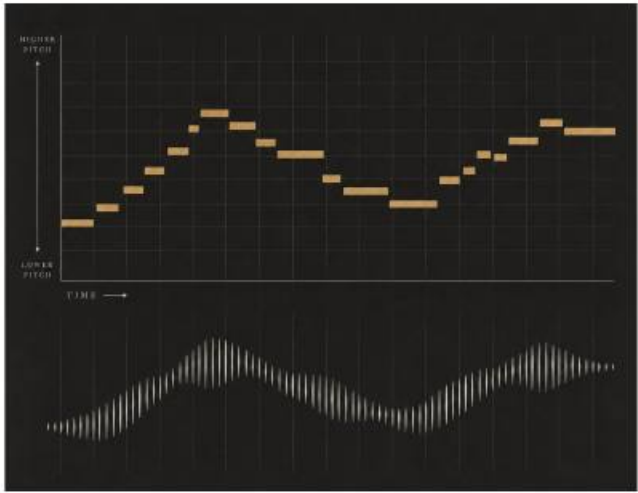

THIS PROJECT EXPLORES MUSIC AS A TOOL FOR ARCHITECTURAL DESIGN, TRANSLATING SOUND, RHYTHM AND EMOTION INTO SPATIAL EXPERIENCE. RATHER THAN USING MUSIC AS A LITERAL REFERENCE, THE DESIGN INVESTIGATES HOW QUALITIES SUCH AS TEMPO, REPETITION, INTENSITY, HARMONY AND TRANSITION CAN INFLUENCE STRUCTURE, MOVEMENT, MATERIALITY, LIGHT AND ATMOSPHERE.

DIFFERENT MUSICAL COMPOSITIONS WERE STUDIED FOR THEIR EMOTIONAL AND RHYTHMIC CHARACTERISTICS, WITH THESE QUALITIES THEN INTERPRETED THROUGH ARCHITECTURAL ELEMENTS AND SEQUENCES OF SPACE. MOMENTS OF TENSION, CALM, REPETITION AND RELEASE BECOME CHANGES IN SCALE, ENCLOSURE, CIRCULATION, STRUCTURE AND LANDSCAPE.

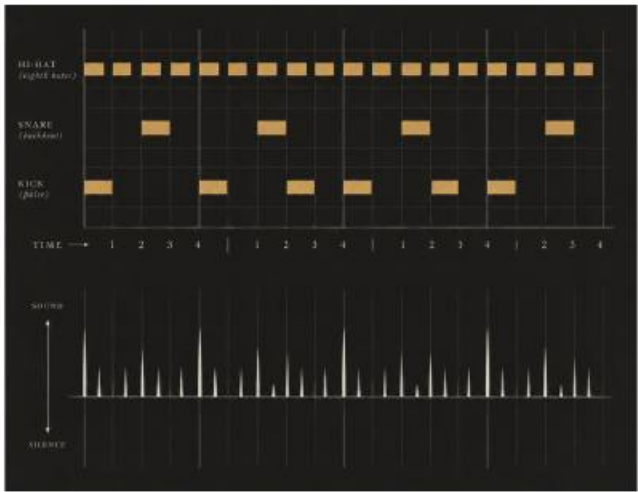

THROUGH THIS PROCESS, ARCHITECTURE IS APPROACHED ALMOST LIKE A MUSICAL COMPOSITION - WHERE INDIVIDUAL SPACES ACT AS DISTINCT MOMENTS, YET TOGETHER CREATE A CONTINUOUS JOURNEY. MUSIC THEREFORE BECOMES A FRAMEWORK FOR SHAPING NOT ONLY THE PHYSICAL FORM OF THE BUILDING, BUT ALSO HOW IT IS PERCEIVED, OCCUPIED AND EMOTIONALLY EXPERIENCED.

3 DESIGN METHOD - DESIGNING WITH MUSIC

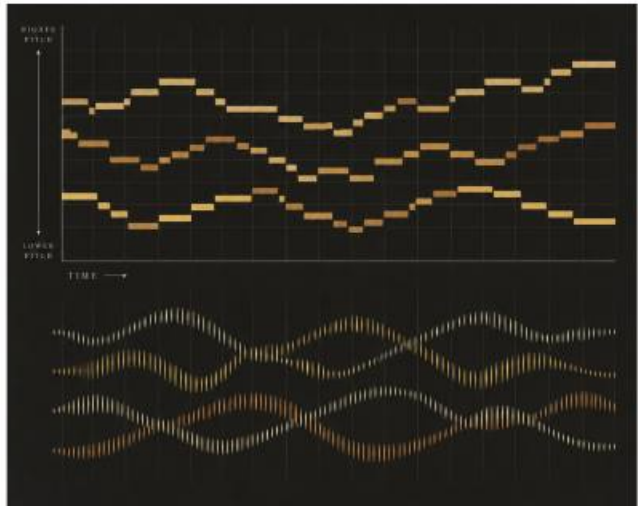

QUALITIES IN MUSIC

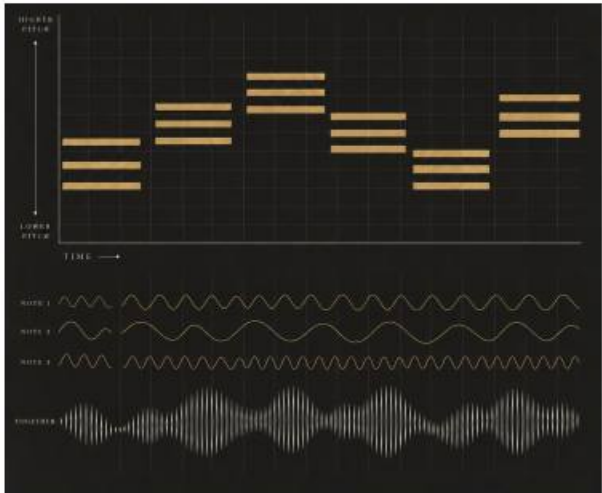

MELODY - A SEQUENCE OF PITCHES OR NOTES THAT FORM A SINGLE, RECOGNIZABLE TUNE.

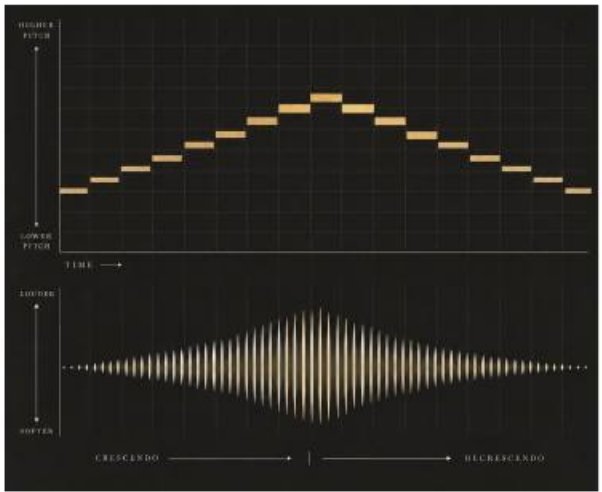

RHYTHM - THE PATTERN OF SOUNDS AND SILENCES ORGANIZED OVER TIME.

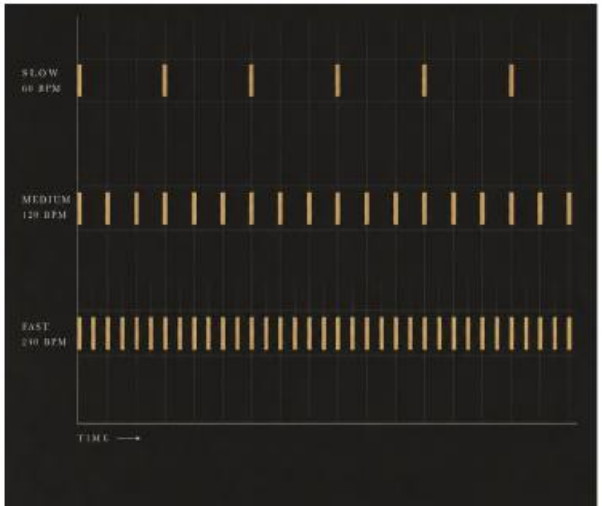

TEXTURE - THE INTERACTION OF DIFFERENT LAYERS OF SOUND, SUCH AS A SINGLE MELODIC LINE (MONOPHONIC) OR MULTIPLE INDEPENDENT VOICES (POLYPHONIC)

HARMONY - TWO OR MORE NOTES SOUNDED SIMULTANEOUSLY TO CREATE CHORDS AND ADD DEPTH.

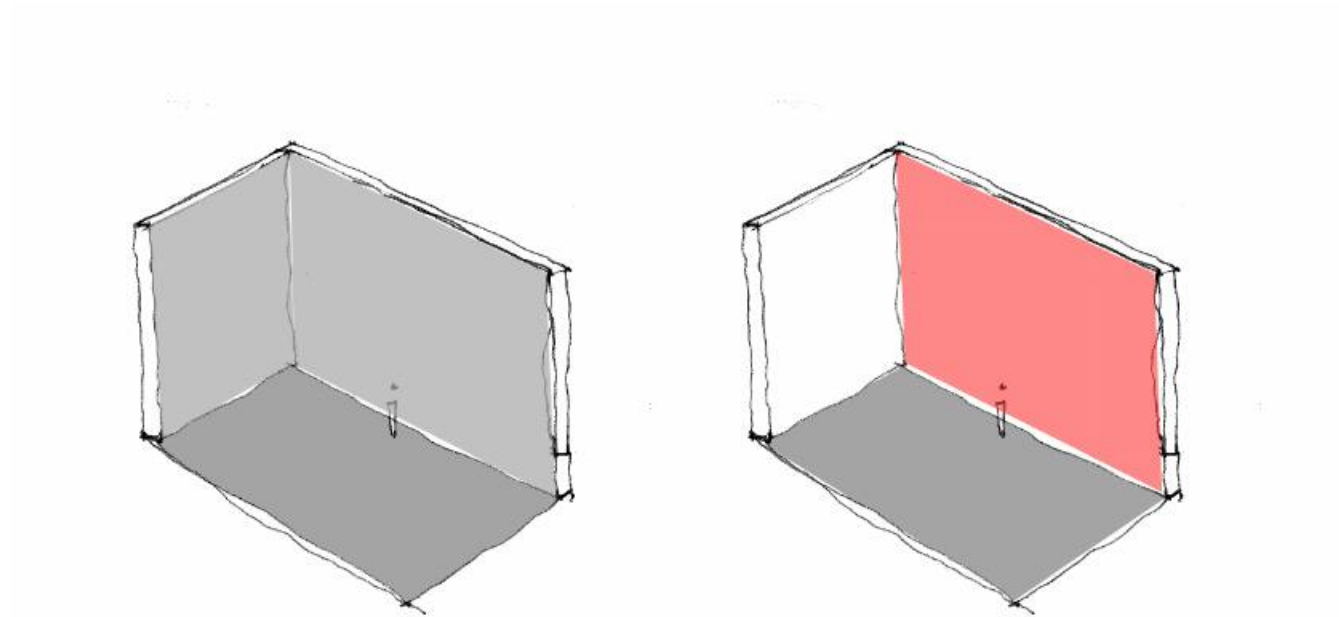

DYNAMICS - THE VARYING LEVELS OF VOLUME, RANGING FROM VERY SOFT (PIANO) TO VERY LOUD (FORTE).

TEMPO - THE SPEED OR PACE OF THE BEAT, OFTEN MEASURED IN BEATS PER MINUTE (BPM).

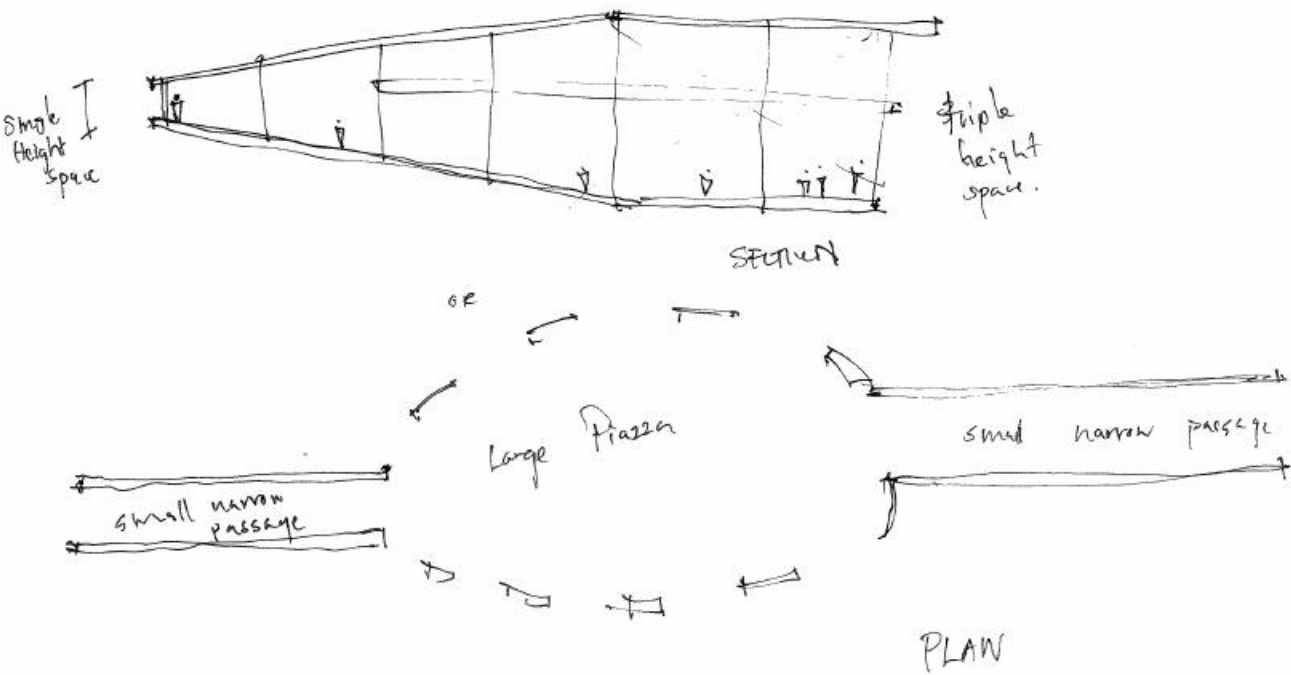

3 DESIGN METHOD - DESIGNING WITH MUSIC

MUSIC IN ARCHITECTURE

MELODY - A SINGLE MATERIAL AND TEXTURE DOMINATING AN ENTIRE SPACE

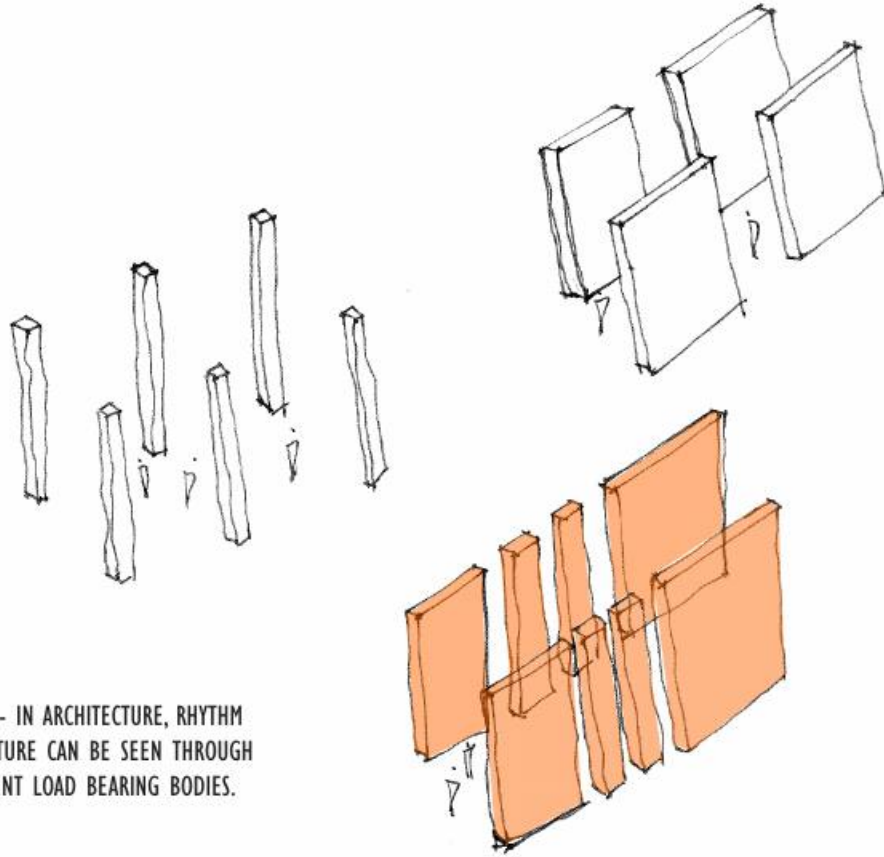

HARMONY - TWO OR MORE MATERIALS OR TEXTURES KEPT TOGETHER SIMULTANEOUSLY TO CREATE BALANCE AND ADD DEPTH.

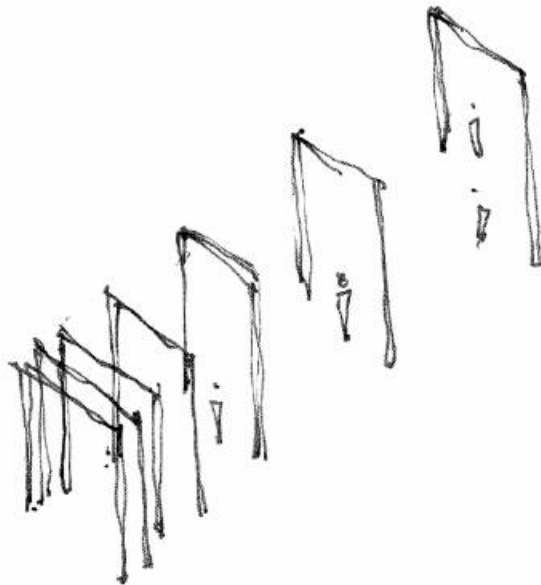

IN ARCHITECTURE, DYNAMICS CAN BE SEEN THROUGH SUDDEN CHANGES IN PROPORTION.

3 DESIGN METHOD - DESIGNING WITH MUSIC

MUSIC IN ARCHITECTURE

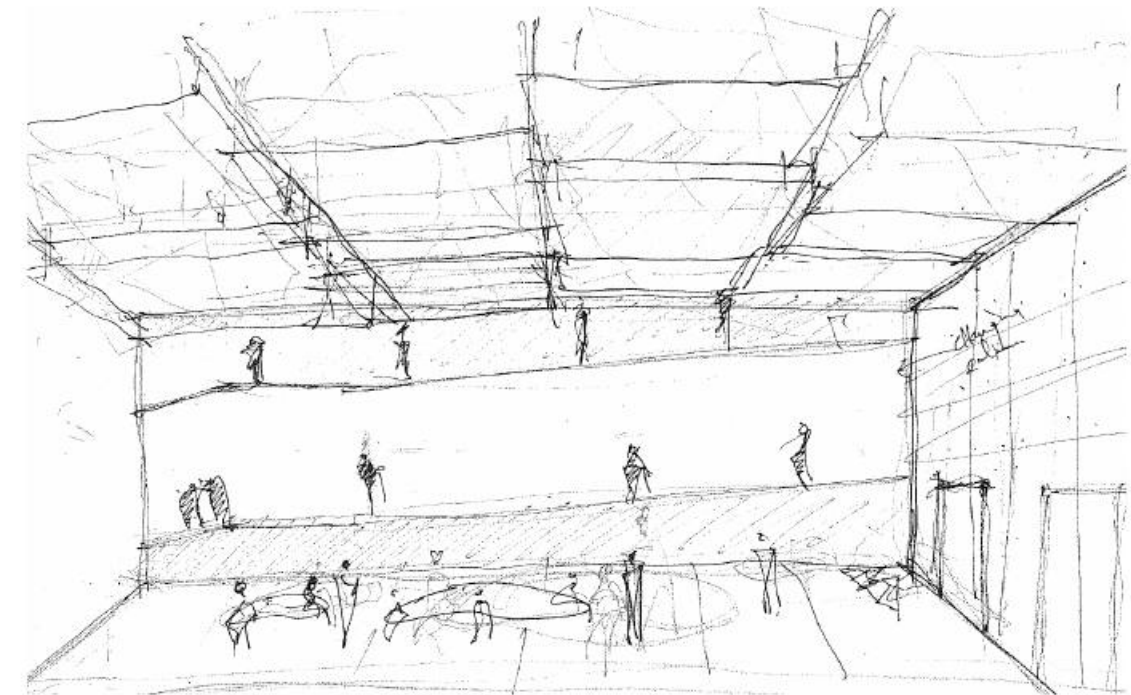

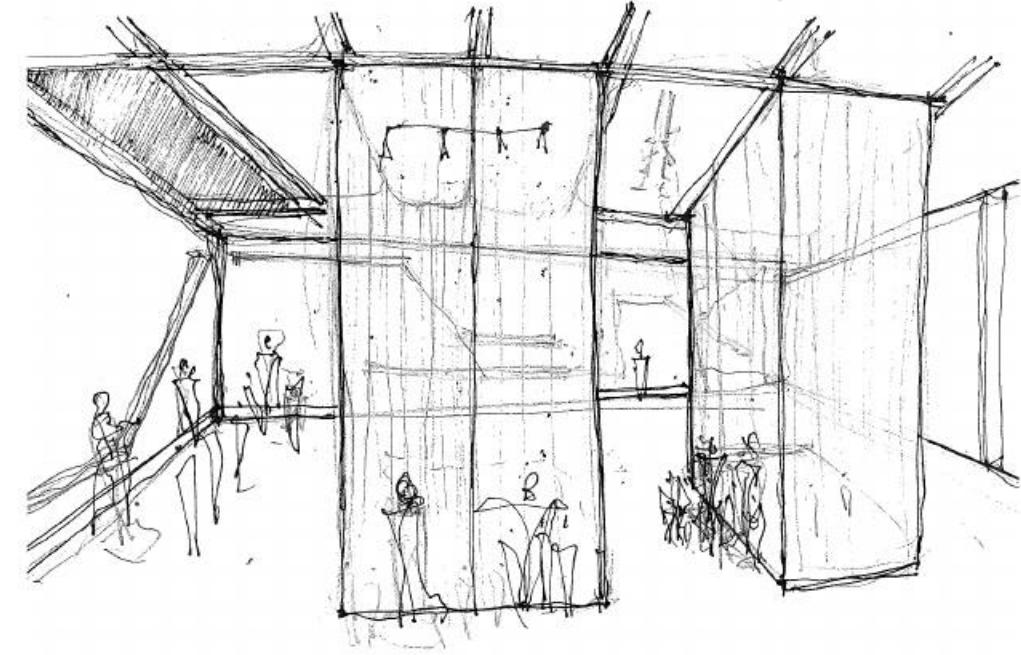

RHYTHM - IN ARCHITECTURE, RHYTHM OR STRUCTURE CAN BE SEEN THROUGH DIFFERENT LOAD BEARING BODIES.

IN ARCHITECTURE - TEMPO CAN BE SEEN BY CHANGING THE LENGTHS BETWEEN CONCURRENT ELEMENTS

3 DESIGN METHOD - DESIGNING WITH MUSIC

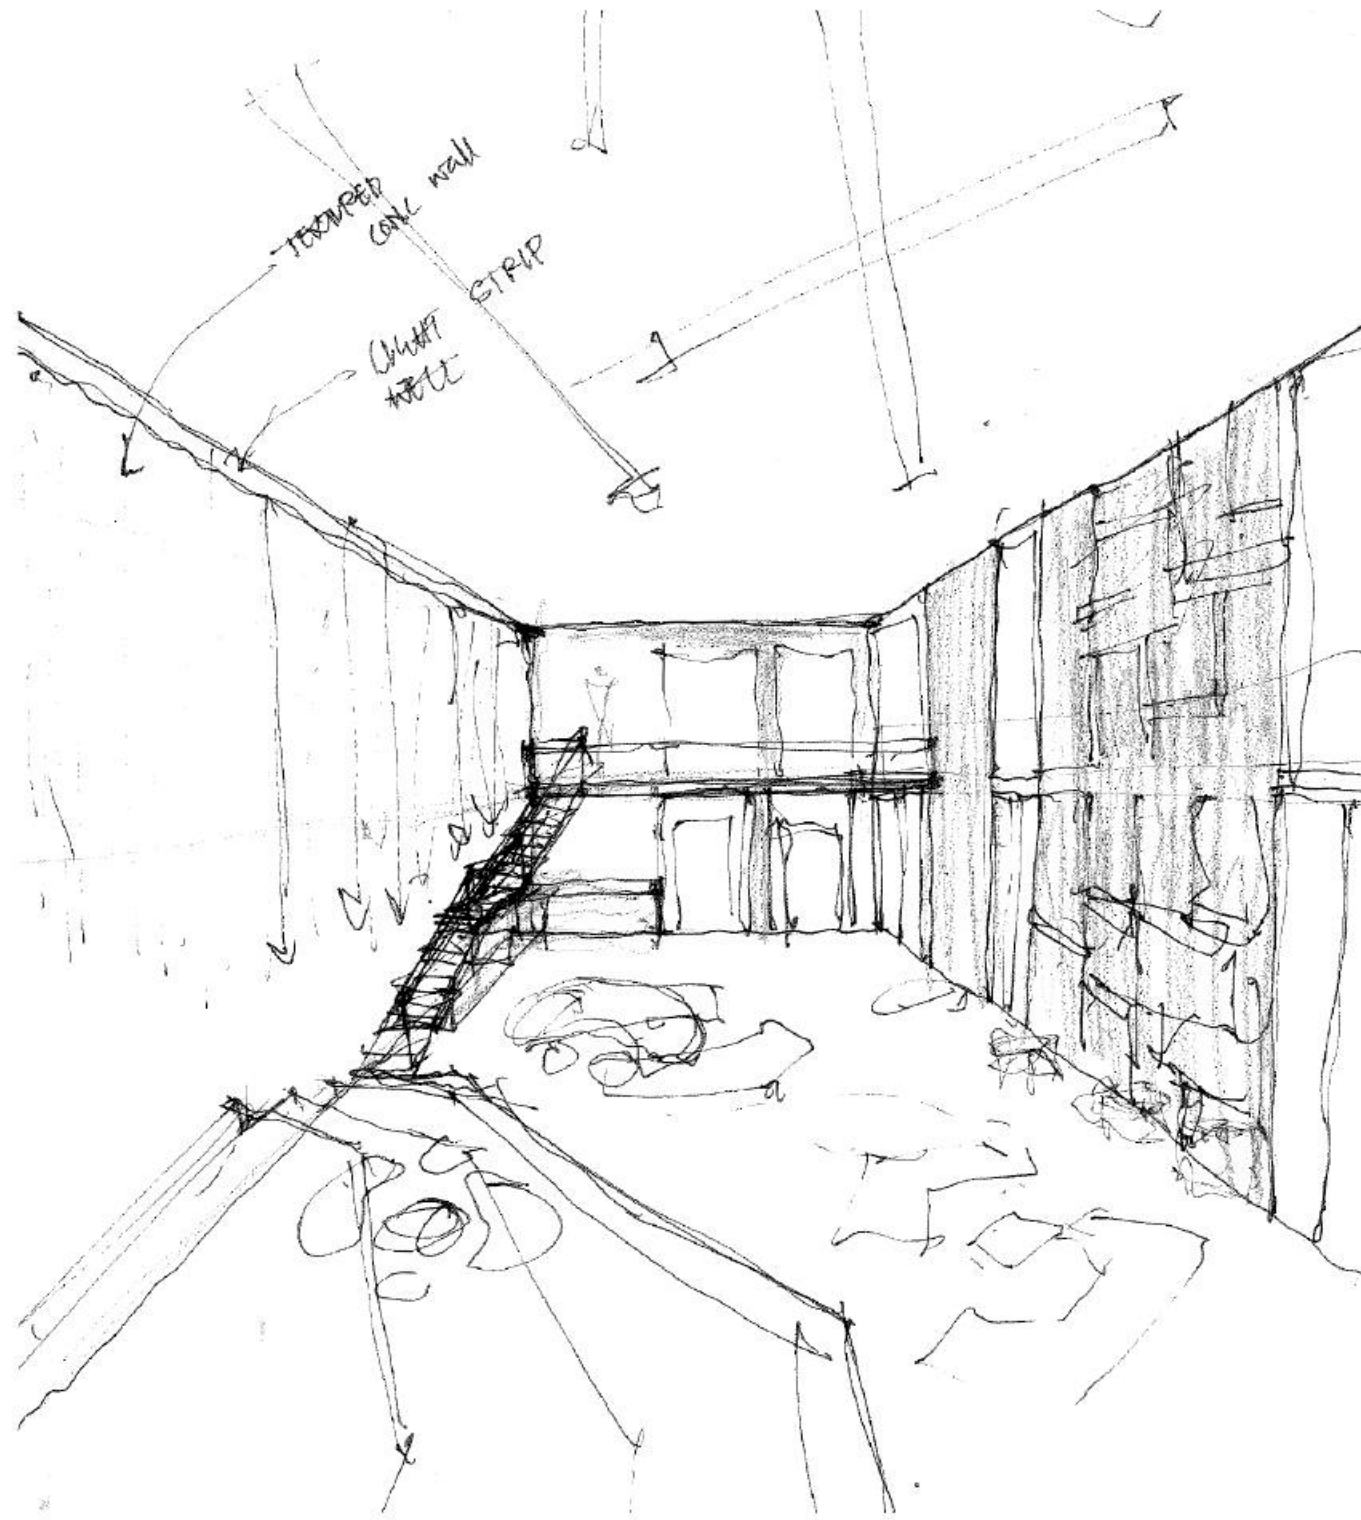

EXPLORING SPACES THROUGH MUSIC

EXPLORING DIFFERENT SPATIAL QUALITIES AND ATMOSPHERES THROUGH MUSIC

3 DESIGN METHOD - DESIGNING WITH MUSIC

EXPLORING SPACES THROUGH MUSIC

3 DESIGN METHOD - DESIGNING WITH MUSIC

EXPLORING SPACES THROUGH MUSIC

SPACE - GROUND FLOOR COMMON GROUND CONNECTING CREMORNE STREET TO DOVE STREET
SONG - M83 - SOLITUDE (FELSMANN + TILEY REINTERPRETATION)

THE RHYTHMIC STRUCTURE OF THE SONG IS REPRESENTED BY ACCENTED SUSTAINED CHORDS INSTEAD OF THE USE OF PERCUSSION. THIS MAINTAINS THE HEAVINESS OF THE SONG. SIMILARLY I HAVE CREATED RHYTHMIC STRUCTURAL WALLS TO GIVE A SENSE OF HEAVINESS TO THE SPACE.

THE SONG'S MELODIC STRUCTURE IS IN A MINOR KEY. IN THE WORLD OF MUSIC MINOR KEY IS KNOWN FOR CREATING SAD, DARK AND GREY MELANCHOLIC EMOTIONS WITHIN A SONG. AS AN ARCHITECTURAL INTERVENTION, HAVE USED EXPOSED CONCRETE FOR THIS SPACE THE MAIN MATERIAL. THE COMBINATION OF CONCRETE AND HEAVY STRUCTURAL WALLS CREATE A DARK ATMOSPHERE WITHIN THE SPACE.

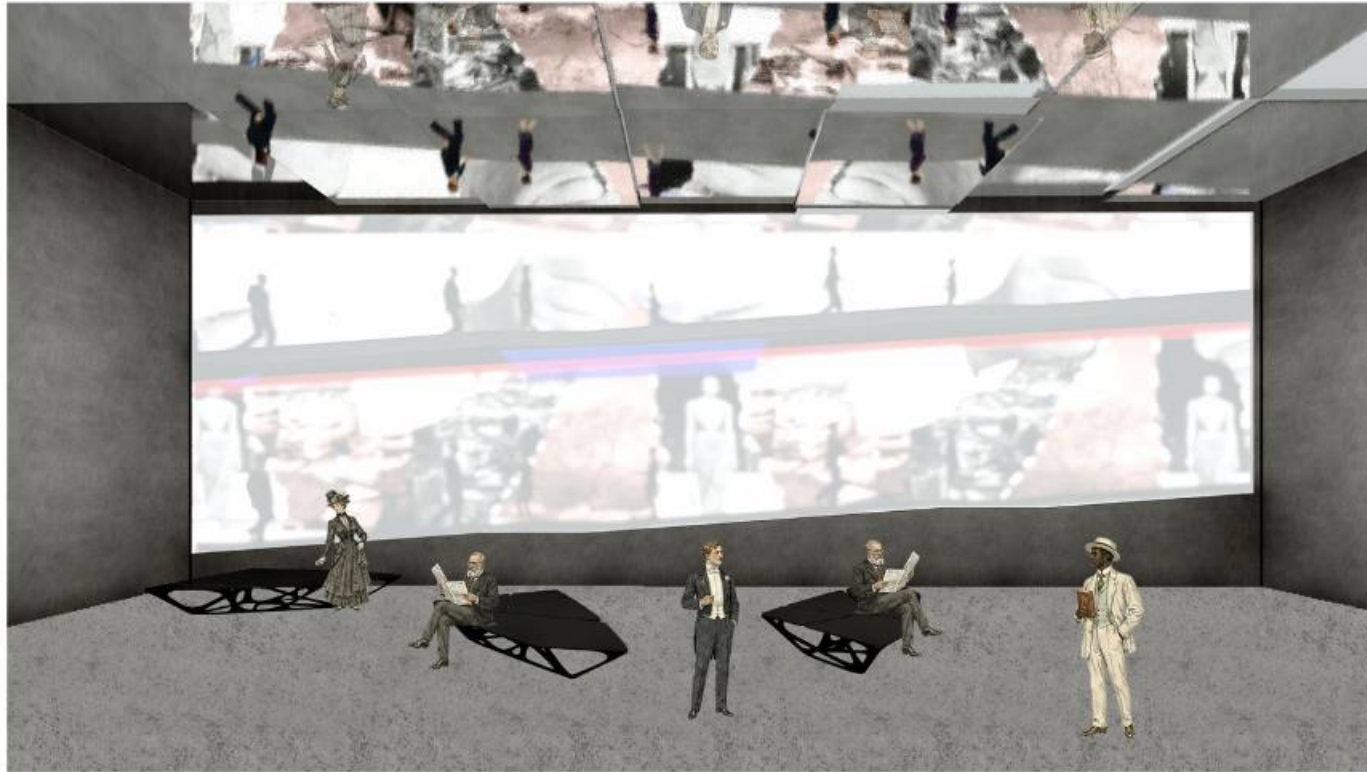

THIS SONG ALSO HAS WELL DEFINED REVERBERATIONS AND ECHOS, WHICH ENHANCES THE EMOTIONAL DEPTH OF THE SONG. I WAS ABLE TO ACHIEVE THIS EMOTIONAL DEPTH AROUND THE ATMOSPHERE OF THIS SPACE BY CREATING A DOUBLE HEIGHTED, MONUMENTAL SCALE THROUGHOUT THE COMMON GROUND.

THE LAYERED VOCALS OF THE SONG ALMOST ACTS AS A REFLECTION, A REFLECTION THAT CREATES AN IDEA OF AN ABSTRACT CONVERSATION. THE LONG TRANSFORMABLE MIRRORED PANELS ON THE CEILING CREATES REFLECTIONS FOR INDIVIDUALS TO PERCEIVE THEMSELVES WITHIN THE MOVEMENT OF THE CROWD, CREATING MOMENTS OF PERSONAL CONTEMPLATION WITHIN A SHARED CIVIC SPACE AND ENCOURAGING THEM TO REFLECT ON THEIR OWN CONTRIBUTION TO FAST FASHION

3 DESIGN METHOD - DESIGNING WITH MUSIC

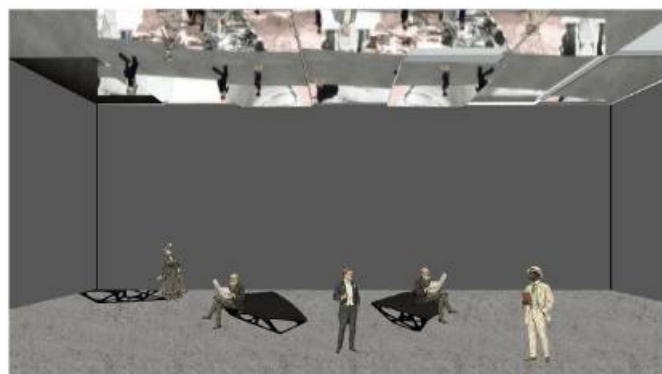

EXPLORING SPACES THROUGH MUSIC

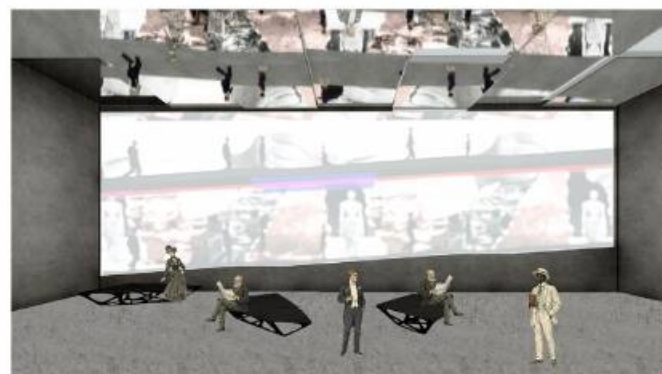

SPACE - GROUND FLOOR LOBBY - ACCESS TO THE AWARENESS SPACES AND THE RAMPS
SONG - EVERYTHING IN ITS RIGHT PLACE - RADIOHEAD

THE SONG'S WELL DEFINED REVERBARATIONS AND HEAVY THE PROMINANT BASS ENSURES THE CONTINUATION OF THE MELONCHOLIC ATMOSPHERE FROM THE COMMON GROUND BY HAVING A SIMILAR DOUBLE HEIGHTED LOBBY WITH CONCRETE TEXTURES.

THE POLYPHONIC VOCALS - MULTIPLE VOICES SINGING AT DIFFERENT TIMES, OVERLAPPING AT CERTAIN PLACES CREATES A DISTORTED FEELING, ALMOST AS IF THE SONG IS TRYING TO MAKE YOU FEEL DIFFERENT EMOTIONS EACH TIME. I TRIED TO ACHIEVE THIS BY HAVING MIRRORRED PANELS AT DIFFERENT HEIGHTS, CREATING SLIGHTLY DIFFERENT REFLECTIONS EACH TIME.

THE DISTORTED VOCALS AND LAYERED SYNTHS IN CREATE AN ELECTRIFYING ATMOSPHERE. THIS IS TRANSLATED THROUGH TRANSLUCENT GLASS WALLS ALONG THE RAMPS, INTEGRATED WITH LED PANELS THAT CAST SUBTLY SHIFTING LIGHT INTO THE LOBBY. AS PEOPLE MOVE BEHIND THE GLASS, THEIR SILHOUETTES APPEAR AND DISSOLVE, ECHOING THE SONG'S FLICKERING ELECTRONIC TEXTURES.

3 DESIGN METHOD - DESIGNING WITH MUSIC

EXPLORING SPACES THROUGH MUSIC

SCAN THE QR CODE TO VIEW THE FULL COLLECTION OF SPACES EXPLORED THROUGH MUSIC. EXPERIENCE EACH SPACE IMMERSIVELY WHILE LISTENING TO THE SONG THAT INSPIRED ITS ATMOSPHERE AND DESIGN.

FOR THE BEST EXPERIENCE, PLEASE USE HEADPHONES.

4 MASSING AND ZONING - SITE RESPONSES

STREET CONNECTIONS
PEDESTRIAN ACTIVITY

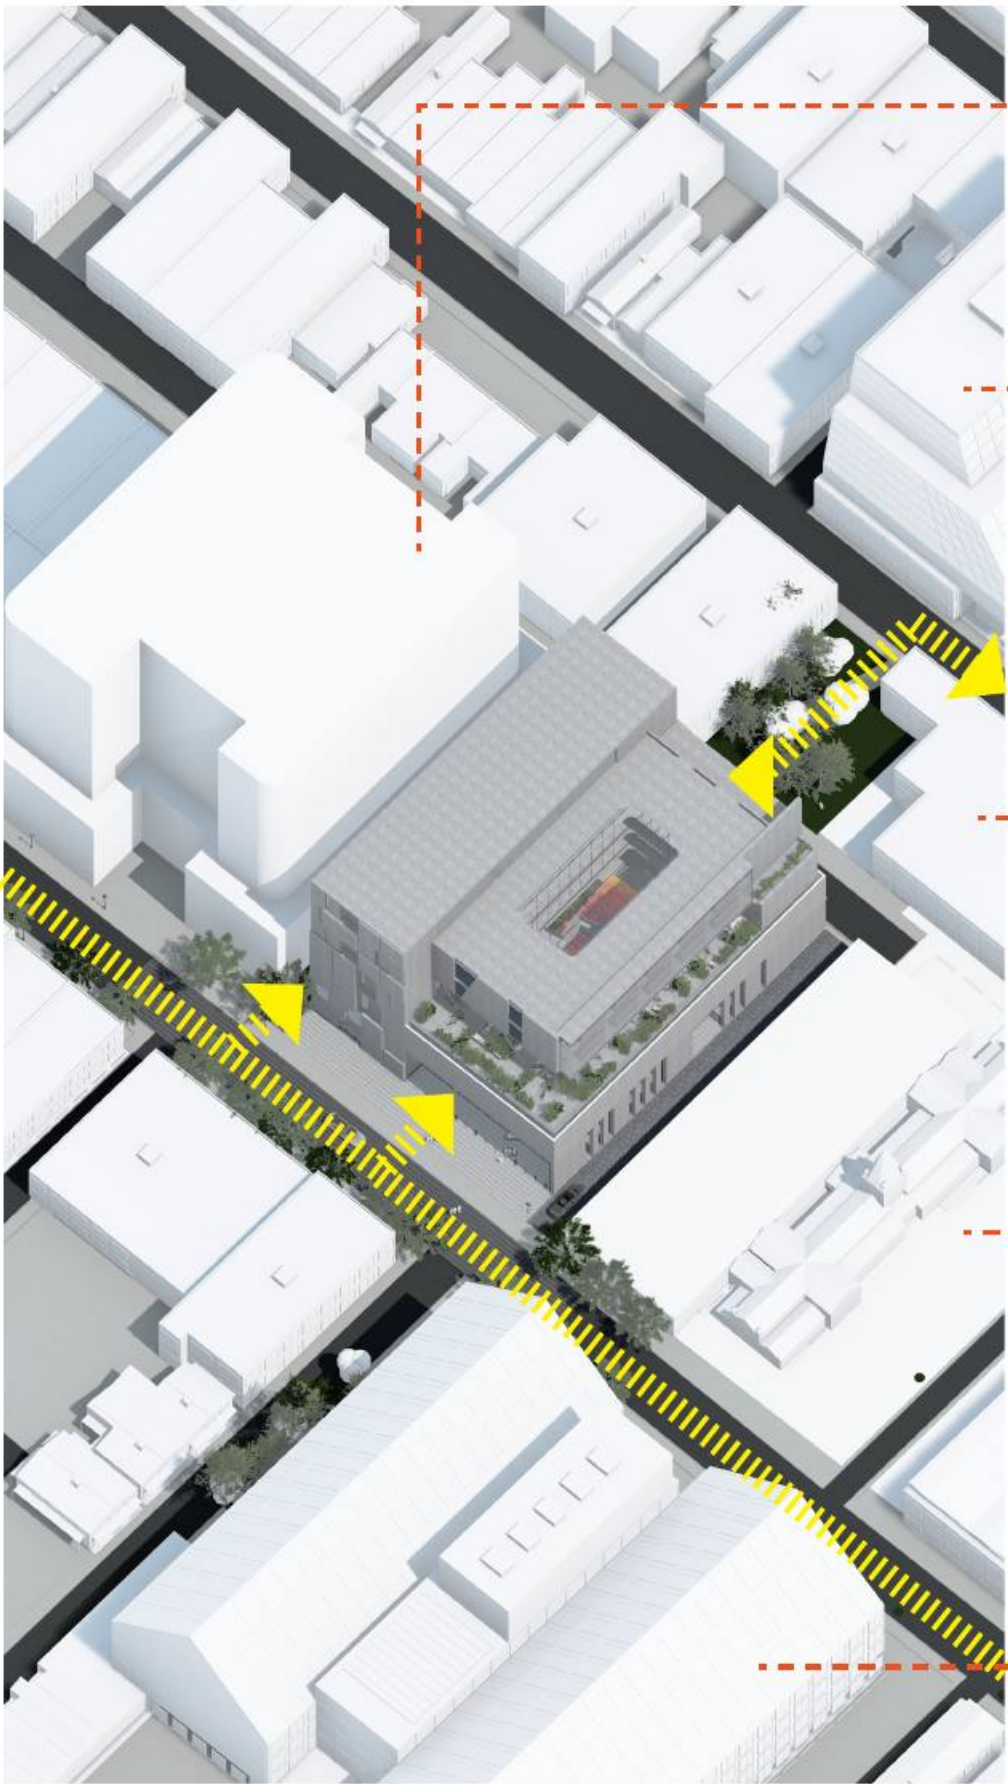

THE CONTINUOUS GROUND CONNECTS CREMORNE STREET WITH OTHER PUBLIC GREEN SPACES AND DOVER STREET. THE DESIGN IS OFFSET FROM THE SIDES BY 5 M EACH SIDE, WHICH CREATES ENOUGH ROOM FOR WOONERF STREETS TO DIVERT TRAFFIC WHEN NEEDED. THESE WOONERF STREET ALONG WITH PUBLIC GREEN SPACES PLAY A VITAL ROLE IN ENHANCING USER EXPERIENCE.

4 MASSING AND ZONING - SITE RESPONSES

4 MASSING AND ZONING - SITE RESPONSES

STREET CONNECTIONS
VEHICULAR CIRCULATION AND WOONERF STREETS

THE WOONERF STREET ALONG THE SITE ACTS AS A ONE WAY STREET, DIVERTING TRAFFIC CONGESTION AWAY FROM CREMORNE STREET BECAUSE OF THE PROJECT. THIS STREET WILL DIRECT TRAFFIC CAUSED BY THE BUILDING TOWARDS DOVE STREET. IT ALSO BRINGS EASY ACCESS FOR THE UNDERGROUND PARKING SPACES.

4 MASSING AND ZONING - SITE RESPONSES

4 MASSING AND ZONING - SITE RESPONSES

STREET CONNECTIONS
SERVICE ROUTES

ON WEEKDAYS AFTER MIDNIGHT THIS STREET COULD BE CLOSED OFF AND GIVE ACCESS PURELY TOWARDS SERVICE VEHICLES. ON WEEKENDS THE STREET WOULD ACT AS NORMAL IN THE NIGHT TIME. HOWEVER, AFTER 4 AM, THE STREET WOULD CLOSE UP FOR SERVICE VEHICLES.

THE ACCESS IS CONTROLLED BY AUTOMATED BOLLARDS AND HAZARD SIGNS.

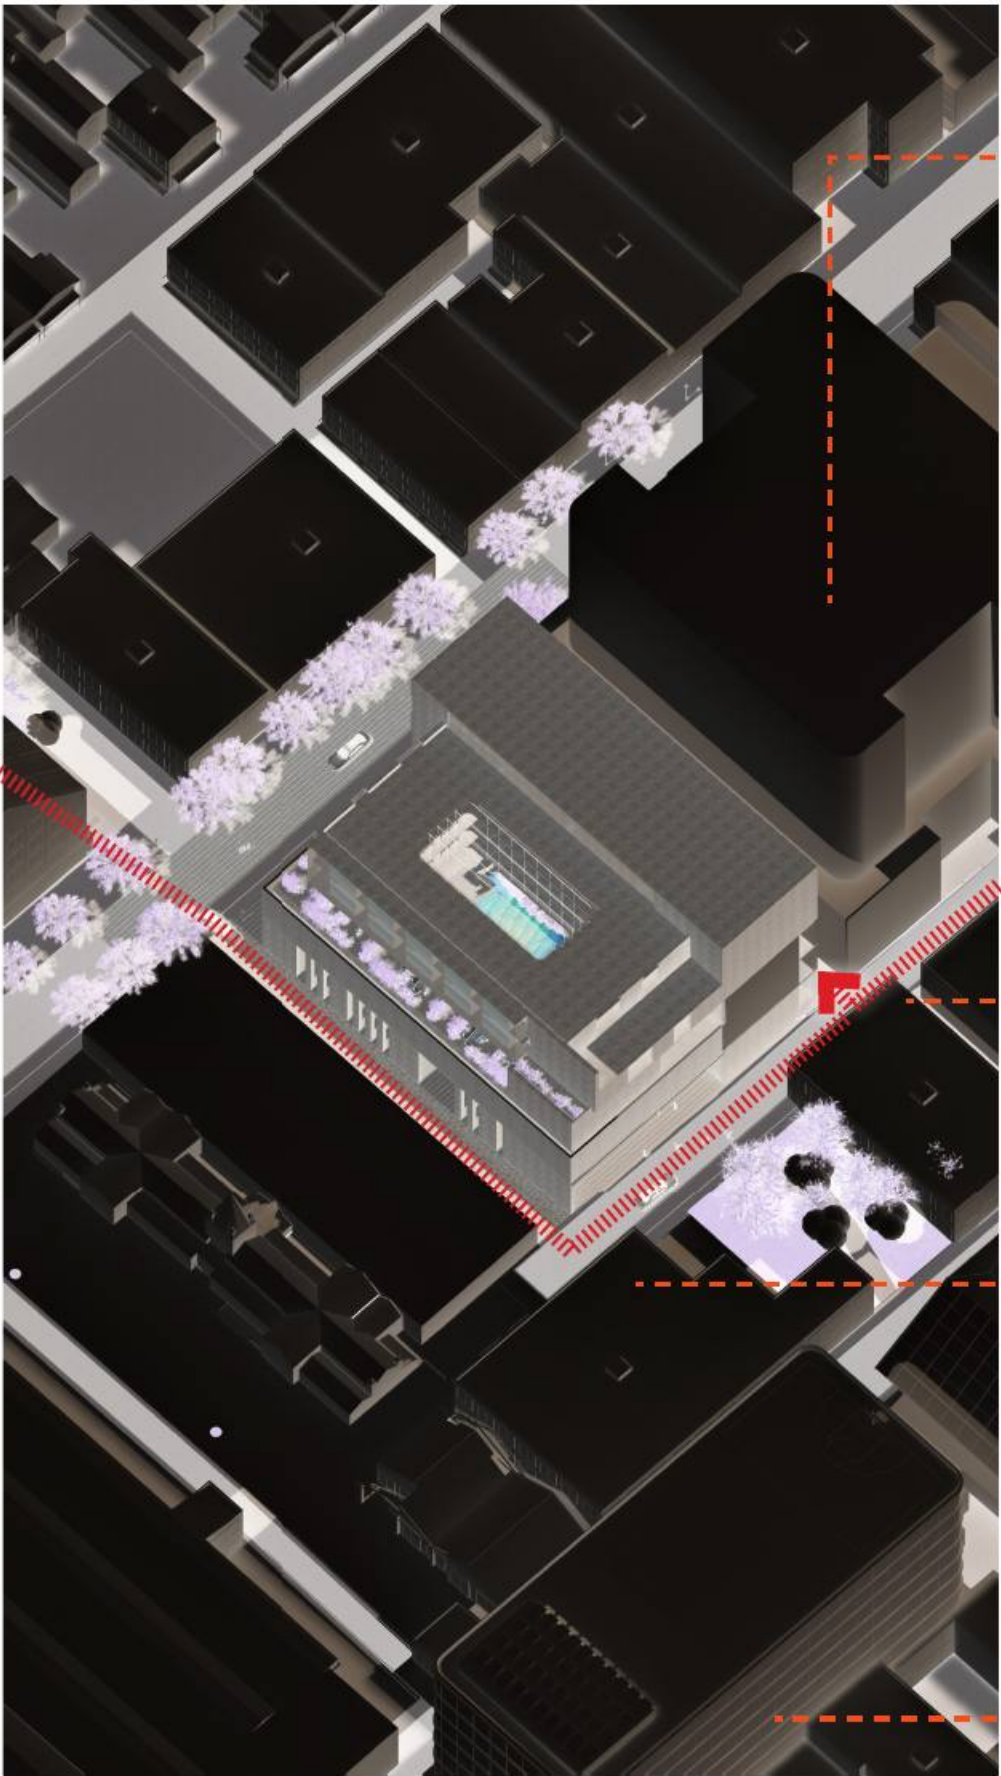

BUT, EMERGENCY VEHICLES HAVE 24 / 7 ACCESS TO THIS STREET.

THESE STRATEGIES ENSURE A SMOOTH VEHICULAR AND PEDESTRIAN TRAFFIC FLOW WITH THE RE WEAVE CREMORNE PROJECT.

4 MASSING AND ZONING - ITERATIVE DEVELOPMENT

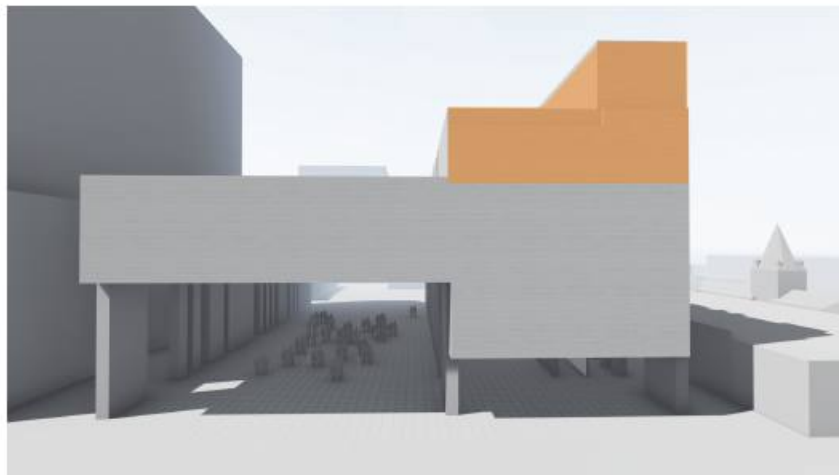

FORM DEVELOPMENT

INITIAL ITERATIONS DONE FOCUSING JUST ON THE CONTINUOUS GROUNDS.

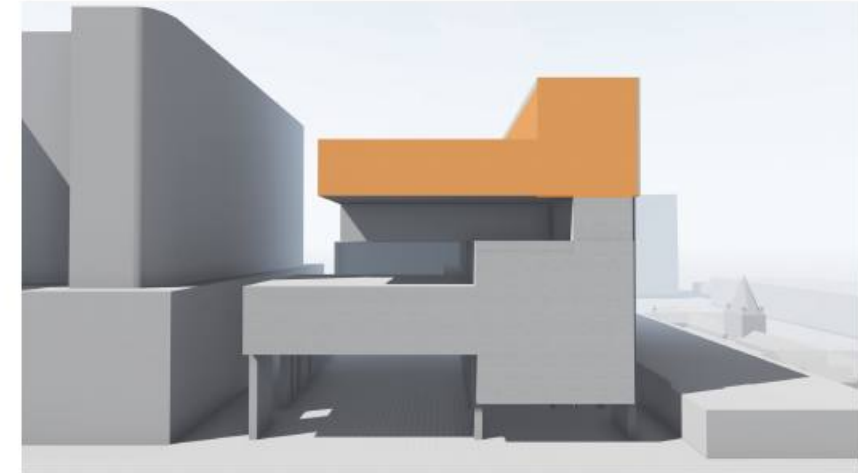

ITERATION 02 WAS DONE CONSIDERING SPATIAL NEEDS AND A SITE EXPANSION WAS CONSIDERED TO PREVENT VERTICAL DEVELOPMENT. THIS DECISION WAS SOON DISREGARDED AS A SITE EXPANSION COULD NOT ALIGN WITH THE PROJECT INTENTION.

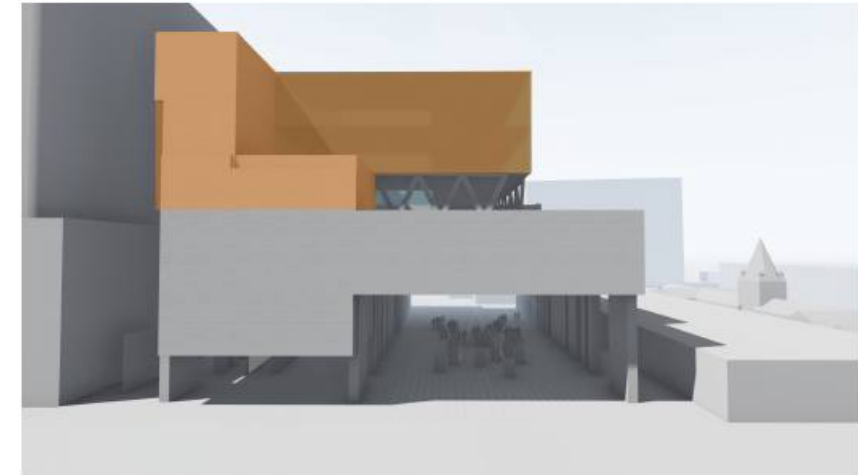

ITERATION 03 WAS DONE WITH AN INTENTION TO DESIGN VERTICALLY. THIS ITERATION GAVE RISE TO A MULTI STOREY DESIGN IDEA, WHICH COULD ESSENTIALLY BENEFIT THE CONTINUITY OF THE GROUND FLOOR.

4 MASSING AND ZONING - ITERATIVE DEVELOPMENT

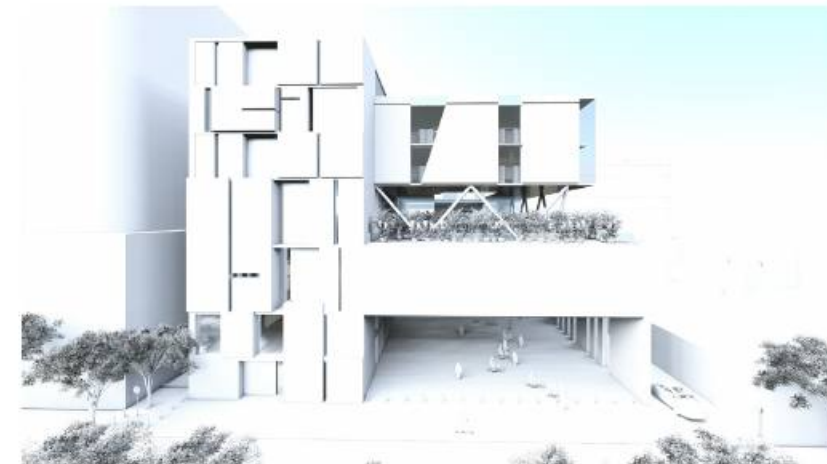

FORM DEVELOPMENT

ITERATION 04 SHOWS A MUCH BETTER SOLUTION FOR THE PROJECT PROGRAMME AND SPATIAL NEEDS. BUT THE VIEWS FROM ALL THE OPEN SPACES FACED THE EXISTING CREMORNE BUILDING.

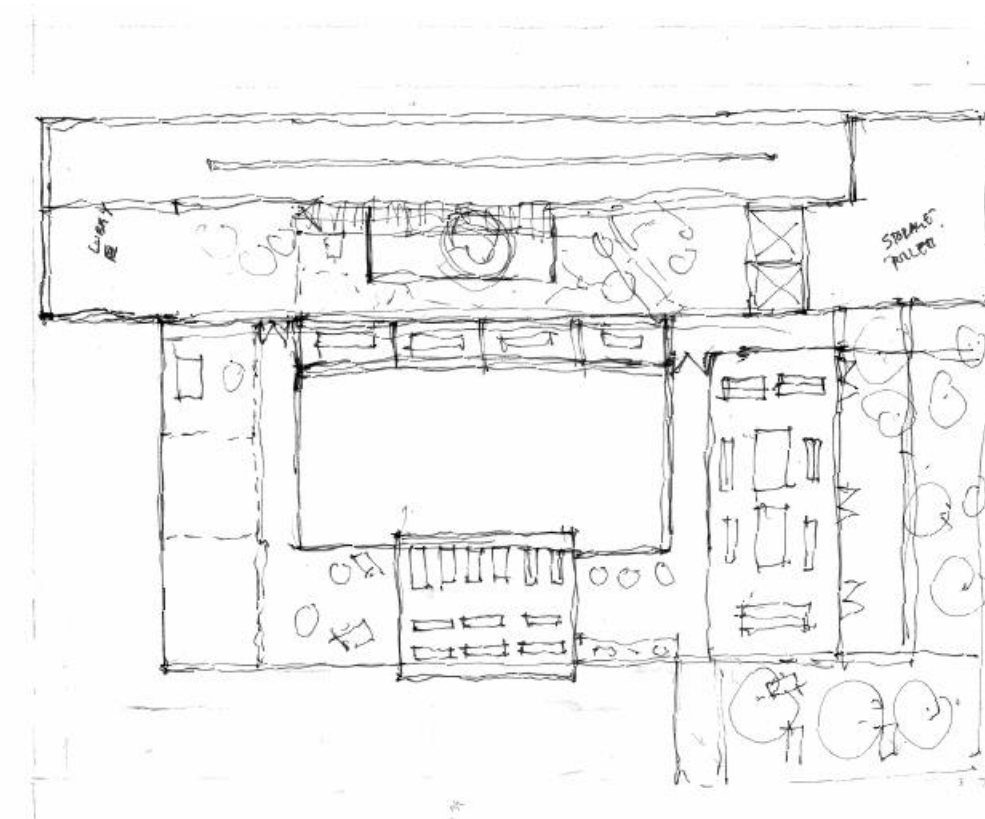

ITERATION 05 IS A MIRRORED FORM OF ITERATION 04 WITH VISUALLY AND ATMOSPHERICALLY BETTER OPEN SPACES. THE FLOATING GLASS BOX - THE WORKSHOP FACES KANGAN INSTITUTE CREATING A LANDMARK IN CREMORNE'S FASHION COMMUNITY.

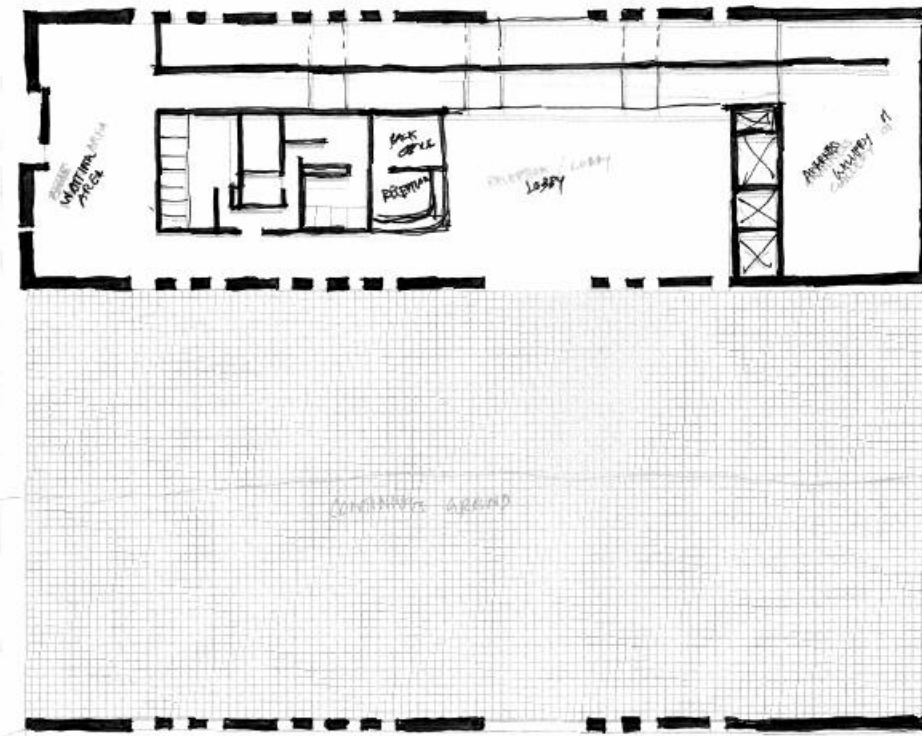

ITERATION 06 IS A MUCH DEVELOPED IDEA INSPIRED BY ITERATION 05 BUT DESIGNED WITH MUSIC AS A DESIGN METHOD - PLEASE REFER THE DESIGNING WITH MUSIC SECTION.

SPATIAL DEVELOPMENT - FLOOR LAYOUT EXPLORATION

SPATIAL DEVELOPMENT - FLOOR PLANS AND SECTION

4 MASSING AND ZONING - ITERATIVE DEVELOPMENT

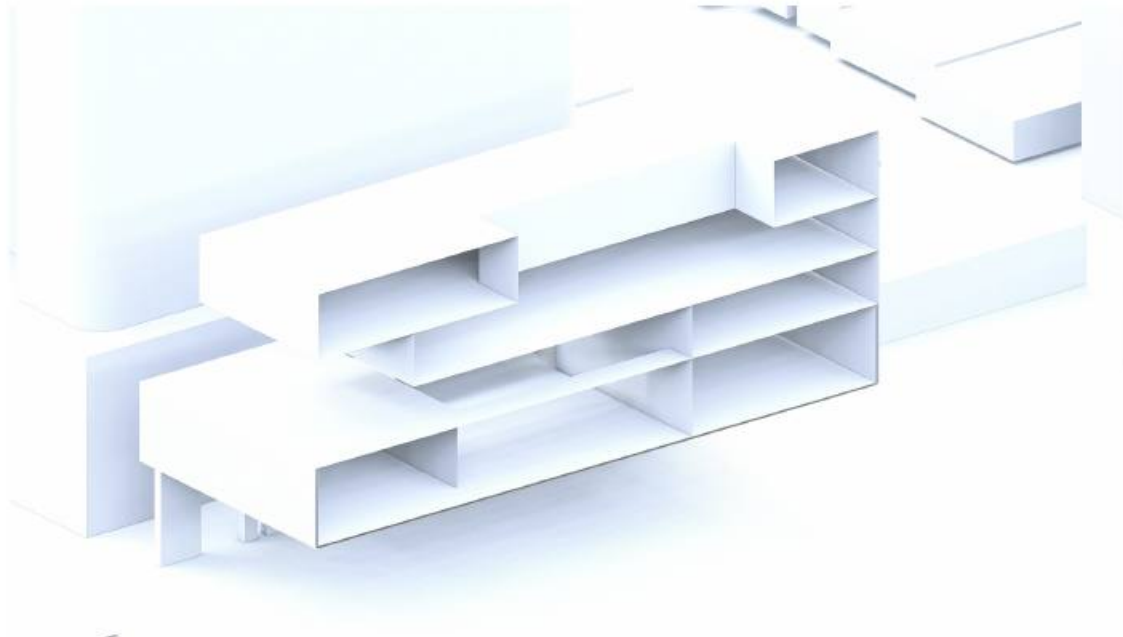

SPATIAL DEVELOPMENT - ISOMETRICS

ITERATION 01

ALTHOUGH ITERATION 01 WAS DONE WITH NO CONSIDERATION ON SPATIAL NEEDS, IT CREATED AN IMPORTANT IDEA OF AN ATRIUM THAT IS CONSISTENT THROUGH ALL THE ITERATIONS

ITERATION 02

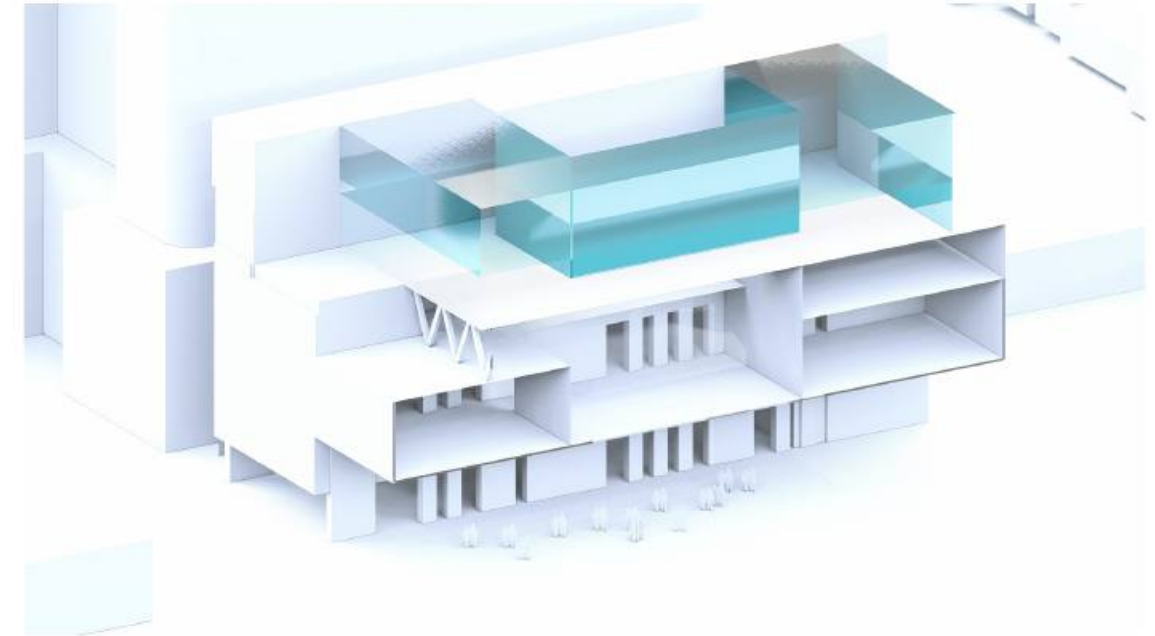

ALTHOUGH ITERATION 02 WAS DONE WITH A MORE SPATIAL SENSE. ALTHOUGH AS TANGIBLE SPACES THE ITERATION MAKES SENSE, AS FOR THE ATRIUM THE SPACES HAD NO HIERARCHICAL DISCIPLINE- THE SPACES CONTRADICTED WITH THE IDEA OF AN ATRIUM.

4 MASSING AND ZONING - ITERATIVE DEVELOPMENT

SPATIAL DEVELOPMENT - ISOMETRICS

ITERATION 03

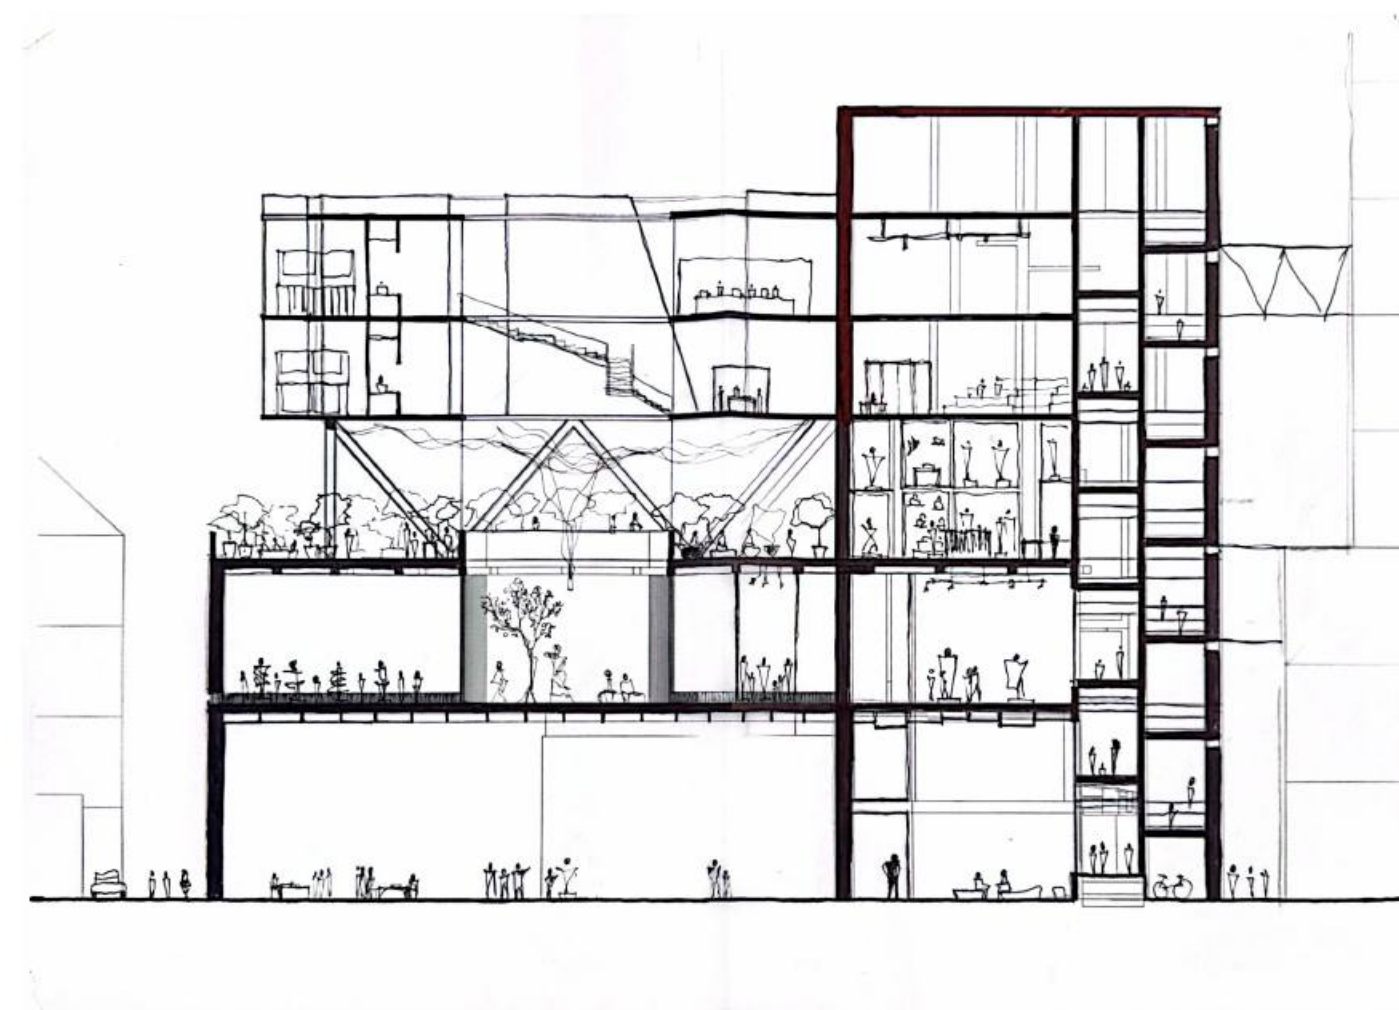

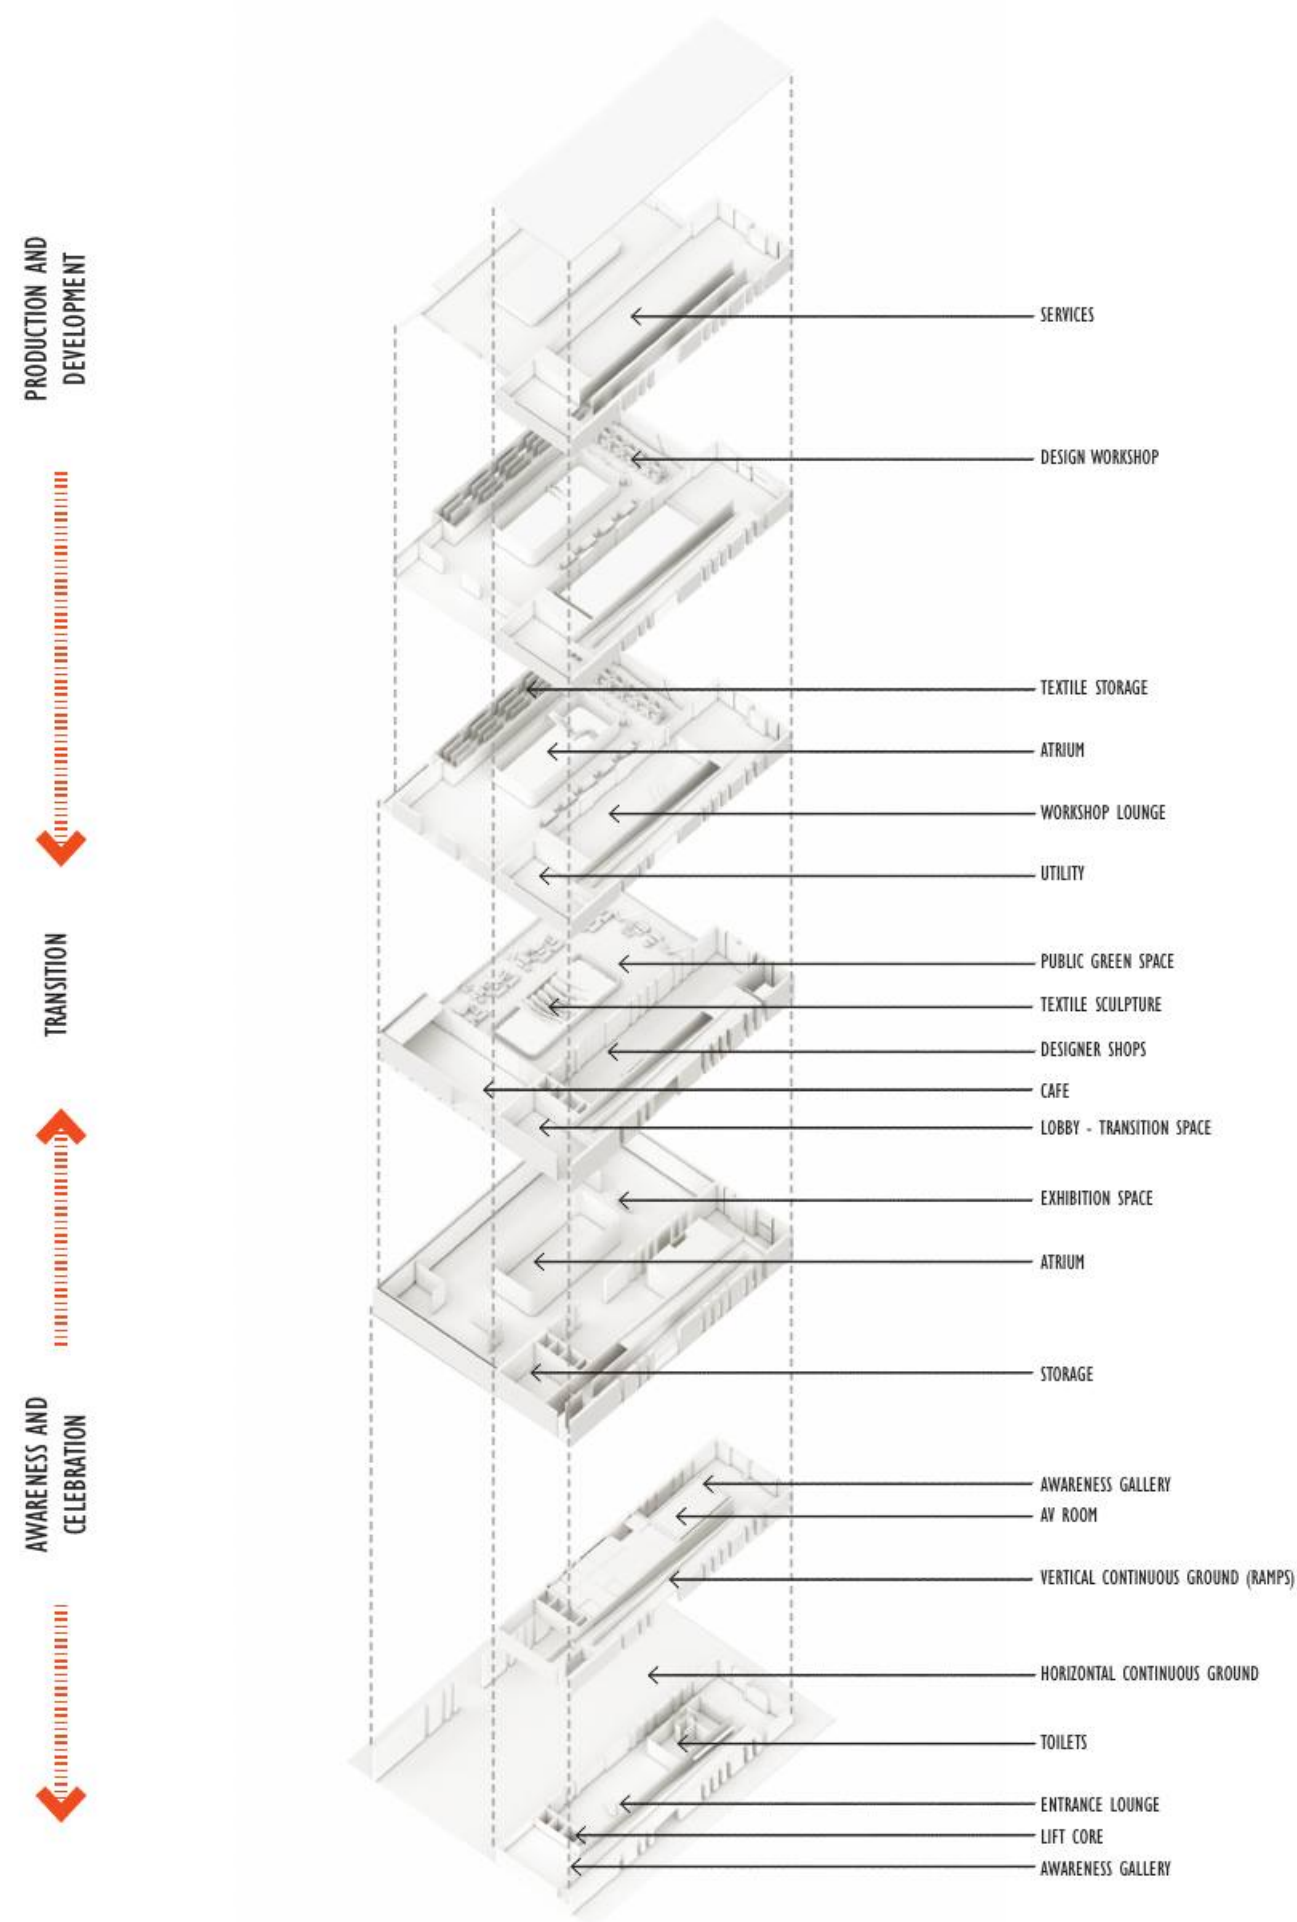

ITERATION 03 SHOWS A MUCH HIERARCHICALLY SOUND SPATIAL PROGRESSION. ITERATION 03 GAVE RISE TO ITERATION 04 WHICH WAS DONE USING MUSIC AS INSPIRATION.

ITERATION 04

4 MASSING AND ZONING - ITERATIVE DEVELOPMENT

SPATIAL DEVELOPMENT - VERTICAL ZONING

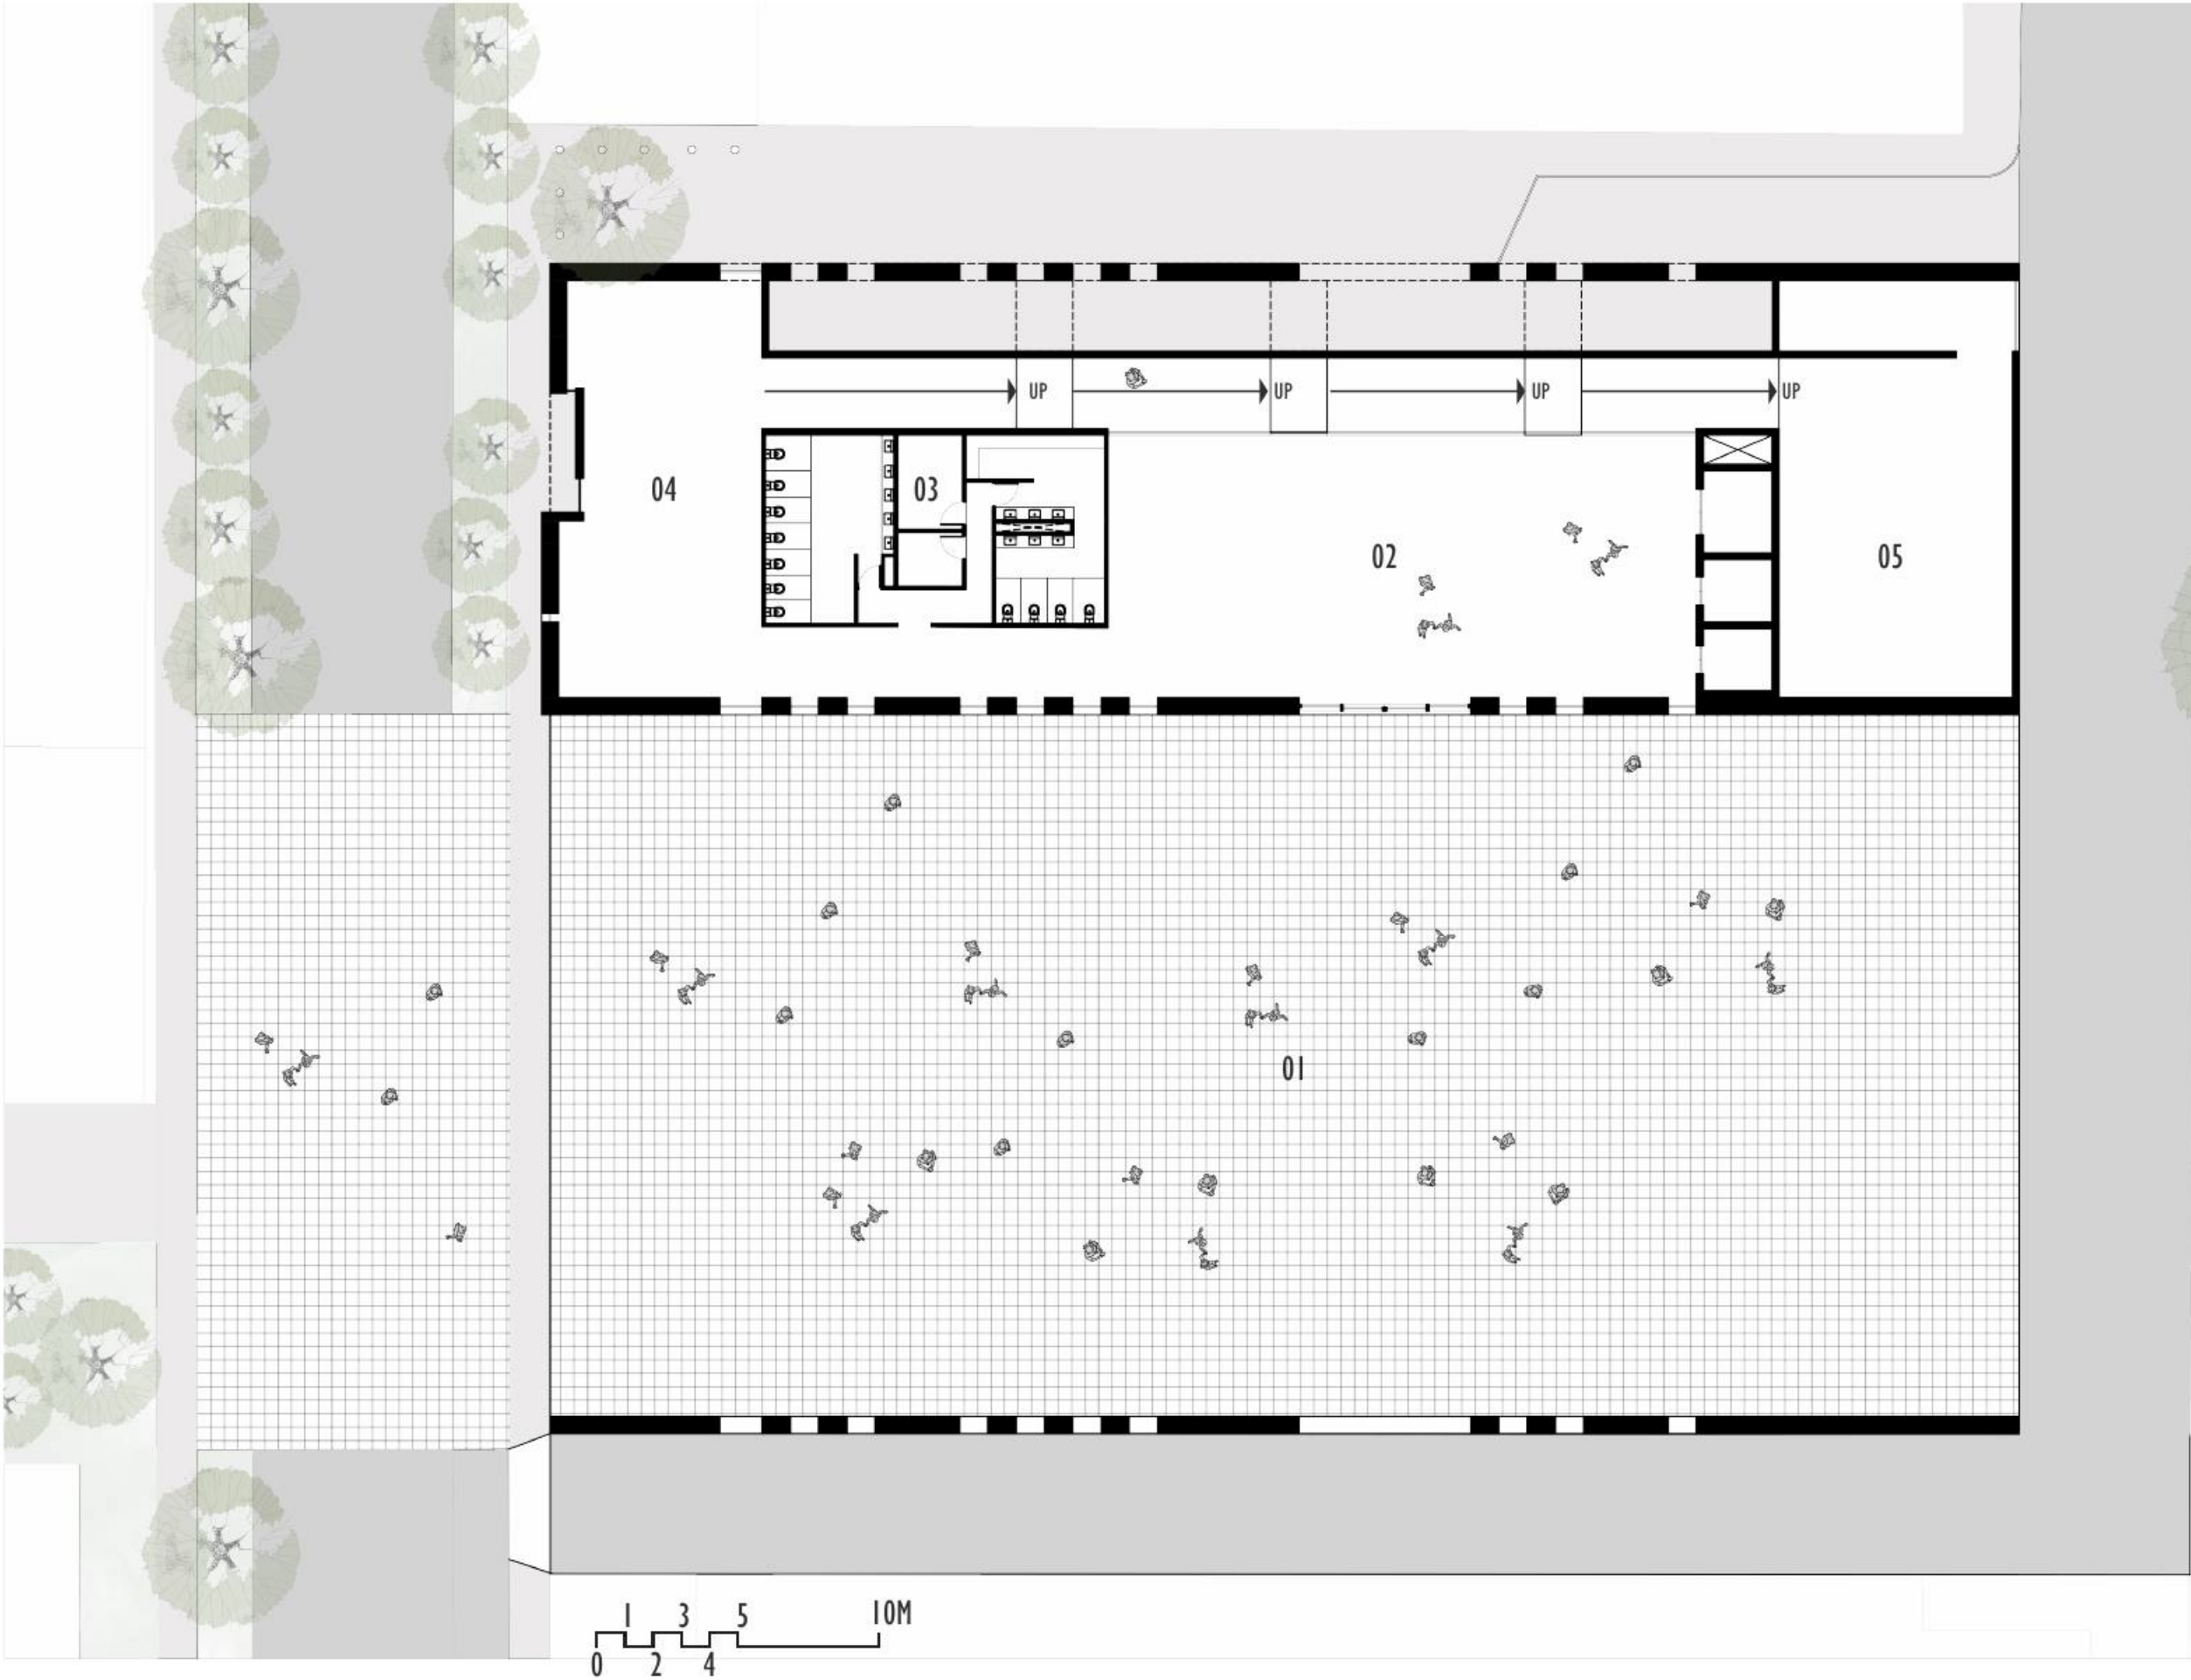

REFLECTION

THE ITERATIVE PROCESS HELPED REWEAVE CREMORNE GROW INTO A MUCH MORE THOUGHTFUL AND LAYERED DESIGN. EVERY TIME I TESTED SOMETHING, CHANGED A SPACE OR TRIED A DIFFERENT IDEA, I WAS ABLE TO SEE WHAT WAS WORKING, WHAT WAS NOT, AND WHERE THE DESIGN COULD IMPROVE. IT MADE ME CONSTANTLY QUESTION MY DECISIONS AND LOOK AT THE PROJECT FROM DIFFERENT ANGLES, WHICH HELPED THE BUILDING BECOME MORE RESOLVED AND CONNECTED OVER TIME.

6 TECTONIC DEVELOPMENT

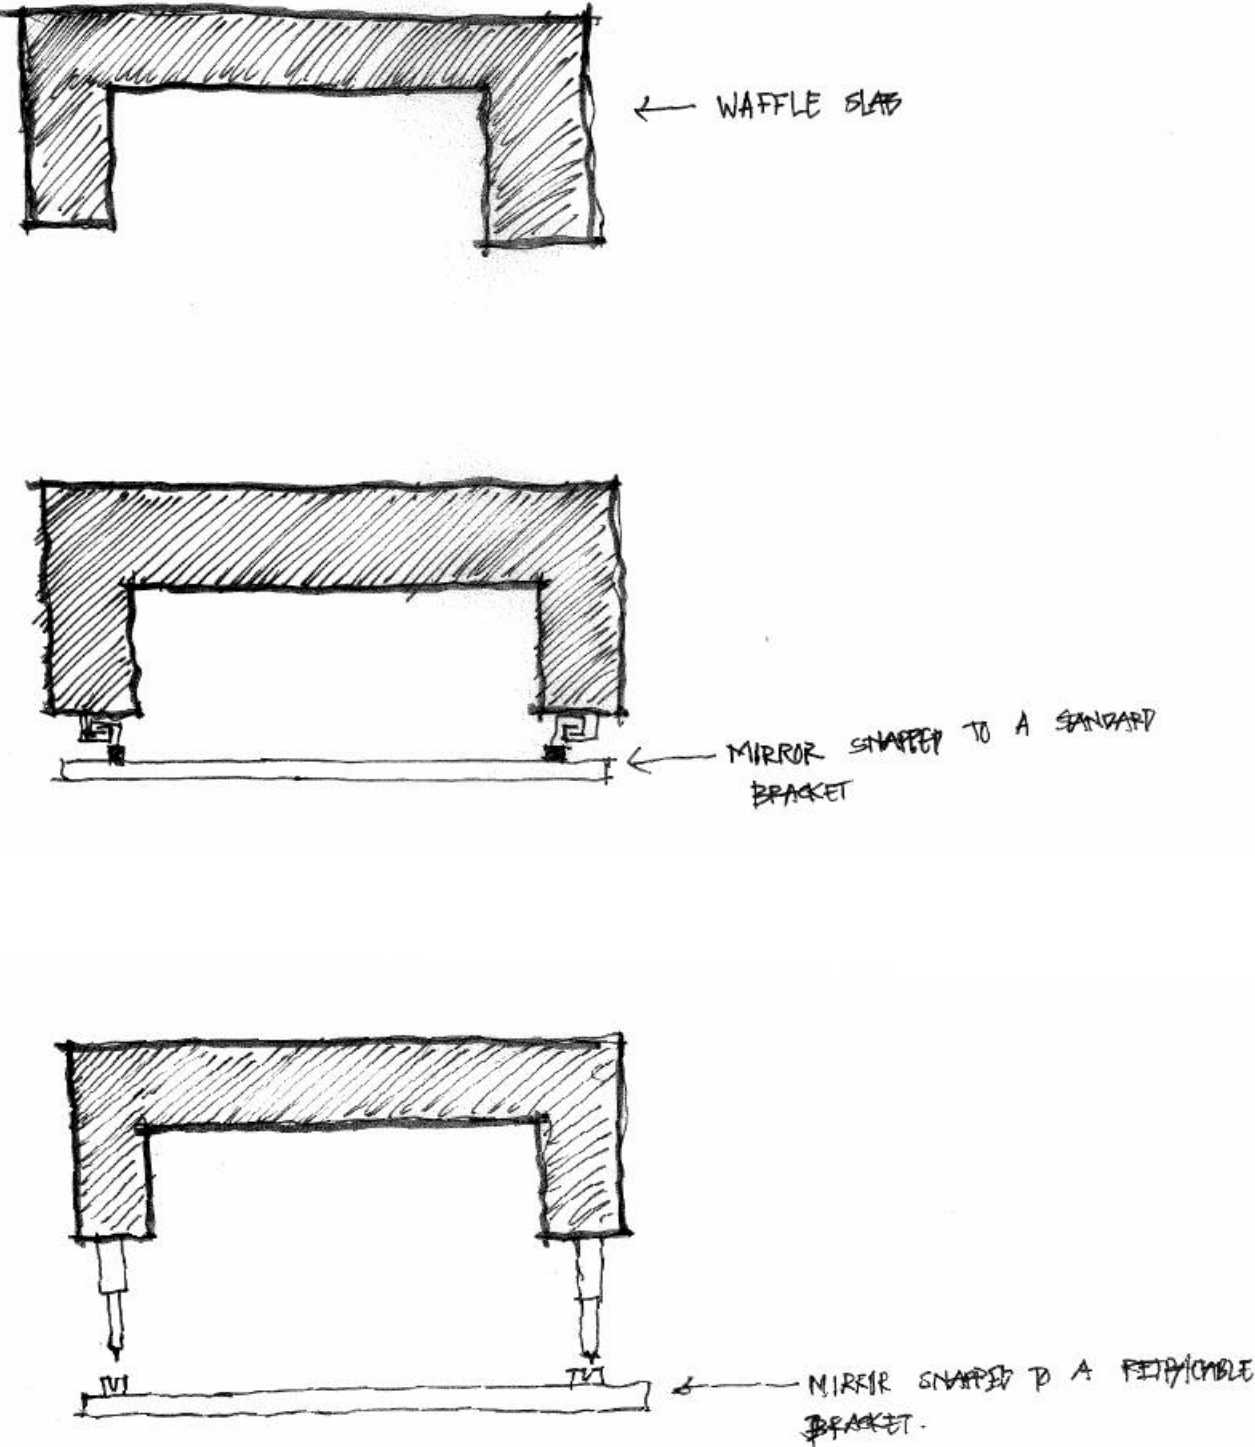

SLABS

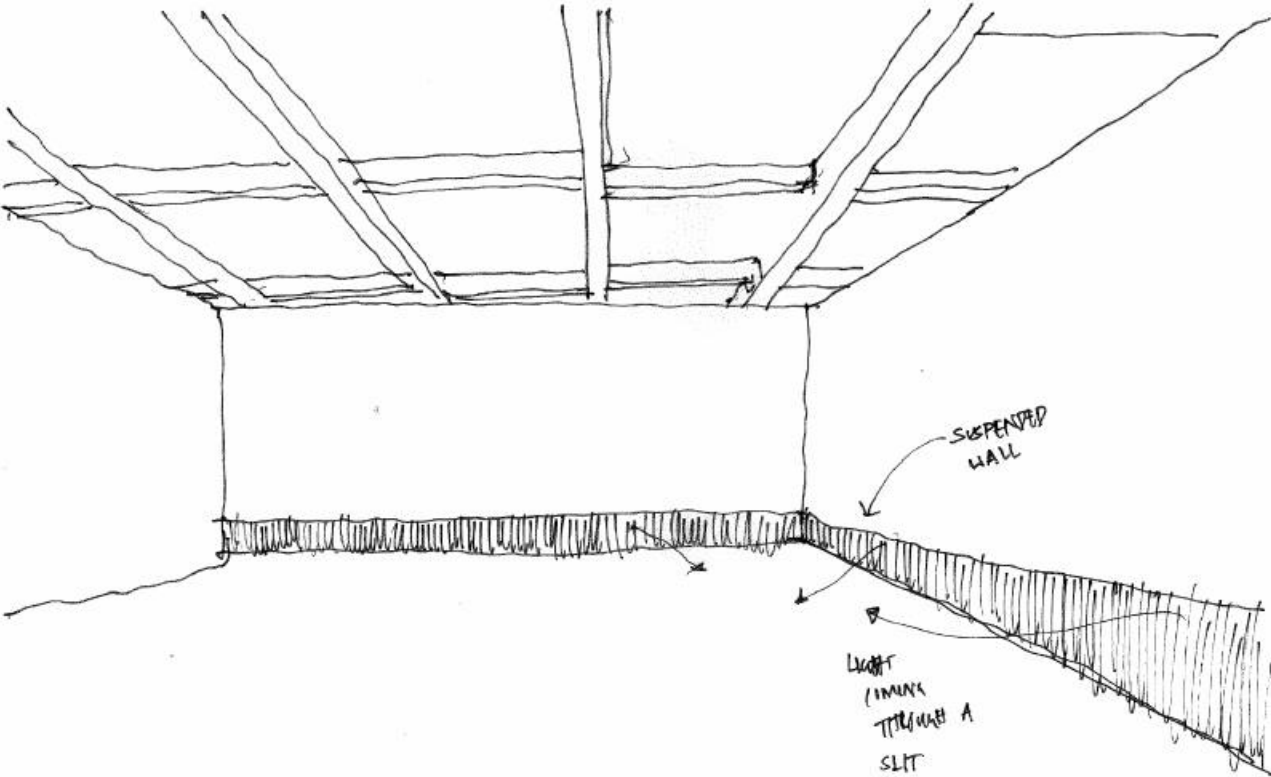

THE FLOOR SLABS OF THE PORTION OF THE DESIGN THAT HAS LARGER SPANS ARE PROPOSED TO BE WAFFLE SLABS. THESE WAFFLE SLABS HELPS TO GET LARGER SPANS WITHOUT THE NEED OF COLUMNS.

THESE WAFFLES COULD ALSO PROVIDE RAILS FOR THE TRANSFORMABLE PARTITIONS, LED WALLS AND CEILINGS,

6 TECTONIC DEVELOPMENT
SLABS

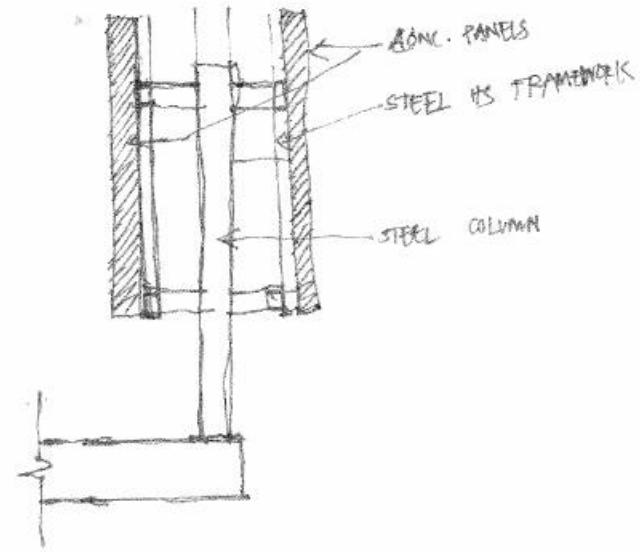

6 TECTONIC DEVELOPMENT
DOUBLE SKIN

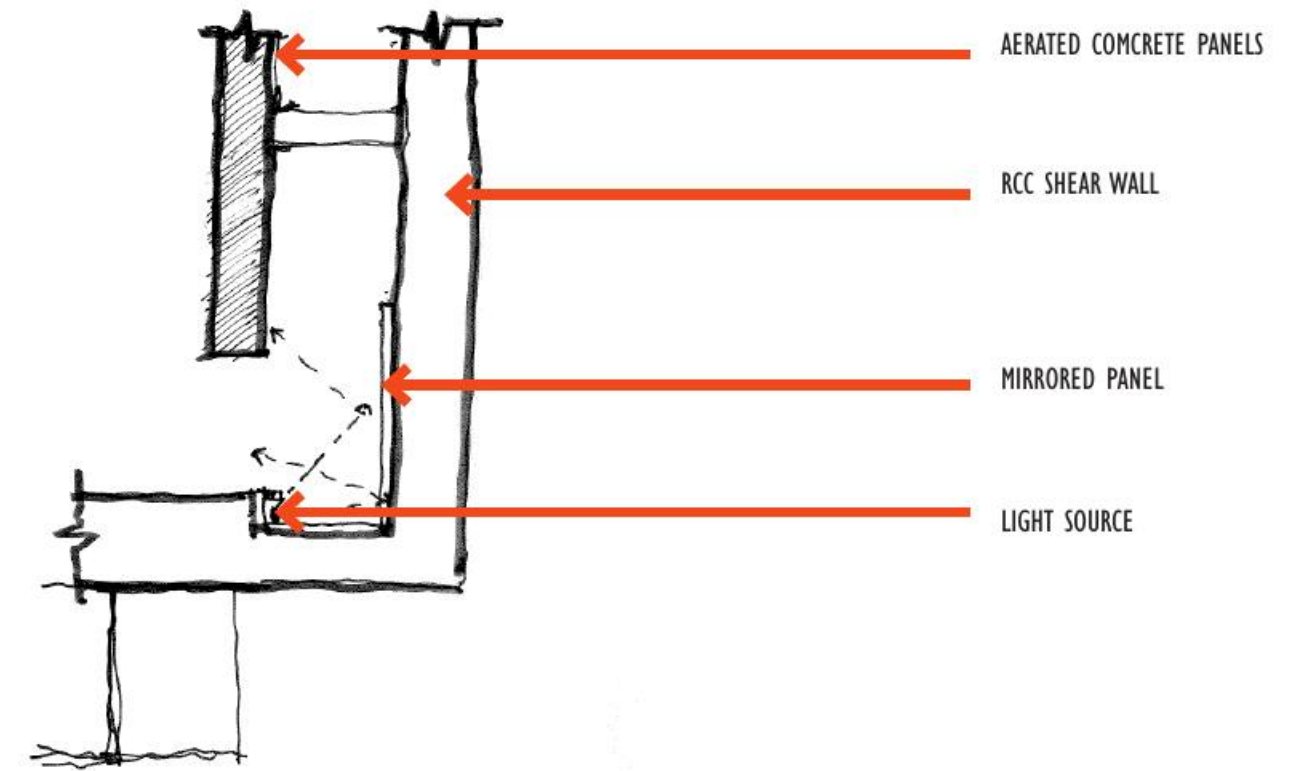

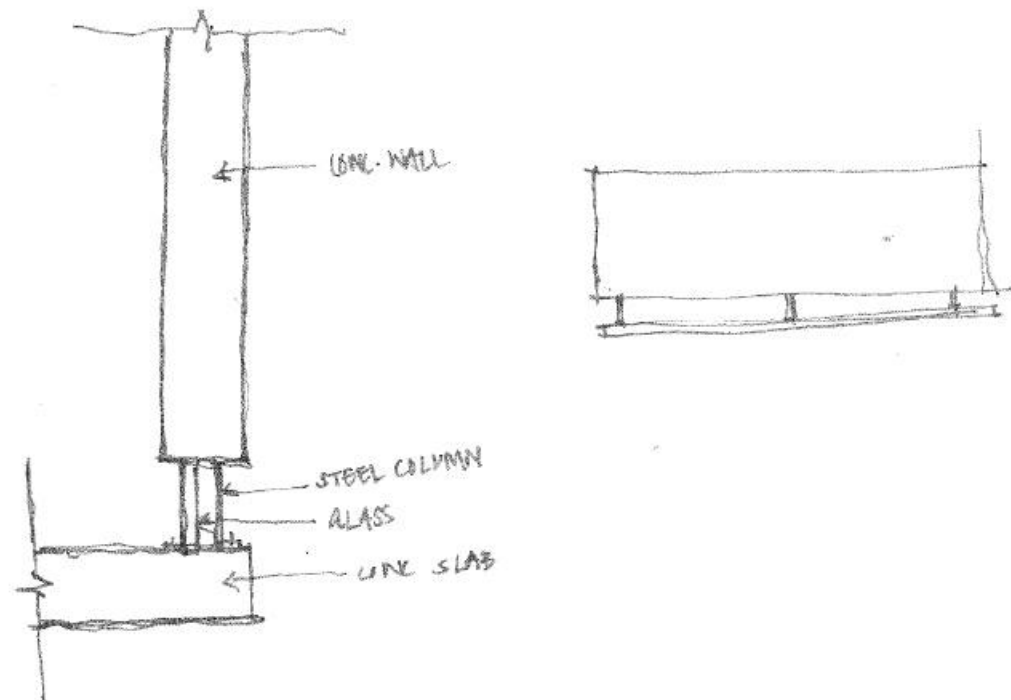

THE EXHIBITION SPACE REQUIRED SUBTLE LIGHTING AS FOR THE ATMOSPHERE I WAS THINKING. THE IDEA WAS TO HAVE A STRIP OF LIGHT ALONG THE FLOOR. THE FIRST ITERATION WAS TO HAVE NATURAL LIGHT COME THROUGH BY SUSPENDING THE WALLS BY CABLES. THIS WAS A STRUCTURALLY UNSOUND ARCHITECTURAL SOLUTION AS THE WEIGHT OF 4 MORE FLOORS HAD TO BE BARED BY THESE CABLES.

6 TECTONIC DEVELOPMENT

DOUBLE SKIN

AS A RESULT AN ITERATIVE PROCESS WAS FOLLOWED TO DEVELOP A SOLUTION FOR THIS ISSUE.

THIS IDEA OF HAVING A DOUBLE SKIN AND LETTING A LIGHT SOURCE REFLECT OFF A MIRRORED PANEL MADE AN EFFICIENT AND APPROACHABLE SOLUTION. IT ALSO MADE SURE THE BUILDING HAD BETTER INSULATION
