SENITHA DE SILVA

LINEN

LINEN IS A FLAX-BASED TEXTILE THAT IS PREDOMINANTLY USED FOR HOMEWARE APPLICATIONS. WHILE LINEN IS SIMILAR TO COTTON, IT IS MADE FROM FIBERS DERIVED FROM THE STEMS OF THE FLAX PLANT INSTEAD OF THE BOLLS THAT GROW AROUND COTTON SEEDS.

- CAN BE HARVESTED IN 100 DAYS
- REQUIRE RAIN AND MINIMUM IRRIGATION
- LOW WASTE IN PRODUCTION (WASTE PRODUCTS CAN BE USED FOR OTHER FLAX BASED BY-PRODUCTS).
- GROWS IN TEMPERATE CLIMATES (WESTERN & SOUTHERN EUROPE, CHINA AND THEROTICALLY IN VICTORIA AND TASMANIA)

PRODUCT	AFFORDABILITY	MARKET POSITION
POLYESTER	VERY AFFORDABLE	FAST FASHION
COTTON	AFFORDABLE	FAST FASHION
LINEN	EXPENSIVE	SUSTAINABLE / SLOW FASHION

FAST FASHION

What is Fast Fashion?

Fast fashion is cheap, low quality clothing that is produced rapidly by mass-market retailers.

Designed to keep up with seasonal international trends, it encourages customers to shop regularly for new looks. This means we buy more, and discard more.

Since the early 2000s, global production of textile fibre has almost doubled, from 58 million tonnes in 2000 to 116 million tonnes in 2022. If nothing changes, it is expected to keep increasing to 147 million tonnes in 2030.²¹ All this while approximately 30% of garments are never sold.

Environmental impacts of Fast Fashion

1. Water

The fashion industry is the second-largest consumer of water among industries, requiring about 700 gallons to produce one cotton shirt and 2,000 gallons of water to produce a pair of jeans.

1. Microplastics

brands use synthetic fibers like polyester, nylon and acrylic which take hundreds of years to biodegrade. A 2017 report from the International Union for Conservation of Nature (IUCN) estimated that 35% of all microplastics – tiny pieces of non-biodegradable plastic – found in the ocean come from the laundering of synthetic textiles like polyester.

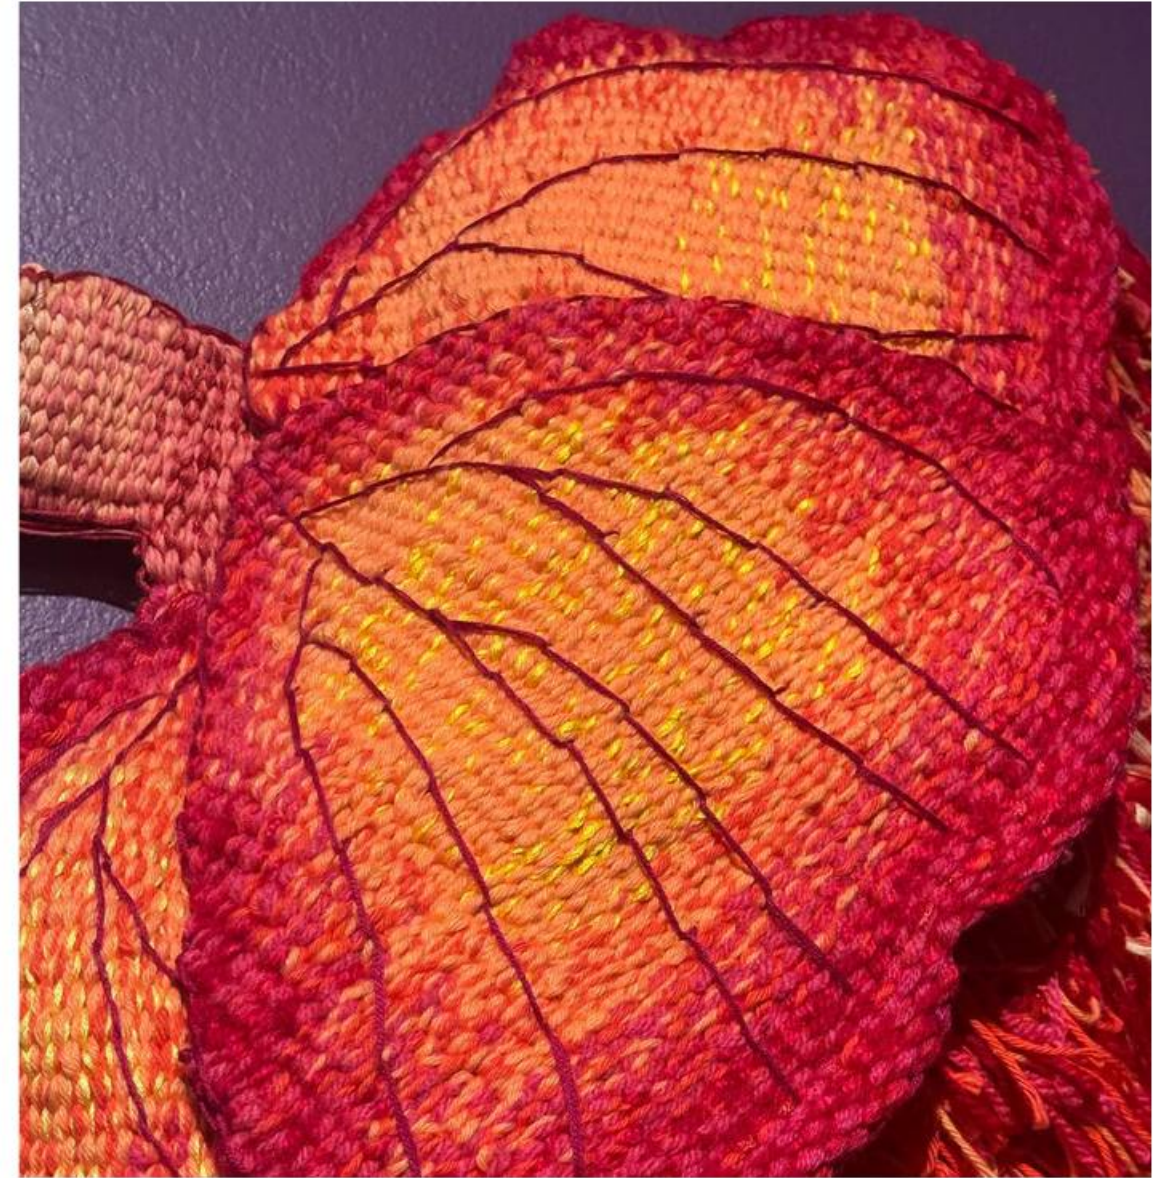

2. Energy

The process of making plastic fibers into textiles is an energy-intensive process that requires large amounts of petroleum and releases volatile particulate matter and acids like hydrogen chloride. Additionally, cotton, which is in a large amount of fast fashion products, is also not environmentally friendly to manufacture. Pesticides deemed necessary for the growth of cotton present health risks to farmers.

OBJECT BASED RESEARCH 01

SOFT ALCHEMY - EMA SHIN - *Intervoven : Fibre art and fashion - National Wool Museum - Geelong*

This art work soft alchemy, done by a melbourne based artist from Japan with Korean ancestry, Ema Shin depicts organs of a female body. Ovaries, Fallopian tubes, Womb : all organs that differentiate a male human body from a female. But looking further these organs are what gives **life** to this world. The use attention to detail makes, such as the arteries and veins and the contrast of colours give a sense of realism, almost graphical yet beautiful, as if the art work is supposed to give out a strong message. The over-extensions that hang down from the art work seems like the organs are getting, or were torn apart. With further research it appears Shin's intention was to give a visceral reminder of how women are too often unseen, underappreciated, erased or abused. By visualizing what is mostly observed in the medical industry in textile industry, this art work reminds that beauty is found within all parts of the body.

From this research, I understood the diversity of textiles and their uses other than being worn and how textile waste could be creatively and strategically used in my program.

PRODUCTIVE CITIES

Productive cities are urban environments designed to maximize economic output, innovation, and resource generation while enhancing quality of life and sustainability. They blend residential, working, and creative spaces to create resilient economies, often prioritizing localized manufacturing, circular economy practices, and high-value employment clusters.

ECONOMIC

Diverse Economy

Cities that shift from mono-industry (steel, coal) to mixed sectors : tech, finance, culture are resilient to economic shocks.

SOCIAL

Inclusive Growth

Productive cities invest in mobility, education and public space, connecting marginalized communities to economic opportunity.

ENVIRONMENTAL

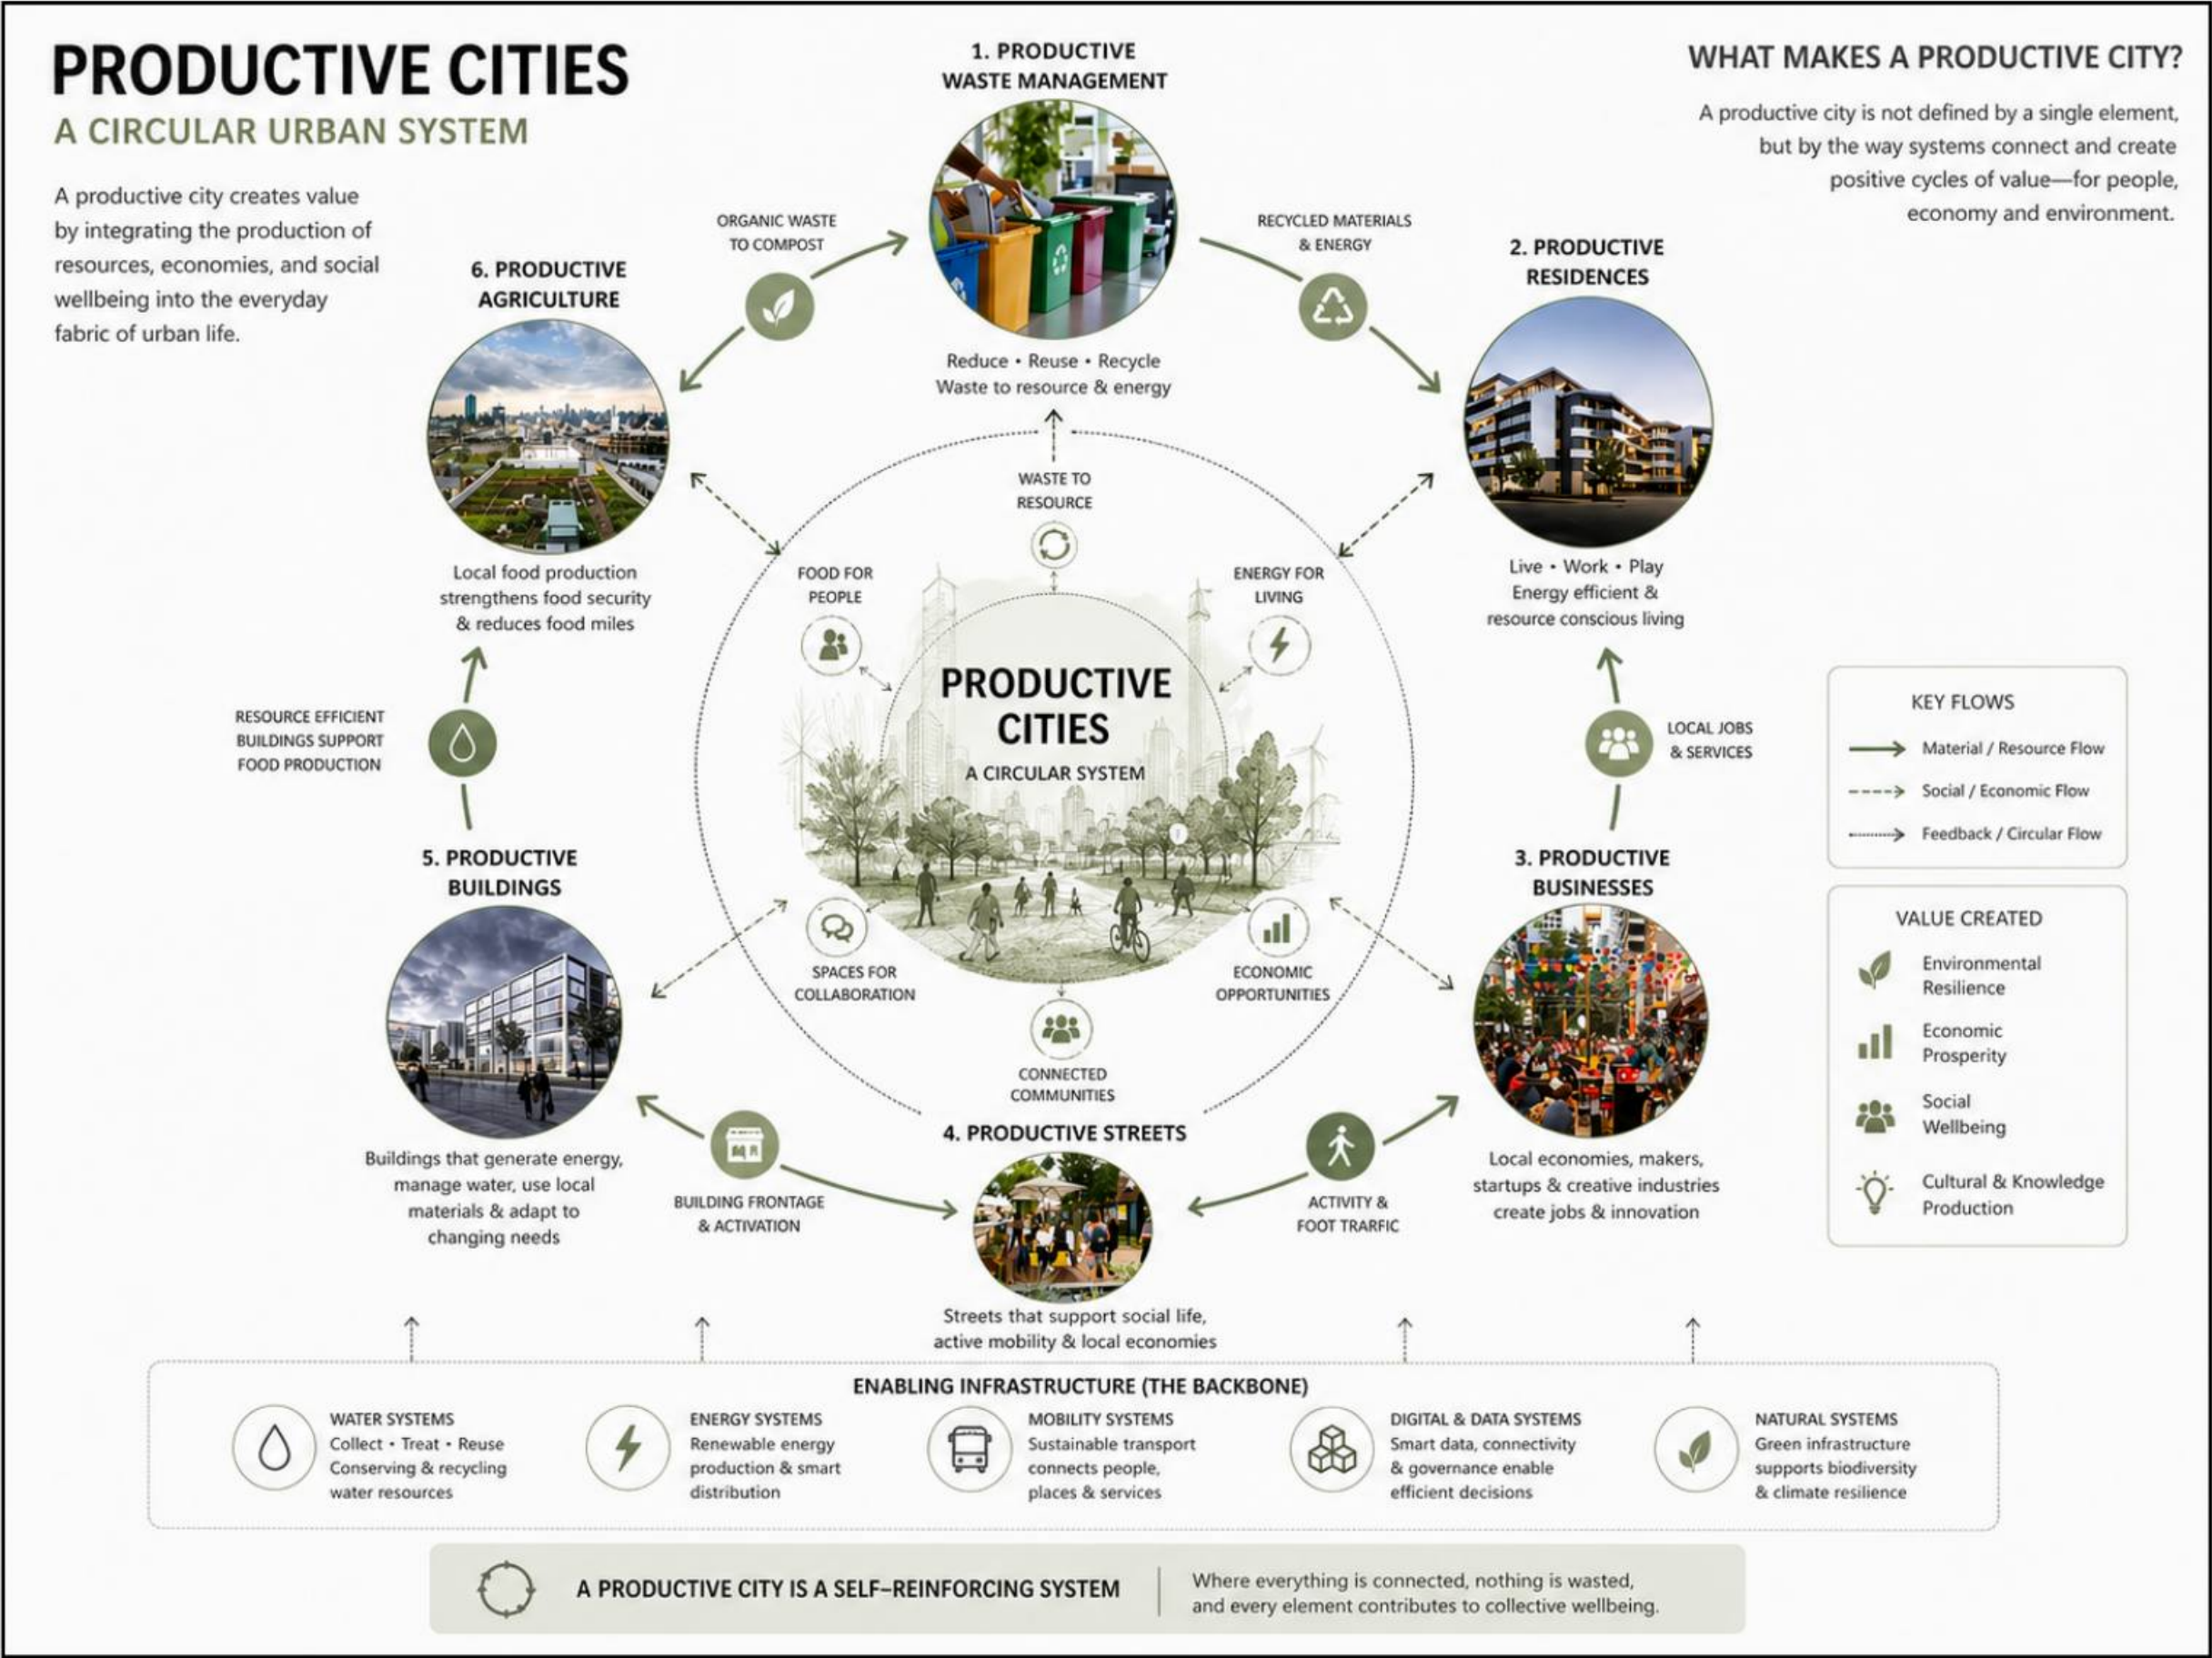

Green Infrastructure

Brownfield-to-park regeneration, transit investment, and green buildings reduce costs and attract investment simultaneously.

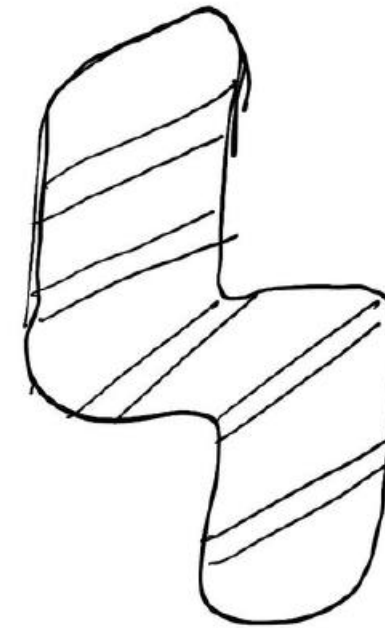

PRODUCTIVE CITIES

OBJECT BASED RESEARCH 02

The chair given to me by my friend was cesca chair by Marcel Breuer.

The chair I drew according to the description

From this research, I understood that there is a lot the visual research. I must understand to use other senses to think of wider dimensions in researching where i could hear and understand and describe something even when heard

DESIGN PROGRAMME

PUBLIC REALM

Retail shops to be included within the precinct to sell upcycled products from fashion waste designed by the local designers and commercially produced slow fashion produce designed by various local and international brands that work with the precinct.

Gallery spaces showcasing local artists and their work from textile waste - these spaces can also be rented out to the vast design community in Cremorne to showcase their work

Awareness programs towards general public on fast fashion and textile waste. This can happen along the exhibition and gallery spaces prompting people to look at textiles on another dimension and dispose responsibly.

Textile waste to be collected from proposed waste collection bins across cremorne and through the Upparel - a stakeholder of the project.

Exhibition spaces in the precinct showcasing how fashion waste could upcycled and repurposed through different methods including reusing and fashion based paints.

Public interactive greenspaces to be designed within the site and in strategic spaces across cremorne to increase public interaction. These spaces will have recreation spaces for the public.

Streets of cremorne to be strategically selected and redesigned to be productive. This accumulates people into cremorne and increases public interaction within the city.

DESIGN PROGRAMME

DESIGN REALM

These designers and designer brands could work with clients and investors to commercialize these sustainable textiles. Therefore the site will act as an incubation space influencing sustainable textile development through Cremorne making it a sustainable design hub.

Artists to have local artist exploring ways to upcycle textile waste using textiles and textile pigmented paints on arts and crafts. Hands on arts and craft programs towards the general public could also happen in this space.

Textile waste to be collected from proposed waste collection bins across cremorne and through the Up Apparel - a stakeholder of the project.

Retail shops to be included within the precinct to sell upcycled products from fashion waste designed by the local designers and commercially produced slow fashion produce designed by various local and international brands that work with the precinct.

The precinct would have design studios for fashion designers to use in upcycling textile waste and in slow fashion. These could also act as an extension from Kengen Institute for design students to learn and get industry experience. Moreover these spaces can also be rented out for the designer community in cremorne to use.

Designer brands and local fashion designers to work together towards upcycling textile waste and slow fashion to have fashion pageants to promote this precinct and its fashion products to the world.

An isometric illustration of a group of people sitting around a large, light blue circular table. They appear to be in a meeting or collaborative work session. A presentation screen is visible in the background.

An isometric illustration of a retail shop interior. It features clothing racks, a display counter, and a person standing behind the counter, representing a retail space for upcycled products.

An isometric illustration of an artist standing and painting on a large canvas mounted on an easel. The artist is wearing a yellow shirt and brown pants.

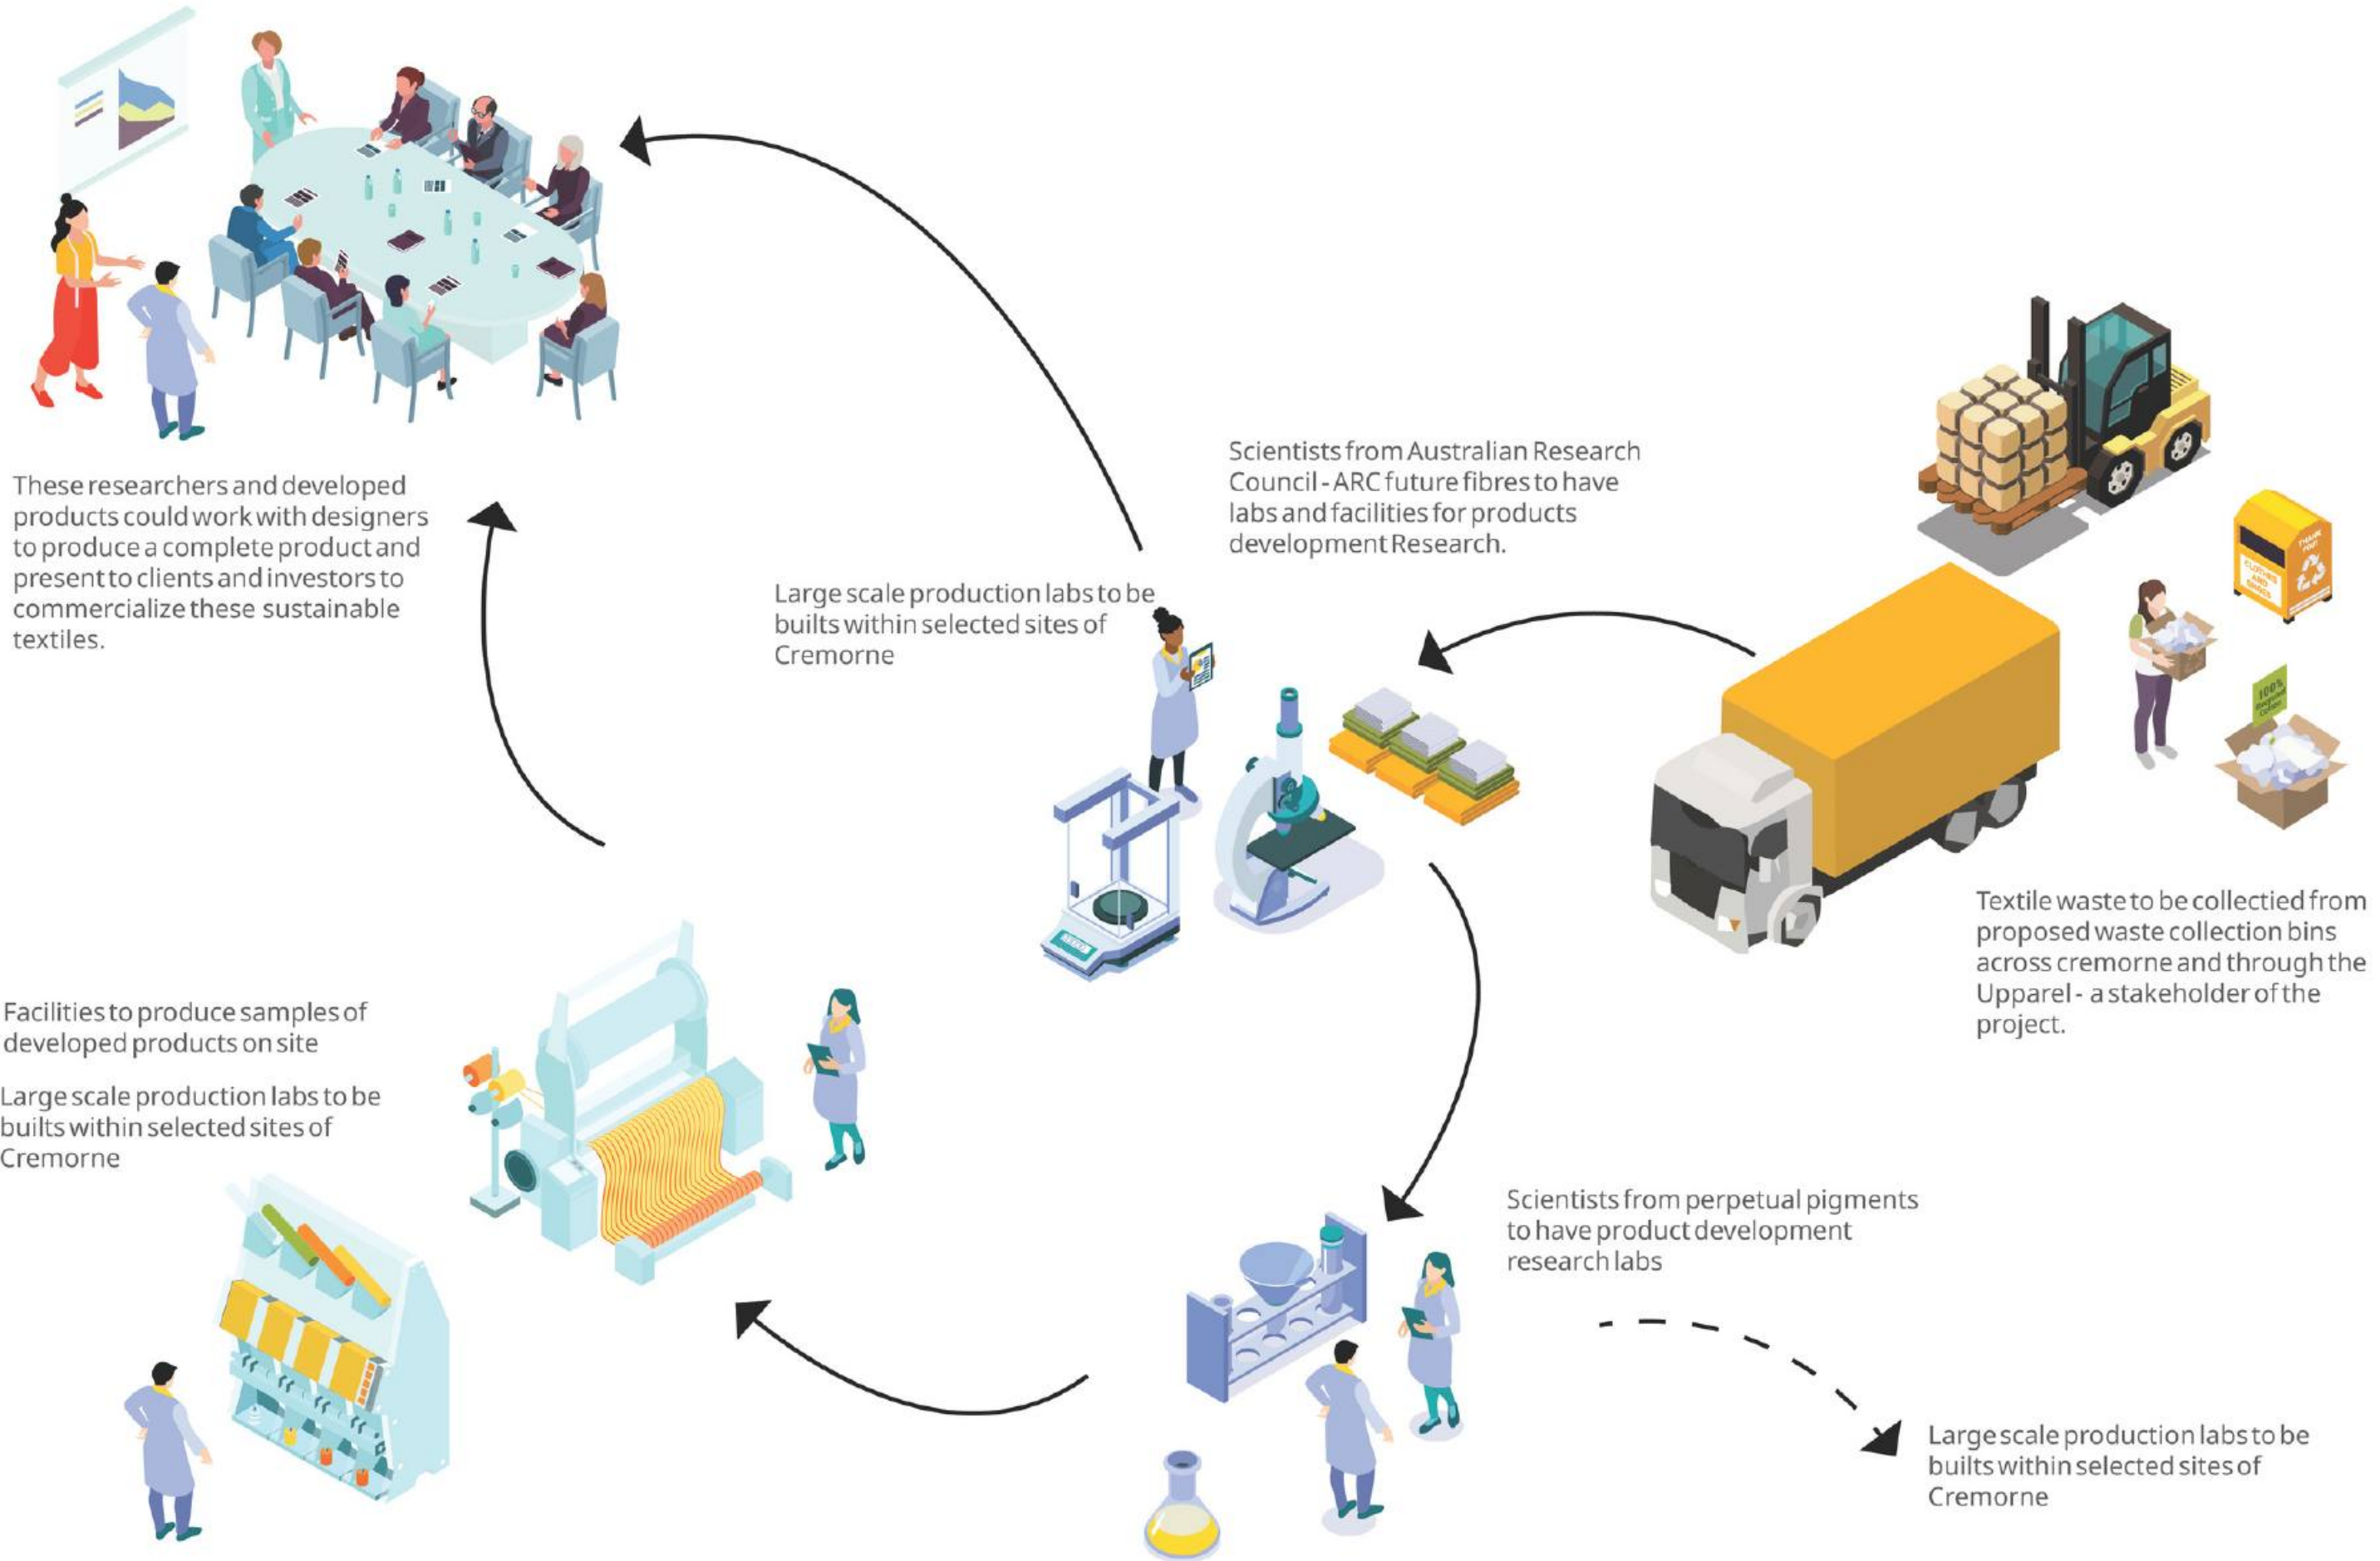

An isometric illustration showing a yellow truck, a forklift with a pallet of boxes, and a person standing next to a recycling bin. This represents the collection and transport of textile waste.

An isometric illustration of a person in a red dress working on a mannequin, representing a design studio or workshop for upcycling textile waste.

An isometric illustration of a fashion show runway. Models are walking on the red carpeted runway, and an audience is seated in the foreground. This represents a fashion pageant or show.

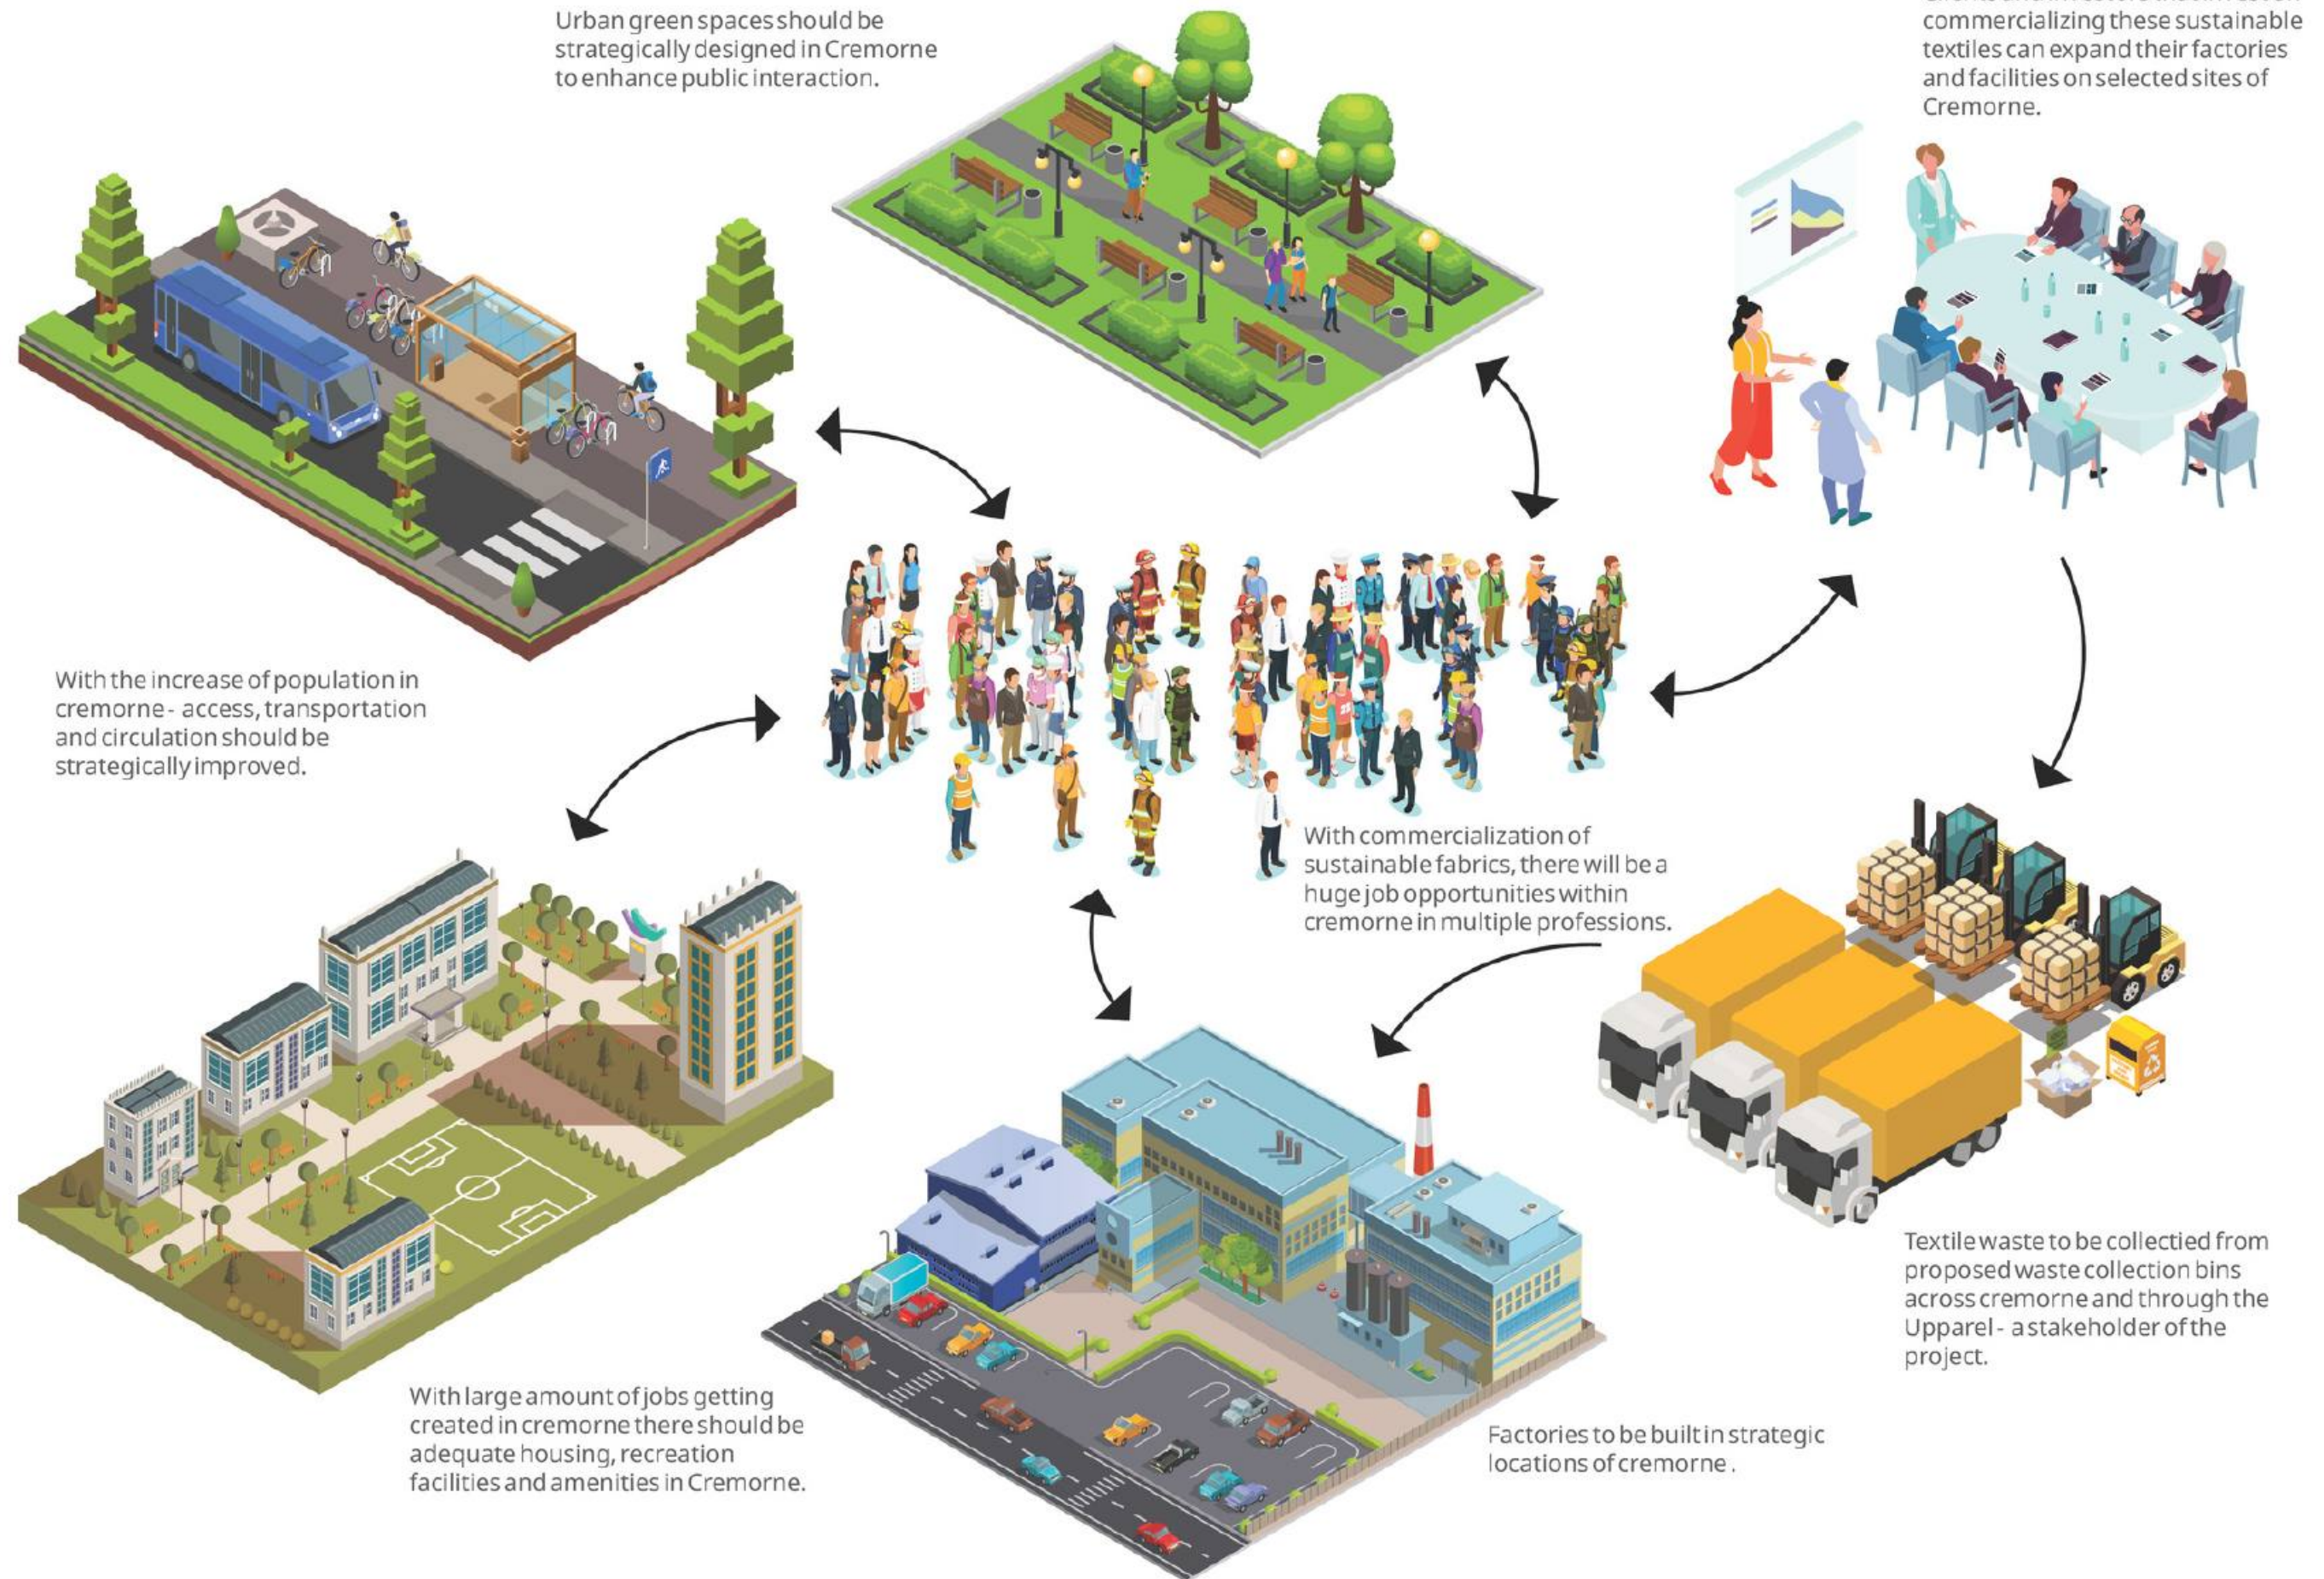

DESIGN PROGRAMME

DESIGN PROGRAMME

OFF SITE DEVELOPMENTS

DESIGN PROGRAMME

SUMMARY

With commercialization of sustainable fabrics, there will be a huge job opportunities within cremorne in multiple

Factories to be built in strategic locations of cremorne.

With large amount of jobs getting created in cremorne there should be adequate housing, recreation facilities and

Urban greenspaces should be strategically designed in Cremorne to enhance public interaction.

With the increase of population in cremorne - access, transportation and circulation should be strategically improved.

Scientists from Australian Research Council - ARC future fibres to have labs and facilities to break down products development Research labs.

Scientists from perpetual pigments to have product development research labs

Textile waste to be collected from proposed waste collection bins across cremorne and through the Uparel - a

Streets of cremorne to be strategically selected and redesigned to be productive. This accumulates people into cremorne and increases public interaction within the city.

The precinct would have design studios for fashion designer to use in upcycling textile waste and in slow fashion. These could also act as an extension from Kengen

Designer brands and local fashion designers to work together towards upcycling textile waste and slow fashion to have fashion pageants to promote this precinct and its

Artleirs to have local artist exploring ways to upcycle textile waste using textiles and textile pigmented paints on arts and crafts. Handson arts and craft

Retail shops to be included within the precinct to sell upcycled products from fashion waste designed by the local designers and commercially produced slow fashion produce designed by various local and

DESIGN PROGRAMME

PROJECT PARTNERS

UPPAREL

UPPAREL is an Australian company focused on reducing textile waste by recycling and repurposing old clothing. Founded with a mission to create a circular fashion economy, UPPAREL collects unwanted garments and transforms them into new products such as yarn, insulation, and furniture filling. By partnering with businesses and individuals, the company diverts tonnes of textiles from landfill each year, promoting sustainable practices and environmental responsibility within the fashion industry.

UPPAREL partners with major brands, retailers, and community organisations to recycle textiles and reduce waste. By working with companies like The North Face, Cotton On, and Bunnings, along with charities and councils, UPPAREL helps divert clothing from landfill and supports a circular fashion system.

KANGAN INSTITUTE

Kangan Institute Cremorne campus partners closely with industry, universities, and Melbourne's fashion precinct to support hands-on learning and career pathways. Its fashion design students gain practical experience through internships, runway showcases like Melbourne Fashion Week, and access to the Textile & Fashion Hub, enabling them to develop industry-ready skills and real-world connections.

ARC - FUTURE FIBRES

ARC Research Hub for Future Fibres collaborates with universities, industry partners, and government bodies to advance sustainable fibre and textile innovation. Through partnerships with organisations like Deakin University, CSIRO, and multiple global industry partners, the hub connects research with real-world applications, supporting the development and commercialisation of next-generation sustainable materials.

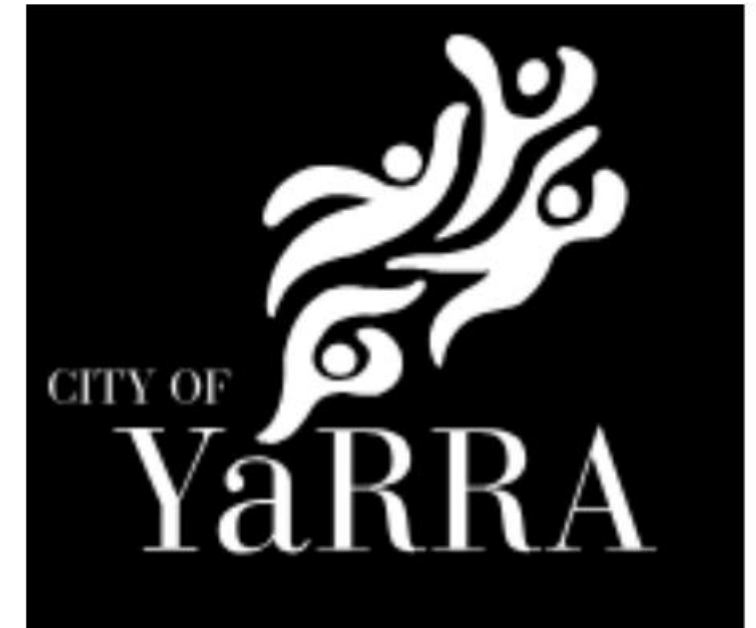

ARC - FUTURE FIBRES

Developed by Deakin University's Institute for Frontier Materials (IFM) in Australia, the project addresses the environmental challenge of clothing waste by physically grinding discarded natural-fiber textiles into fine micro-pigments. This "circular economy" approach ensures that 1 kg of textile waste can produce roughly 1 kg of usable pigment, significantly reducing the energy and resources typically required for paint production.

CREMORNE PL

OBJECT BASED RESEARCH 03

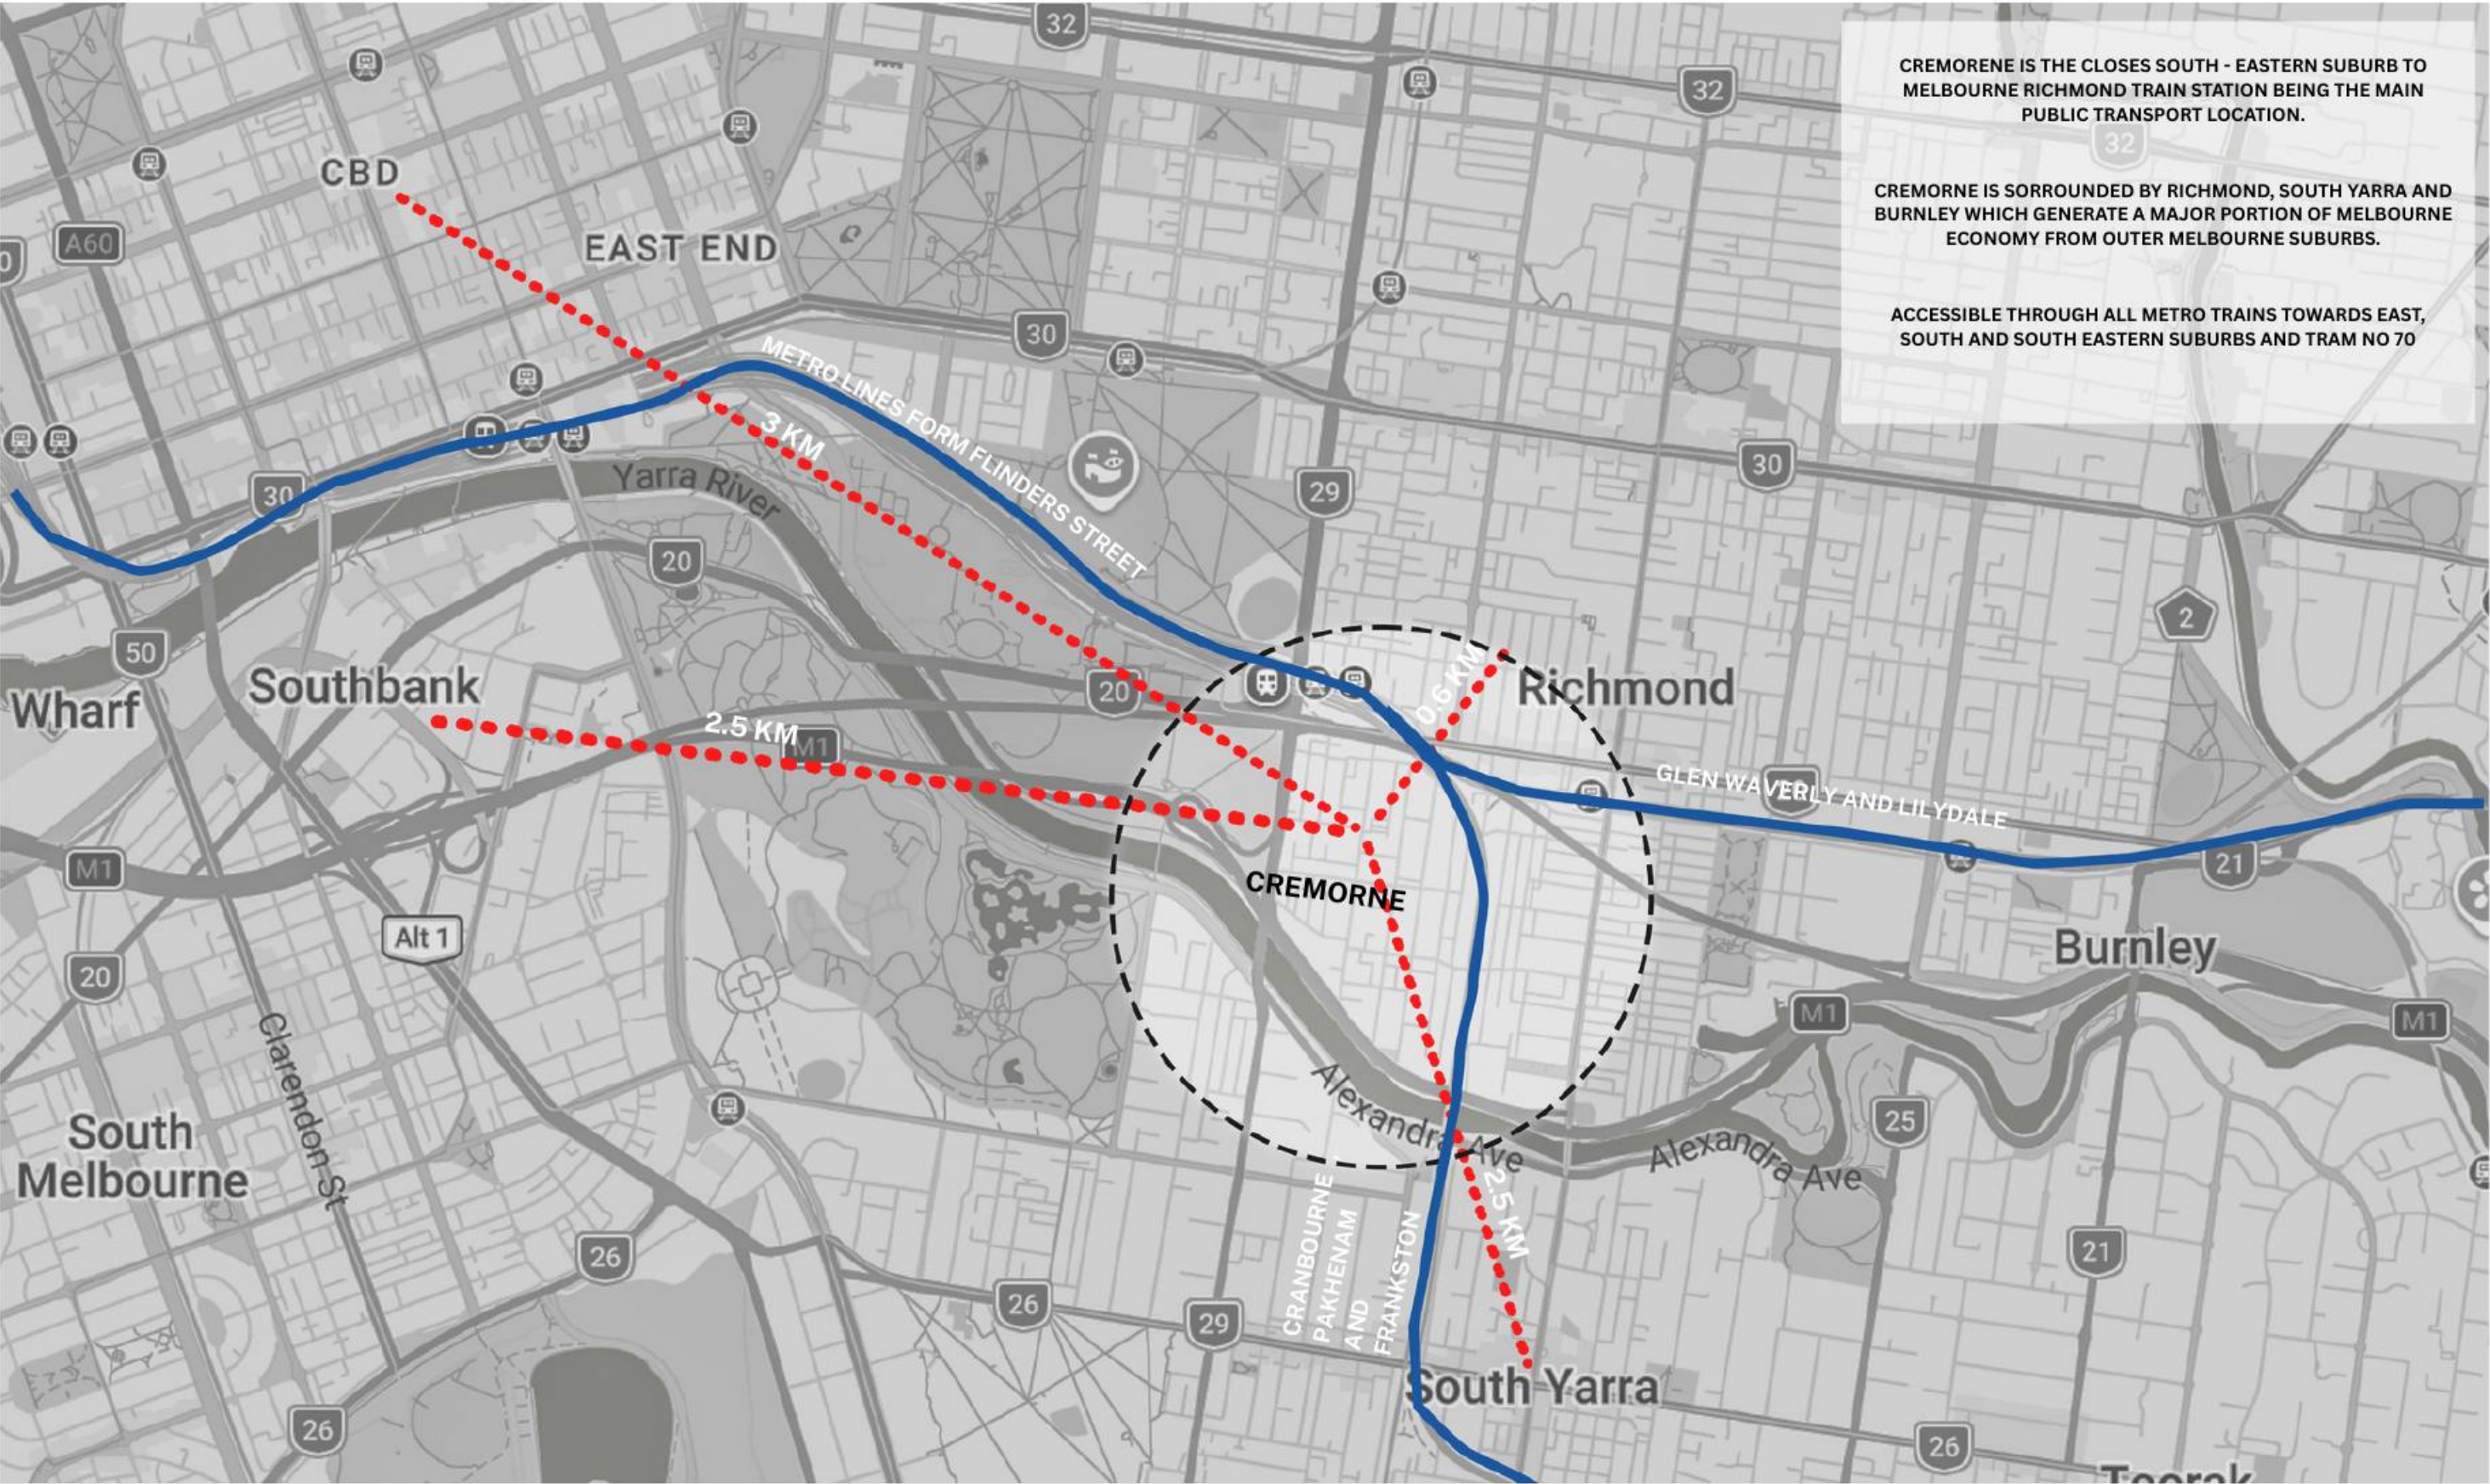

The chair is similar to what I got from object based research 02, where the structure is made out of one steel tube.

The chair was made with two textiles. Grey - with a gritty texture and yellow with a knitted texture.

The chair could represent two personalities

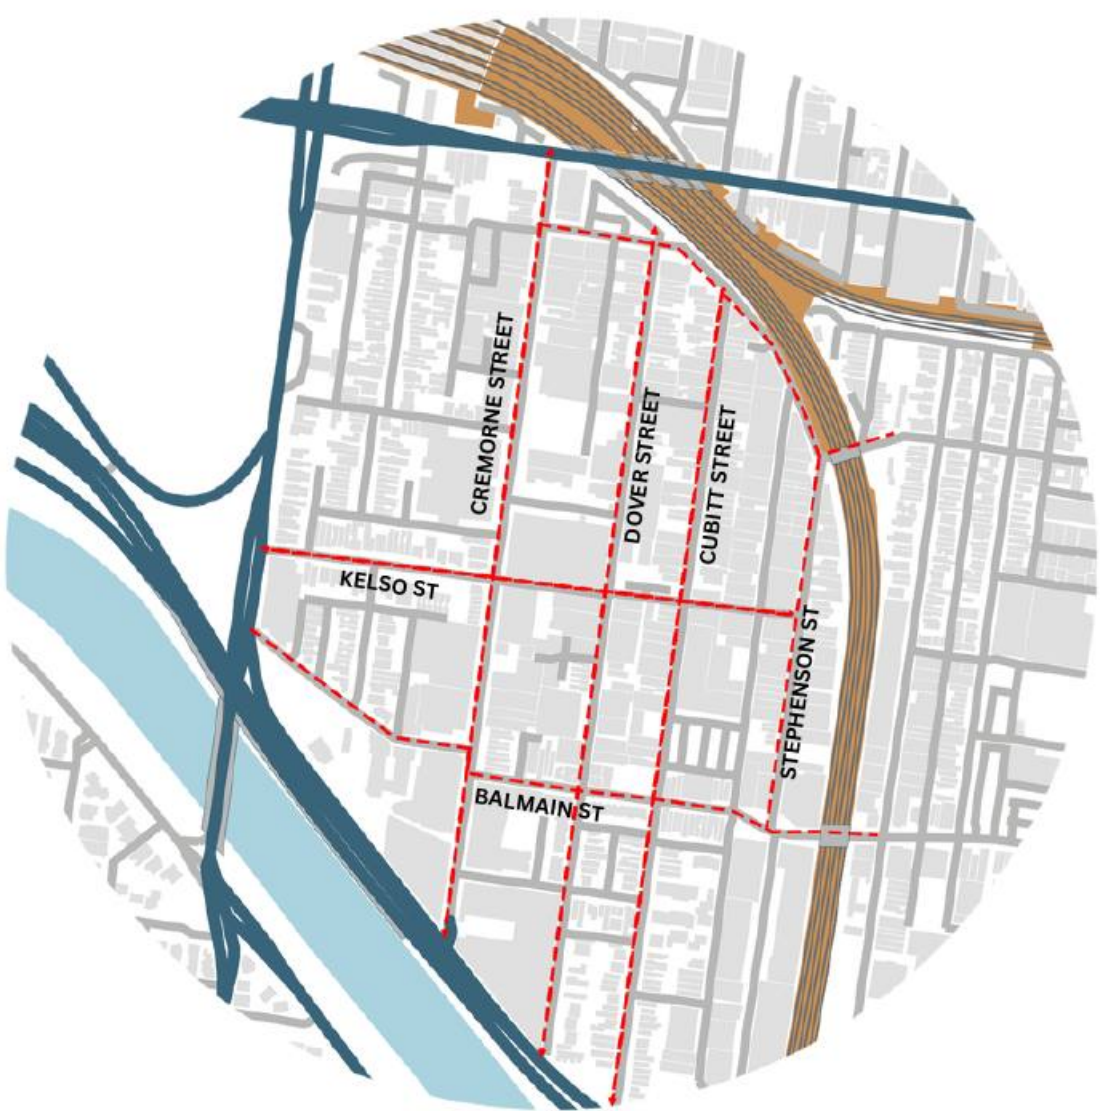

From this research, I understood that fabrics have a wider span of industries than clothing, furniture being one of them. I was keen to use this idea in my program.

SITE ANALYSIS
REGIONAL ANALYSIS

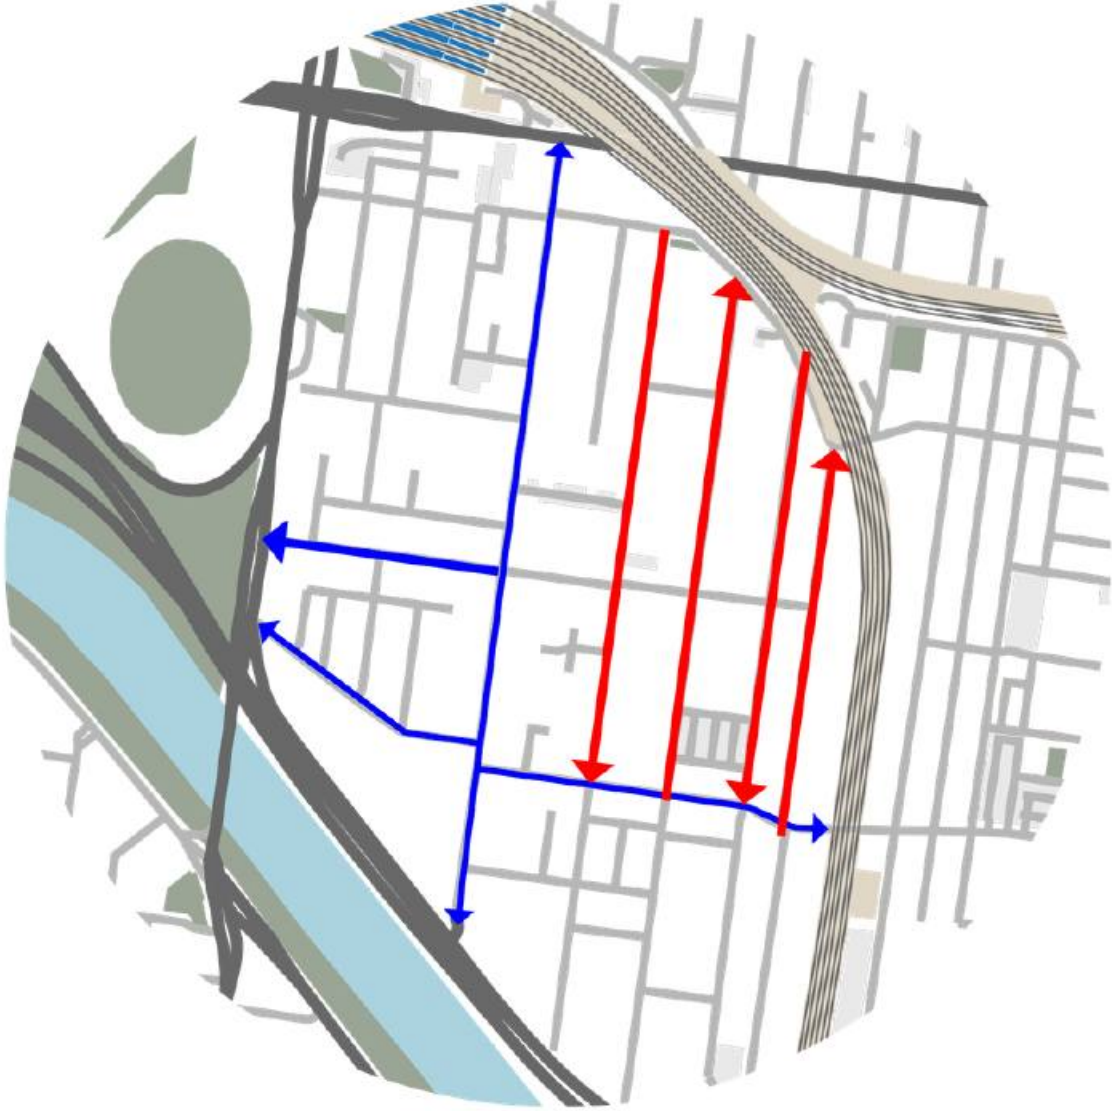

SITE ANALYSIS

ROADS AND ACCESS

- HIGHWAYS FROM MELBOURNE TO BURNLEY
- STREETS CONNECTING RICHMOND AND SOUTH YARRA THROUGH CREMORNE
- RICHMOND TRAIN STATION AND SOUTH AND EAST TRAIN LINES

- MAJOR TWO WAY STREETS
- ONE - WAY LOOPED STREETS

CREMORNE HAS A 4 X 3 GRID SEPERATED BY STREET THAT CONNECTS RICHMOND TO SOUTH YARRA, AND MELBOURNE TO BURNLEY - ALL STREETS PASSING THROUGH MAJOR BUSINESSES AND MIXED USE BUILDINGS IN CREMORNE. SOME STREETS HAVE POTENTIAL TO BE OPENED UP FOR BETTER CIRCULATION AS DISTRIBUTION STREETS. MOST STREETS ARE NARROW (8 - 8.5 M) AND ONE WAY - LOOPED CIRCULATION SYSTEM CAN BE SEEN WITH LITTLE TO NO PEDESTRIAN FOCUS.

SITE ANALYSIS

LAND USE

BUILT AND UNBUILT AREA

- COMMERCIAL BUILDINGS
- RESIDENTIAL BUILDINGS
- MIXED USED BUILDINGS
- EDUCATIONAL BUILDINGS
- CO WORKING SPACES
- ABANDONED / LOW POTENTIAL BUILDINGS

CREMORNE HAS A HIGH DENSITY OF BUILT UP AREA WITH LITTLE TO NO PRODUCTIVE GREEN SPACE

SITE ANALYSIS

NEIBGHOORHOOD CHARACTER

CREMONE HAS A VIBRANT ART, GRAFFITI CULTURE. CREMONES' BUILDINGS ARE MOSTLY MADE UP OF BRICKS AND STEEL. STREETS ARE USUALLY ON THE NARROW SIDE DUE TO INDUSTRIALIZATION

- BUILT SPACE
- HERITAGE LISTED BUILDINGS

CREMORNE HAS RESTORED SOME OF ITS HERITAGE BUILDINGS, BUT SOME - INCLUDING SLADE KNITWARE SIGN HAS BEEN REMOVED

SWOT ANALYSIS

ACCORDING TO CREMORNE IMPLEMENT PLAN -2020

STRENGTHS

- Heritage fabric — repurposed factories & workers' cottages create irreplaceable character
- Walkable to 3 train stations and close to Melbourne CBD
- Economic critical mass: \$4B pa economy, tech unicorns, 700+ businesses

S

W

WEAKNESSES

- Critical shortage of public open space and greening
- Narrow street network designed for industrial traffic, not a 10,000-worker precinct
- Rising affordability pressures displacing the startups that built Cremorne's identity
- Poor pedestrian/cycle access and modal congestion at key intersections

OPPORTUNITIES

- \$12M Digital Hub to anchor skills, industry collaboration and Foreign direct investment
- VicTrack rail land: affordable workspaces, open space, creative activations
- Kengan university and commons co working places brings in opportunities to human gathering
- Many design workshops around the site brings in opportunities for a design precinct in cremorne.

O

T

THREATS

- Residential community facing displacement from intensifying commercial pressure
- Ineffiecent road infrastructure
- Urban heat risk: hard surfaces, minimal canopy, scarce land for greening

SITE SELECTION

SITE WAS SELECTED NEXT TO KANGAN INSTITUTE TO FOR THE EASE OF CREATING AN EXTENSION FROM KANGAN INSTITUTE TO THE SITE AS PER THE PROGRAM

BEING SURROUNDED BY CO WORKING SPACES, THE SITE HAS THE POTENTIAL TO HAVE LARGE NUMBER OF PUBLIC INTERACTION

THE SITE BEING ADJECENT TO CREMORNE STREET GIVES EASY ACCESS TO AND OUT OF THE SITE

- MAJOR CO WORKING SPACES
- SITE
- KENGEN INSTITUTE

DESIGN STRATEGIES

PROPOSED PRODUCTIVE GREEN SPACES

-  PROPOSED SITE
-  PRODUCTIVE PUBLIC GREEN SPACES

PUBLIC GREEN SPACES HAVE BEEN STRATEGICALLY PLACES ON CLOSE TO IMPORTANT NODES.

THIS ENSURES EACH CORNER OF CREMORNE HAS A GREEN SPACE, WHERE THE PUBLIC CAN GATHER AND EHNANCE LIVEABILITY.

THIS INTERVENTION ALSO ENSURES CHILDREN TO BE PRODUCTIVE, PLAY IN A GREEN SPACE RATHER THAN BEING SURROUNDED BY BUILDINGS AND ROADS.

DESIGN STRATEGIES

PROPOSED PRODUCTIVE INFRASTRUCTURE

- RESTAURANTS, RETAIL SHOPS, PUBS AND CLUBS
- PRODUCTIVE PUBLIC GREEN SPACES
- PROPOSED SITE
- SUPERMARKET
- PROPOSED RESIDENTIAL BUILDING
- PROPOSED FACTORY FOR TEXTILES

THE PROPOSED STRATEGY INVOLVES IN CREATING A VIBRANT PEDESTRIAN AND PUBLIC PRECINT ALONG CREMORNE STREET WITH THE INCLUSION OF RESTAURANTS, PUBS , RETAIL SHOP. THIS IS TRATEGICALLY PLACED CLOSE TO EXISTING CO WORKING SPACES AND OFFICE SPACES ALONG CREMORNE STREET.

THE PROPOSAL INCLUDES THE USE OF NYLEX SILO PRECINCT AS A RESIDENTIAL AREA TO ACCOMODATE FOR THE ANTICIPATED RISE IN JOBS AT CREMORNE. THE NYLEX SILOS SHOULD BE ADAPTIVELY RE-USED FOR THE RESIDENTIAL COMPLEX.

THE FACTORY BUILDING IS PROPOSED TO BE ALONG THE SOUTH BOUND TOLL WAY AS IT COULD HAVE EASY ACCESS FOR LOGISTIC PURPOSES WITHOUT USING CREMORNE'S EXISTING ROADS AS THEY ARE MORE PEDESTRIAN FRIENDLY STREETS.

DESIGN STRATEGIES

PRODUCTIVE STREET LAYOUT DAY TIME

-  **ONE WAY STREETS - SHARED LANE FOR VEHICLES AND CYCLES**
-  **TWO WAY STREETS - SHARED LANE FOR VEHICLES AND CYCLES**
-  **TWO WAY WOONERF STREETS**
-  **ONE WAY WOONERF STREETS**
-  **TWO WAY STREETS - SHARED LANE FOR VEHICLES AND CYCLES - WIDER FOOTPATHS**
-  **PEDESTRIAN STREETS**
-  **DISTRIBUTION ROADS**

CREMORNE'S STREETS HAVE BEEN RE IMAGINED TO ENHANCE PUBLIC LIFE AND PEDESTRIAN MOVEMENTS ACROSS CREMORNE.

BRINGING INSPIRATION FROM NETHERLAND'S WOONERF STREETS, THESE SHARED STREETS COULD MINIMIZE THE USE OF VEHICLES AROSS CREMORNE AND ENCOURAGE USE OF BICYCLES FOR SUSTAINABLE TRANSPORTATION ACROSS CREMORNE. LIME BIKES ARE TO BE LOCATED IN ALL IMPORTANT NODES .

THE SOUTH BOUND TOLL WAY TO ACT AS A DISTRIBUTION STREET TO ENHANCE ACCESS TO AND OUT OF CREMORNE. THIS WILL REDUCE VEHICULAR SPEEDS ALONG THE SOUTH BOUND TOLL WAY FROM CREMORNE UNDERGROUND PASS TO CREMORNE RAILWAY BRIDGE.

DESIGN STRATEGIES

PRODUCTIVE STREET LAYOUT NIGHT TIME - FRI - SUN

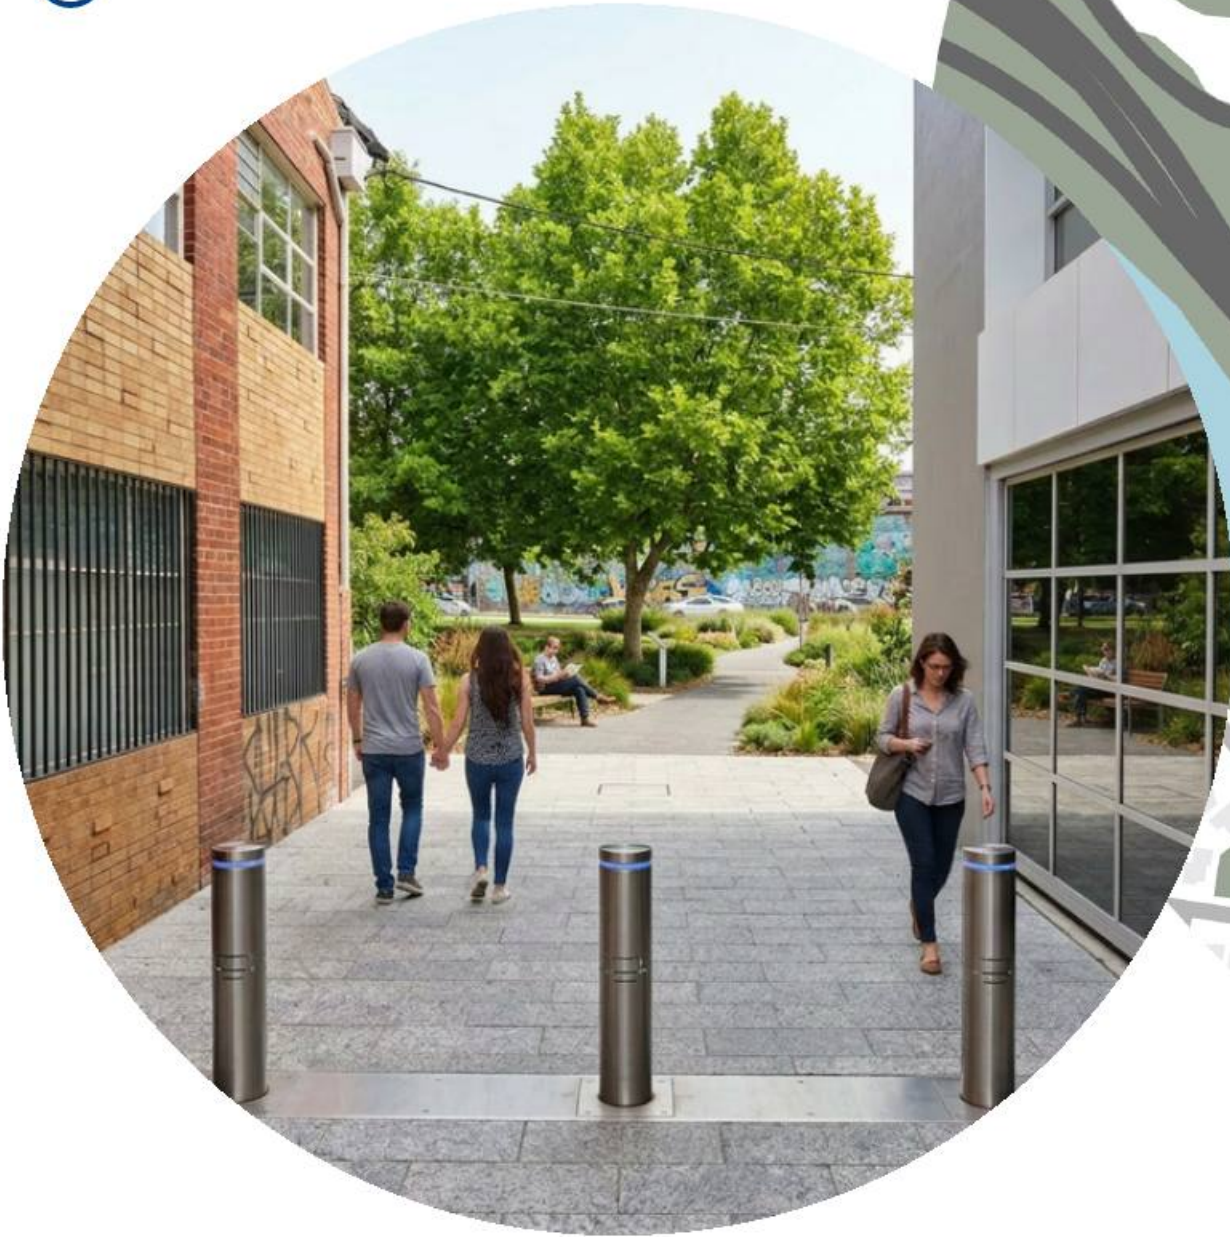

DUE TO THE EXPECTED NIGHT LIFE IN CREMORNE, CREMORNE ST TO BE CONVERTED TO A ONE WAY STREET TILL KENGEN INSTITUTE. THIS WILL ENSURE TAXIS AND OTHER VEHICULAR TRAFFIC WILL NOT INTERFERE WITH THE INCREASED PEDESTRIAN MOVEMENT. A CIRCULATION LOOP TO BE CREATED WITH DOVE STREET TO BE CONVERTED INTO A ONE WAY STREET.

DESIGN STRATEGIES

STREET NODES

- PEDESTRIAN NODES
- ⦿ PEDESTRIAN AND VEHICULAR NODES
- VEHICULAR NODES

DESIGN STRATEGIES

PROPOSED LAND
USE MAP

- RESTAURANTS, RETAIL SHOPS,
PUBS AND CLUBS
- PRODUCTIVE PUBLIC GREEN
SPACES
- PROPOSED SITE
- SUPERMARKET
- MIXED USE RESIDENTIAL
BUILDINGS
- PROPOSED FACTORY FOR
TEXTILES
- COMMERCIAL BUILDINGS
- RESIDENCIAL AREA

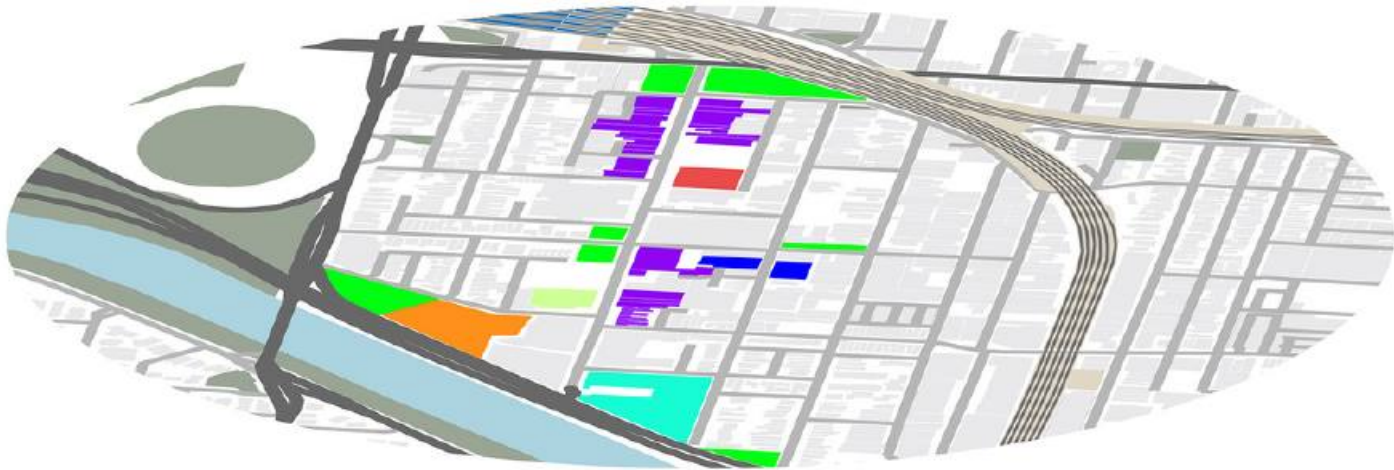

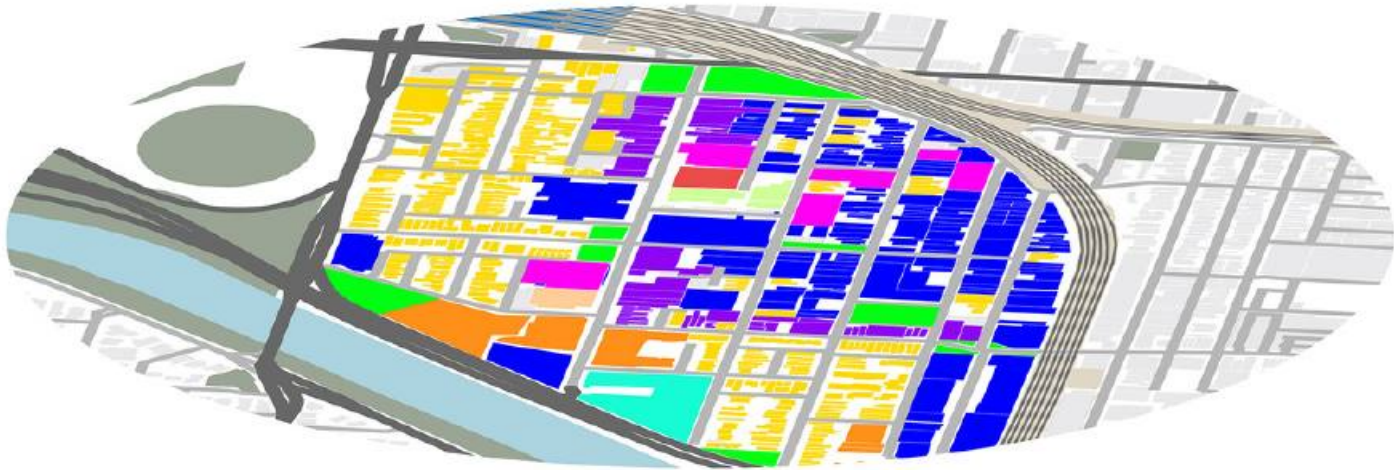

DESIGN STRATEGIES

LAYERD ISOMETRIC ANALYSIS

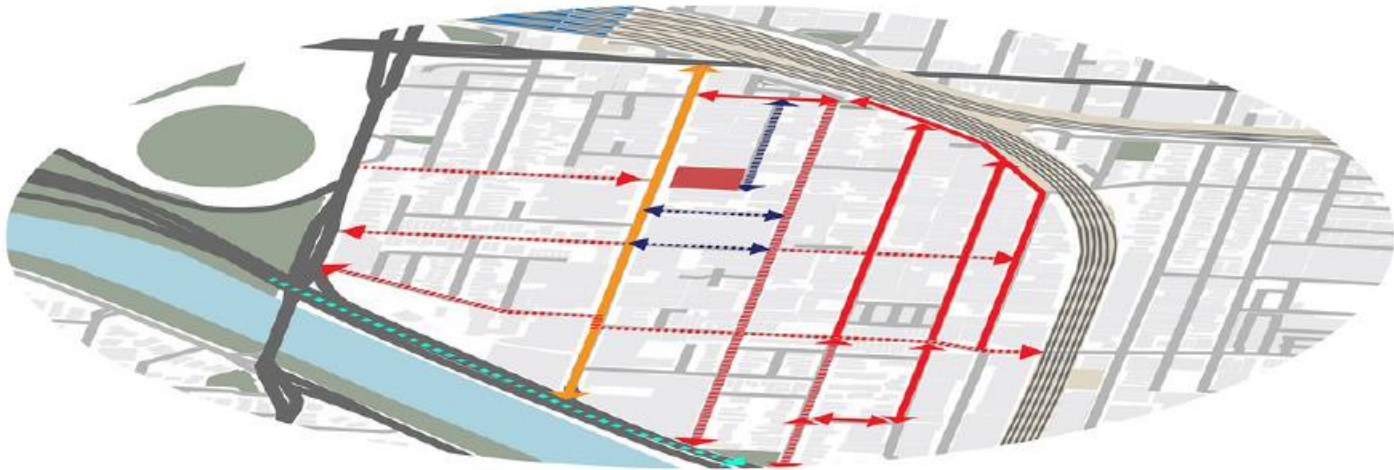

PROPOSED INFRASTRUCTURES TO ENHANCE CREMORNES PUBLIC LIFE WITHOUT INTERRUPTING PRIVATE LIFE. RECREATIONAL FACILITIES ARE FOCUSED ALONG CREMORNE AND BALMAIN STREET AS THESE STREETS ARE RELATIVELY BIGGER STREETS WITH BETTER TRAFFIC FLOW

AS A WHOLE CREMORNE TO HAVE DISTINCT RESIDENTIAL, COMMERCIAL AND RECREATIONAL PRECINCTS TO ACT IN SYMBIOSIS.

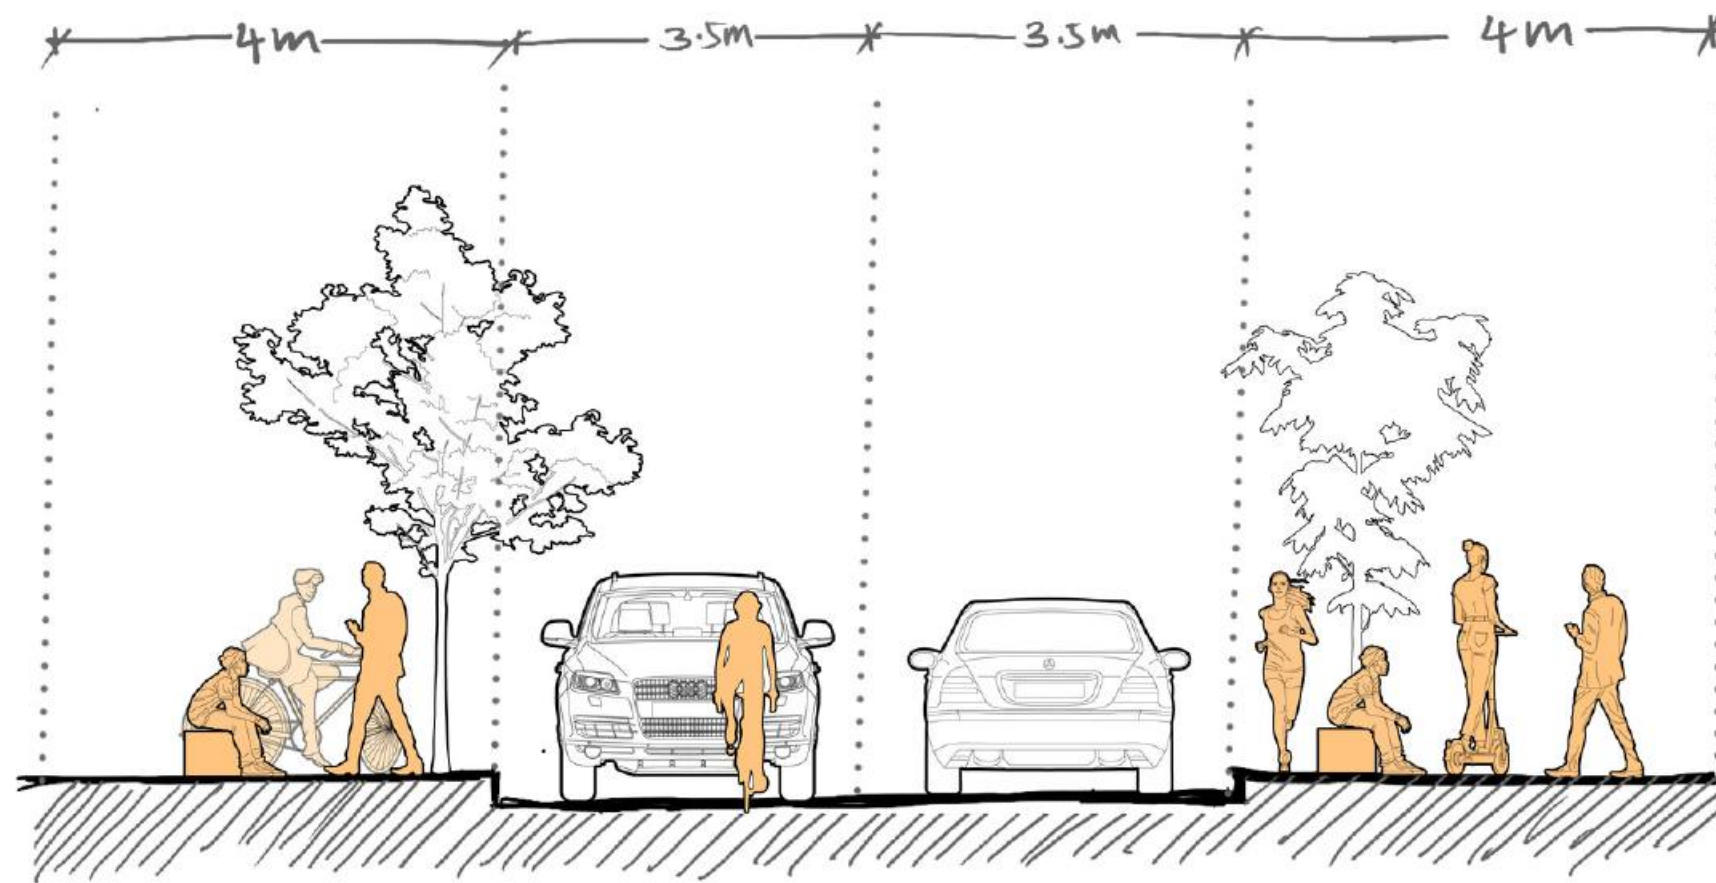

DESIGNATED PUBLIC GREENSPACES ARE DESIGNED TO BE EASILY ACCESSED TO ONE ANOTHER VIA FOOT THROUGH WOONREF STREETS.

PROPOSED STREET DEVELOPMENT IN CREMORNE WAS STRATEGICALLY DONE TO ENHANCE PUBLIC LIFE ALONG COMMERCIAL, RECREATIONAL AND RESIDENTIAL PRECINCTS OF CREMORNE.

DESIGN STRATEGIES

STREETSCAPES

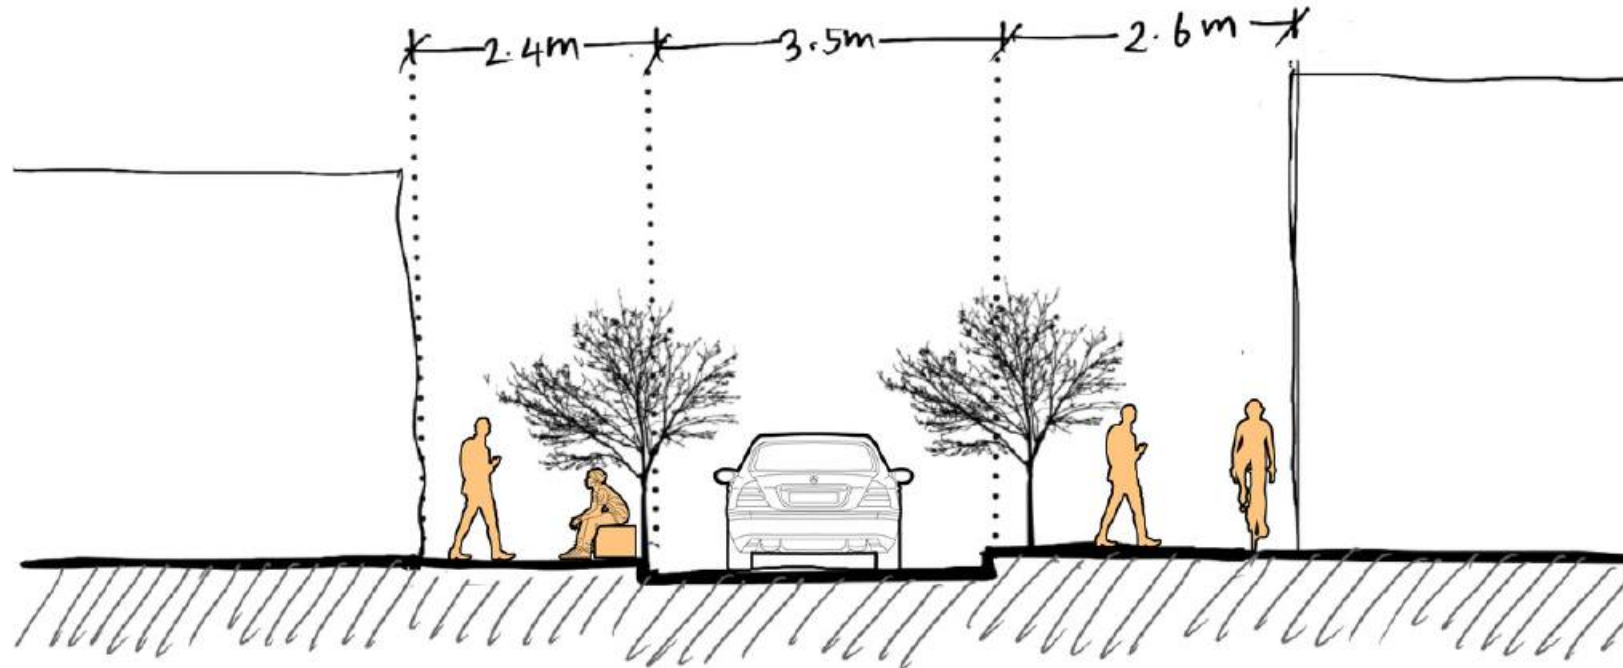

STREET SECTION OF CREMORNE ST

THE ROAD IS BEING SHARED BY CYCLISTS AND VEHICLES. SPEED LIMIT IS TO BE 30 KMH. THE TWO WIDER PEDESTRIAN AREAS TO HAVE PUBLIC SEATING, VEGETATION.

ALL STREET LANEWAY TO HAVE A DEPTH OF 3.5 M MINIMUM TO ACCOMODATE EMERGENCY VEHICLES

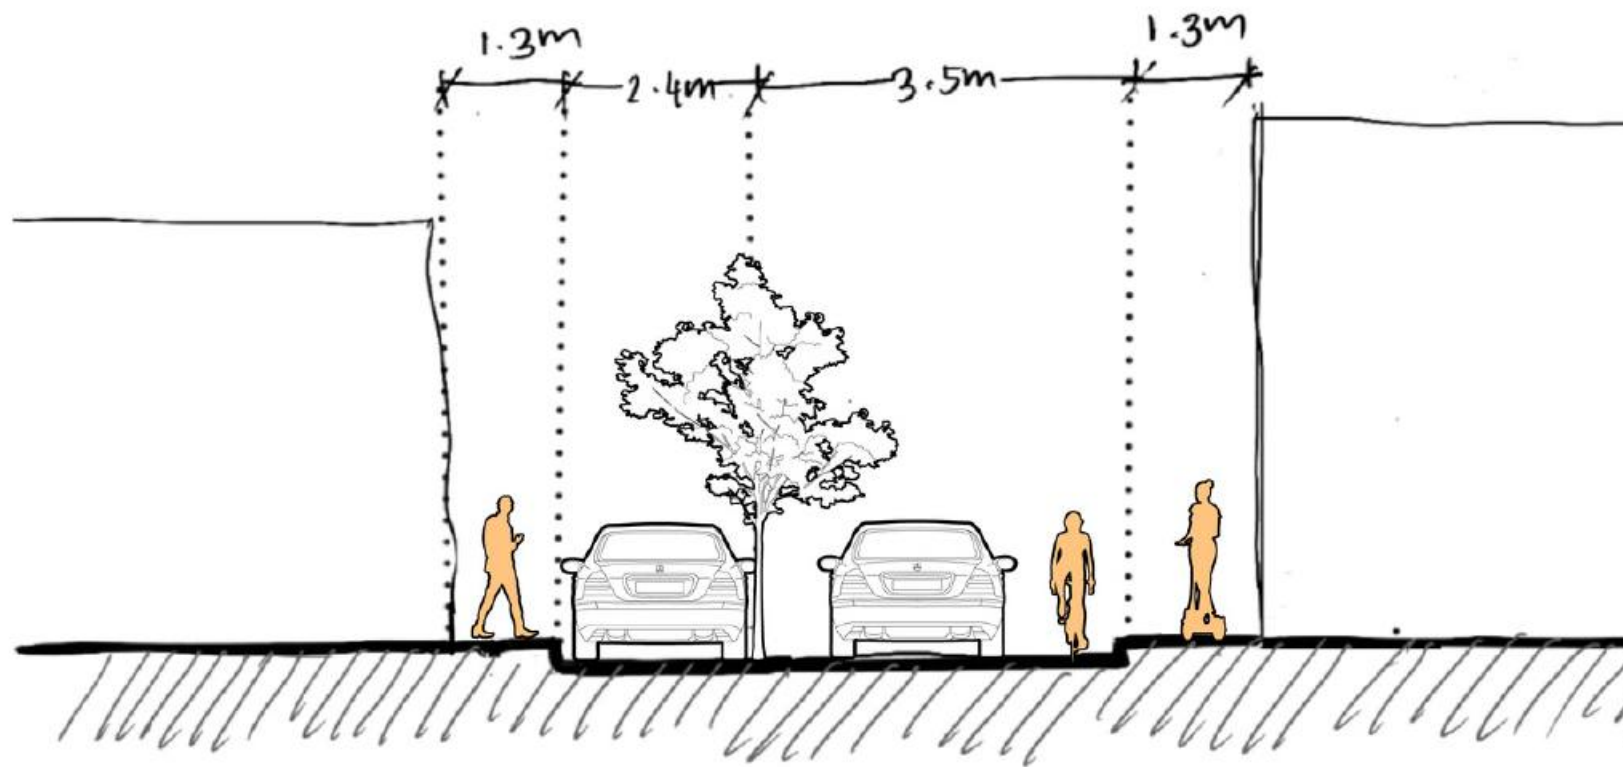

DESIGN STRATEGIES

STREETSCAPES

STREET SECTION OF CULBITT ST WITHOUT PARKING

THE ROAD IS BEING SHARED BY CYCLISTS AND VEHICLES. SPEED LIMIT IS TO BE 30 KMH. THE TWO WIDER PEDESTRIAN AREAS TO HAVE PUBLIC SEATING, VEGETATION.

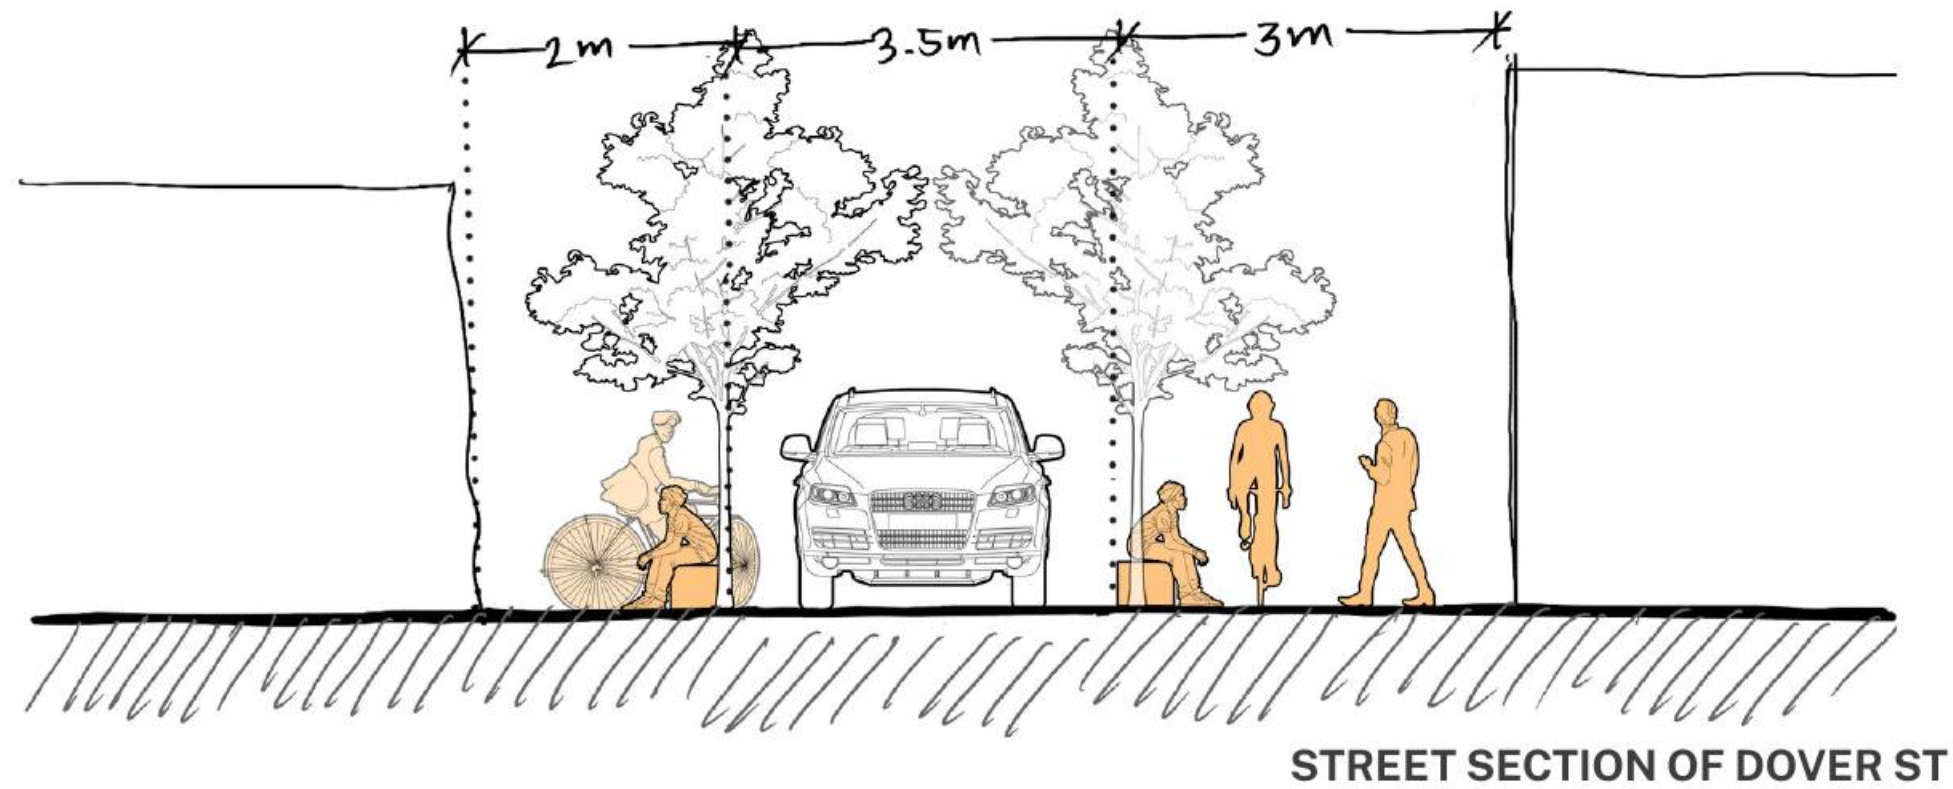

STREET SECTION OF CULBITT ST WITH PARKING

THE ROAD IS BEING SHARED BY CYCLISTS AND VEHICLES. SPEED LIMIT IS TO BE 30 KMH. PARKING SPACES STRATEGICALLY LOCATED ON SPACES ADJACENT TO BUILDINGS WITHOUT PARKING SPACES. PARKING SPACES TO BE SHARED BY PEDESTRIANS

ALL STREET LANEWAY TO HAVE A DEPTH OF 3.5 M MINIMUM TO ACCOMODATE EMERGENCY VEHICLES

DESIGN STRATEGIES

STREETSCAPES

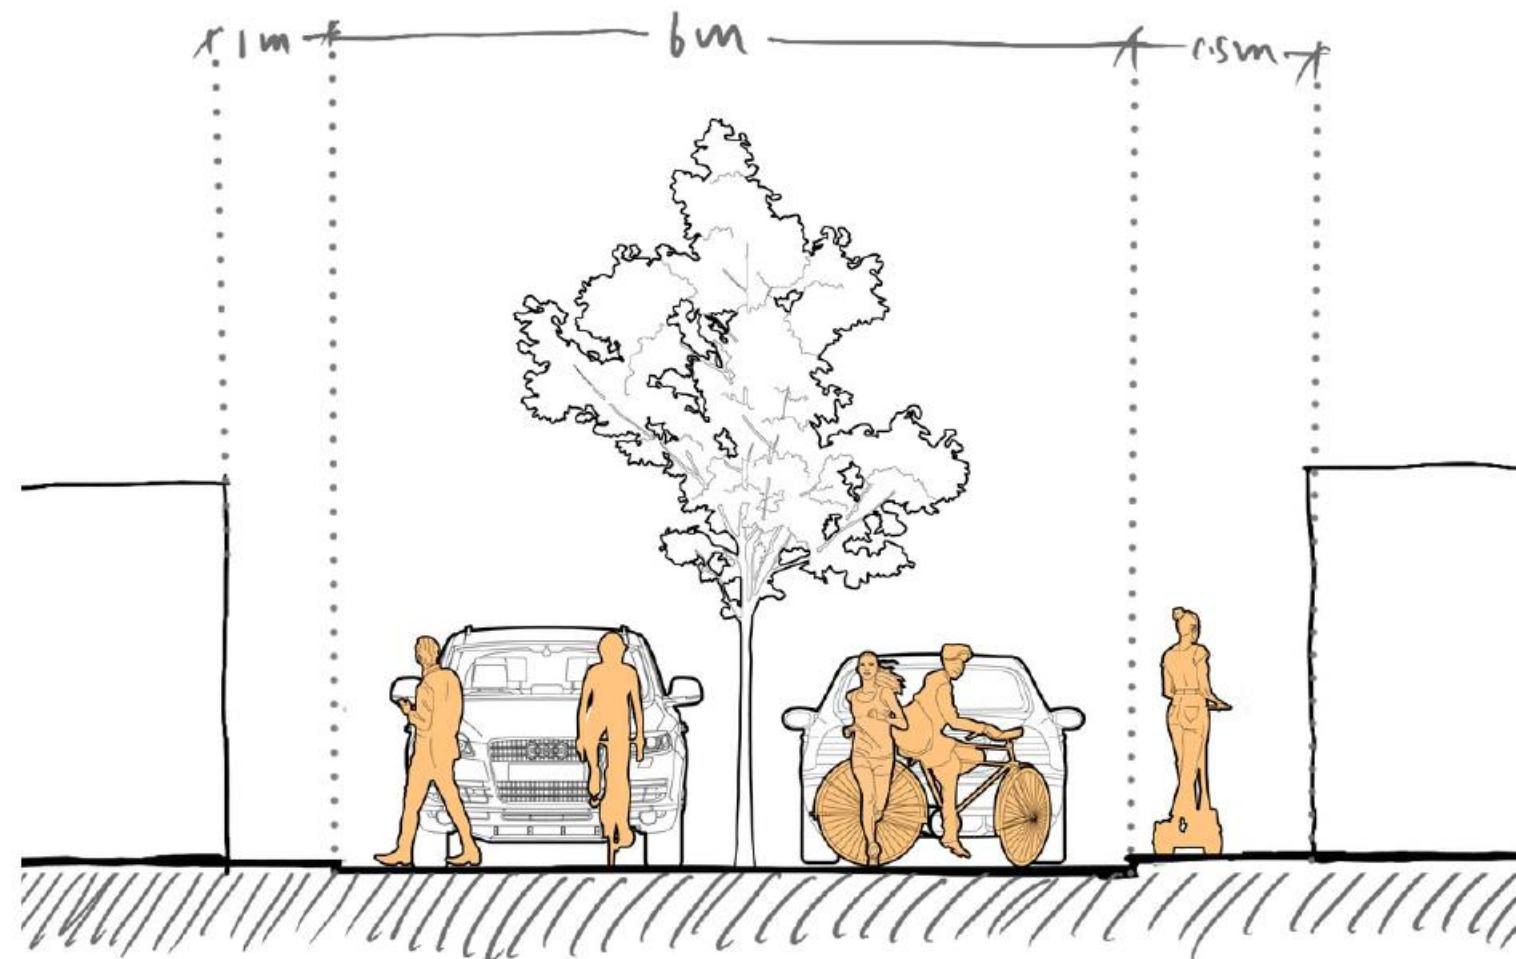

THE ROAD IS BEING SHARED BY CYCLISTS, VEHICLES AND PEDESTRIANS - WOONERF STREET. SPEED LIMIT IS TO BE 15 KM/H. NO PARKING TO BE ALLOCATED ON THIS STREET TILL THE RESIDENTIAL ZONE

ALL STREET LANEWAY TO HAVE A DEPTH OF 3.5 M MINIMUM TO ACCOMMODATE EMERGENCY VEHICLES

DESIGN STRATEGIES

STREETSCAPES

STREET SECTION OF BALMAIN ST

THE ROAD IS BEING SHARED BY CYCLISTS, VEHICLES AND PEDESTRIANS - WOONERF STREET. SPEED LIMIT IS TO BE 15 KMH. NO PARKING TO BE ALLOCATED ON THIS STREET. STREET FURNITURE TO BE ADDED ON PLACES WHERE THE STREET WIDTH IS MORE THAN 10M

ALL STREET LANEWAY TO HAVE A DEPTH OF 3.5 M MINIMUM TO ACCOMODATE EMERGENCY VEHICLES

DESIGN STRATEGIES

STREETSCAPES

MATERIALS

ALL STREETS TO HAVE PAVING MATERIAL ON LANEWAYS FOR DRIVERS TO DRIVE SLOWLY. THE DISTINCTION BETWEEN LANEWAYS AND PEDESTRIAN WAYS TO BE THROUGH DIFFERENT PAVING MATERIALS.

PEDESTRIAN STREETS AND SHARED STREETS TO BE SEPERATED VIA AUTOMATIC BOLLARDS. THESE CAN BE LOWERED TO ACCOMODATE SERVICE AND EMERGENCY VEHICLES OR FOR ALTERNATE TRAFFIC STRATEGIES.

DESIGN STRATEGIES

STREETSCAPES

ALL STREETS TO HAVE SOLAR POWERED STREET LIGHTS AND AMBIENT FLOOR LIGHTS FOR WAYFINDING. STREETS TO HAVE PUBLIC SEATING FACILITIES.

ALL STREETS TO HAVE WASTE COLLECTION BINS INCLUDING, SPECIALLY TEXTILE WASTE BINS

DESIGN PHASES

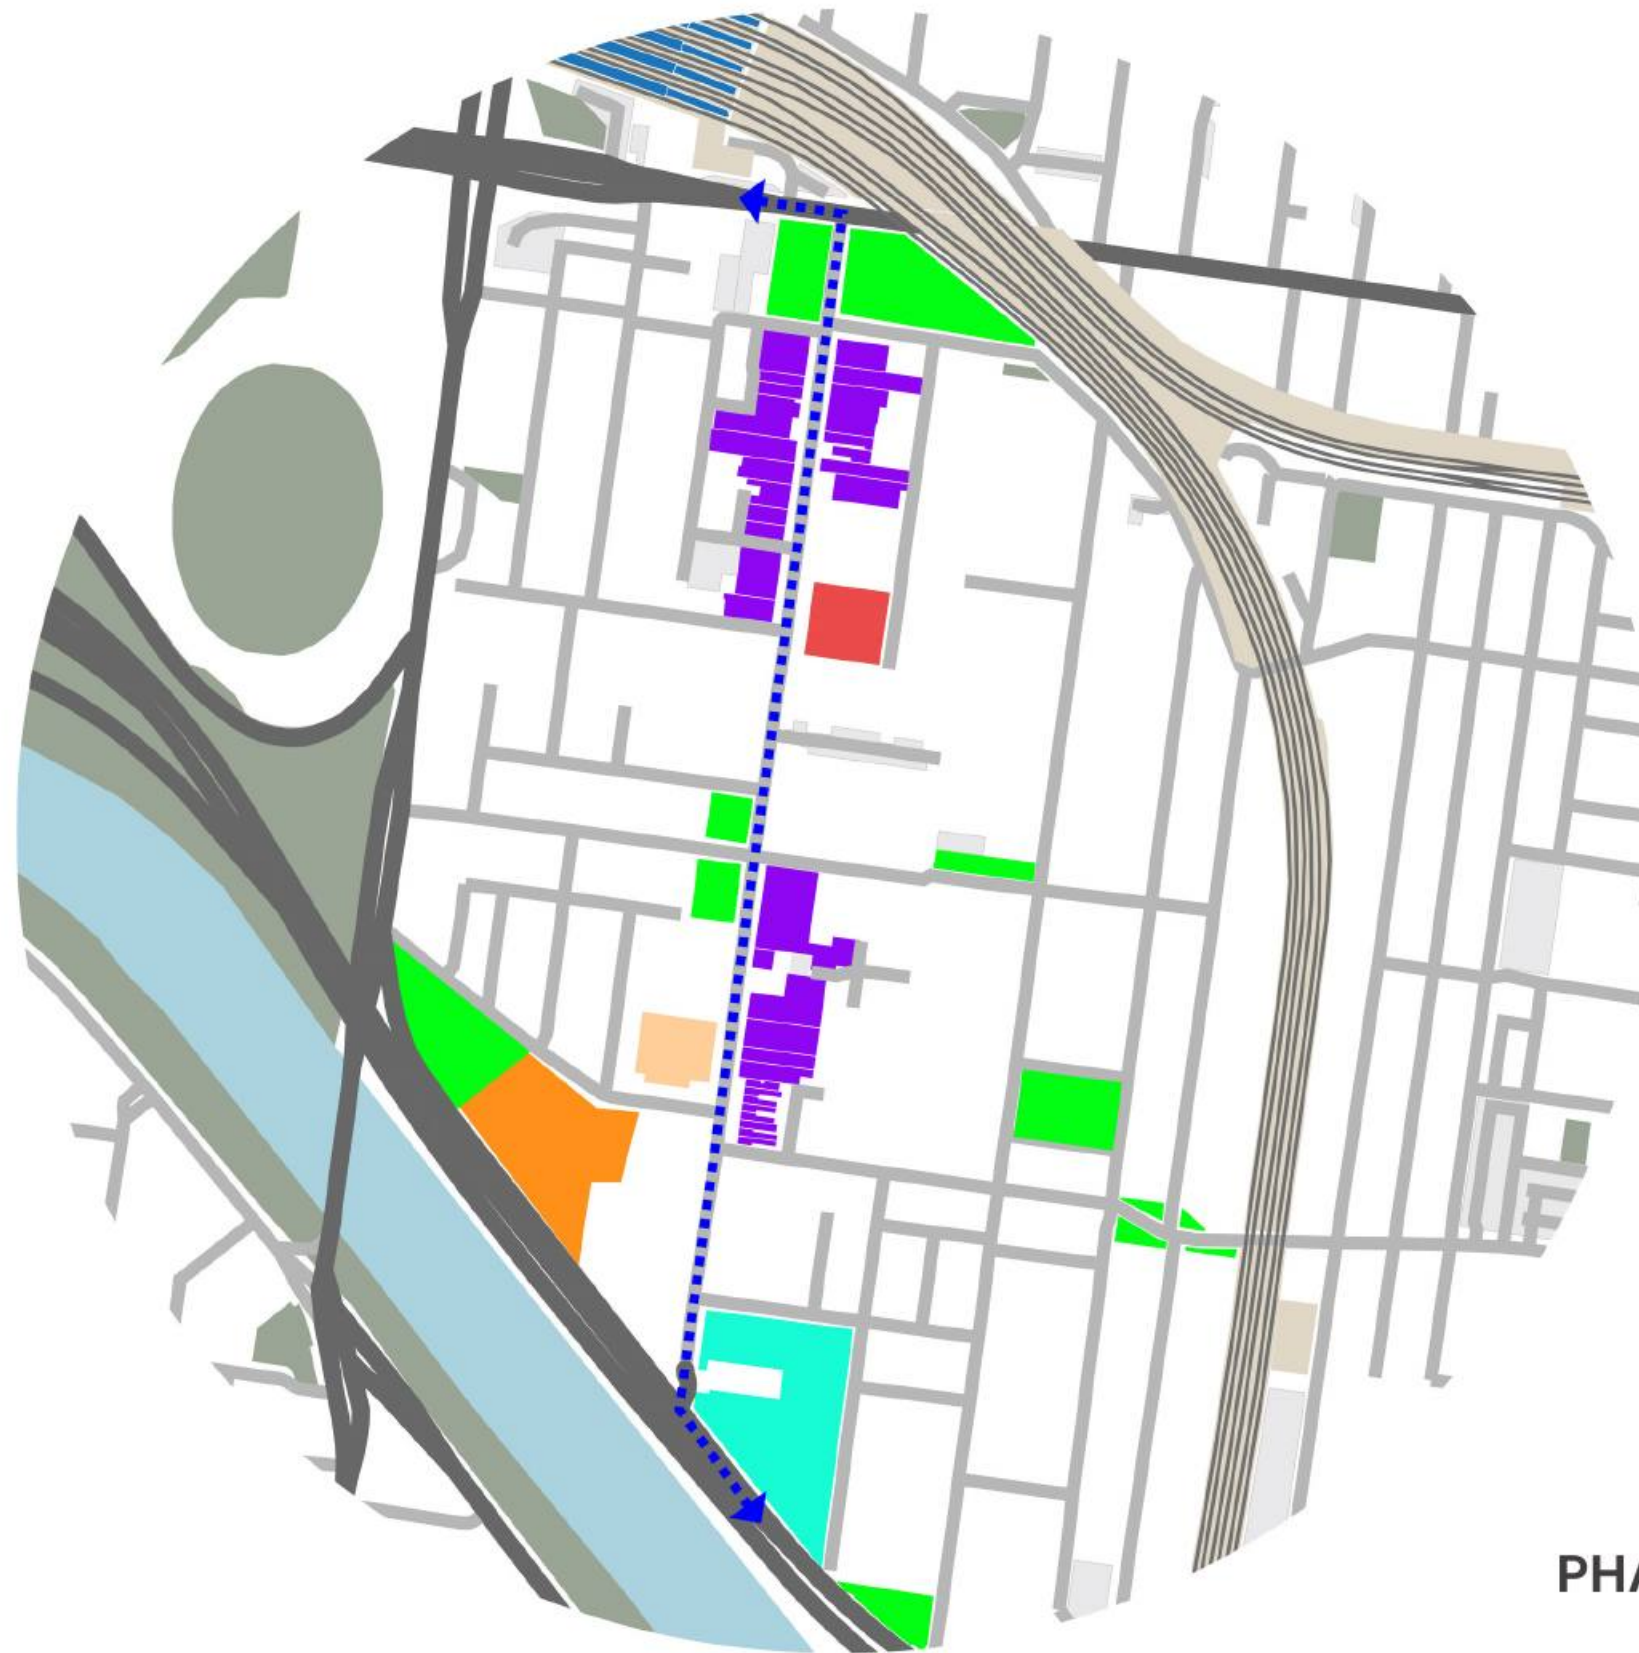

PHASE 01

PHASE 01 TO HAVE TO INCLUDE THE DEVELOPMENT OF REWEAVE CREMORNE, DEVELOPMENT OF THE PUBLIC GREEN SPACES, CREMORNE STREET AND THE TEXTILE PRODUCTION AND RESEARCH FACTORY

THIS ENABLES THE PROGRAM OF REWEAVE CREMORNE TO START AND BRING PEOPLE IN TO CREMORNE

DESIGN PHASES

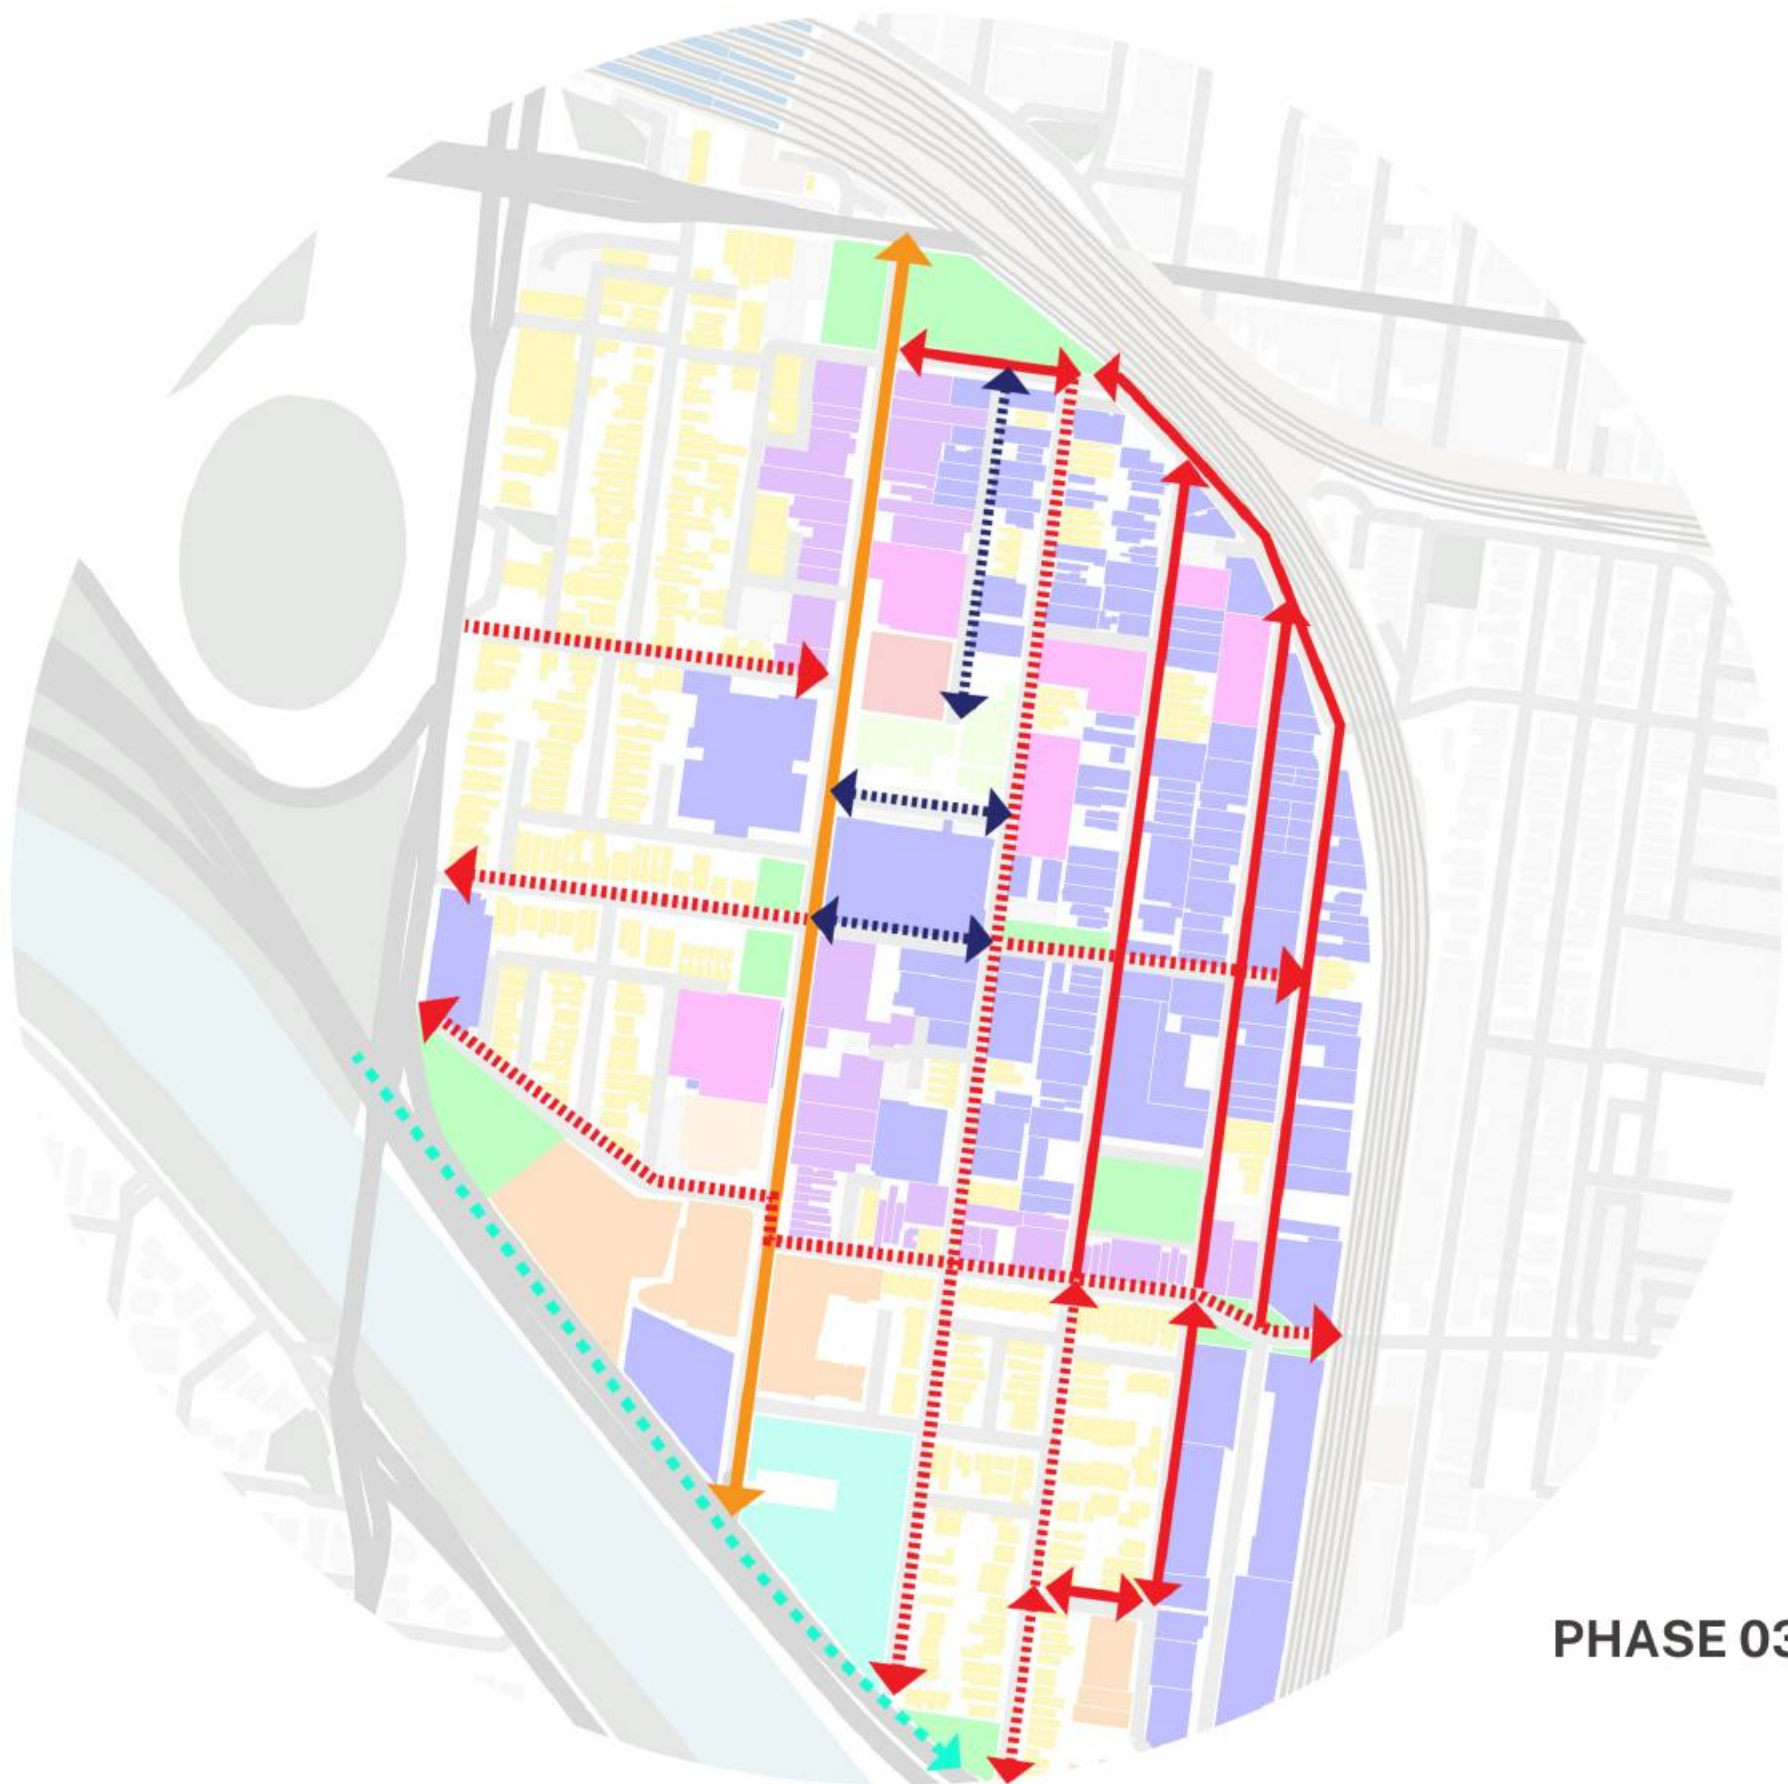

PHASE 02

PHASE 02 TO HAVE TO INCLUDE THE DEVELOPMENTS ALONG CREMORNE STREET TO HAPPEN PRIOR TO STAGE 01. THIS INCLUDES THE GRAFTING OF RECREATIONAL SPACES AND THE CONSTRUCTION OF RESIDENTIAL BUILDINGS

THIS ENABLES THE PROGRAM OF REWEAVE CREMORNE TO UPGRADE AND EXPAND ITS REACH AWAY FROM THE SITE AND SUSTAIN THE PROJECT

DESIGN PHASES

PHASE 03

PHASE 02 TO HAVE ALL THE STREET SCAPE DEVELOPMENTS TO HAPPEN. THIS WILL ENSURE REST OF THE PROPOSED DEVELOPMENTS TO HAPPEN AWAY FROM CREMORNE STREET

DESIGN BRIEF

PROJECT OVERVIEW

REWEAVE - CREMORNE

A MIXED-USE SUSTAINABLE FASHION PRECINCT THAT TRANSFORMS TEXTILE WASTE INTO CREATIVE AND ECONOMIC OPPORTUNITY — ACTING AS AN INCUBATION HUB FOR DESIGNERS, RESEARCHERS, ARTISTS AND THE PUBLIC OF CREMORNE.

✂ DESIGNER PROGRAM

- Incubation space for designers & brands to commercialise sustainable textiles
- Design studios rented to Cremorne fashion community & RMIT / Kengen Institute students
- Retail shops selling upcycled & slow-fashion products
- Fashion pageants to promote precinct & products globally
- Meetings with clients & investors to develop sustainable textile business in association with Cremorne Digital Hub.

🕒 PUBLIC PROGRAM

- Awareness programs on fast fashion & textile waste via gallery & exhibition spaces
- Exhibition showcasing how waste is upcycled using reuse & textile-pigmented paints
- Gallery spaces for local artists — rentable to Cremorne design community
- Public interactive green spaces across Cremorne for recreation & interaction
- Retail shops for upcycled slow-fashion products from local & international brands in association with Cremorne Digital Hub.

🔬 RESEARCH PROGRAM

- Labs for ARC Future Fibres scientists to conduct product development research
- Labs for Perpetual Pigments scientists for dye & pigment research
- Small -scale production facilities to produce textile samples on site
- Researchers & designers collaborate to commercialise sustainable textiles in association with Cremorne Digital Hub.
- Textile waste collected via Upparel bins across Cremorne as key stakeholder

DESIGN BRIEF

SPATIAL SCHEDULE

PUBLIC CULTURAL SPACES		
SPACE	SQM	PROGRAM NOTES
Exhibition / Awareness Space	150	Upcycling methods, textile-pigmented paints, arts & crafts programs
Gallery Space	120	Local artist work from textile waste; rentable to Cremorne design community
Seminar Rooms (x2)	80	Awareness programs on fast fashion; 40sqm each, lift access
Multi-Functional Hall	200	Fashion pageants, events, sound/light/theatre tech
Backstage / Green Room	30	Adjacent to hall, performer prep
Dressing Room	20	Collection & storage, washrooms, lounge
RECREATIONAL & RETAIL SPACES		
Retail Shops — Upcycled Fashion	100	Sell upcycled products by local designers & slow-fashion brands
Café	80	Street-facing, service access
Restaurant	120	Service access, washrooms, fire exit
Pubs / Clubs	100	Storage, washrooms, fire exit
Public Green Space (on-site)	500+	Interactive, recreational; connects to Cremorne public realm
SHOPPING COMPLEX		
Retail Tenancies (mixed)	50–100 ea.	Local & international slow-fashion brands
Service Access Corridor	30	Back-of-house logistics
Shared Storage	25	Per tenancy cluster
Shared Washrooms	20	Accessible, lift access

DESIGN BRIEF

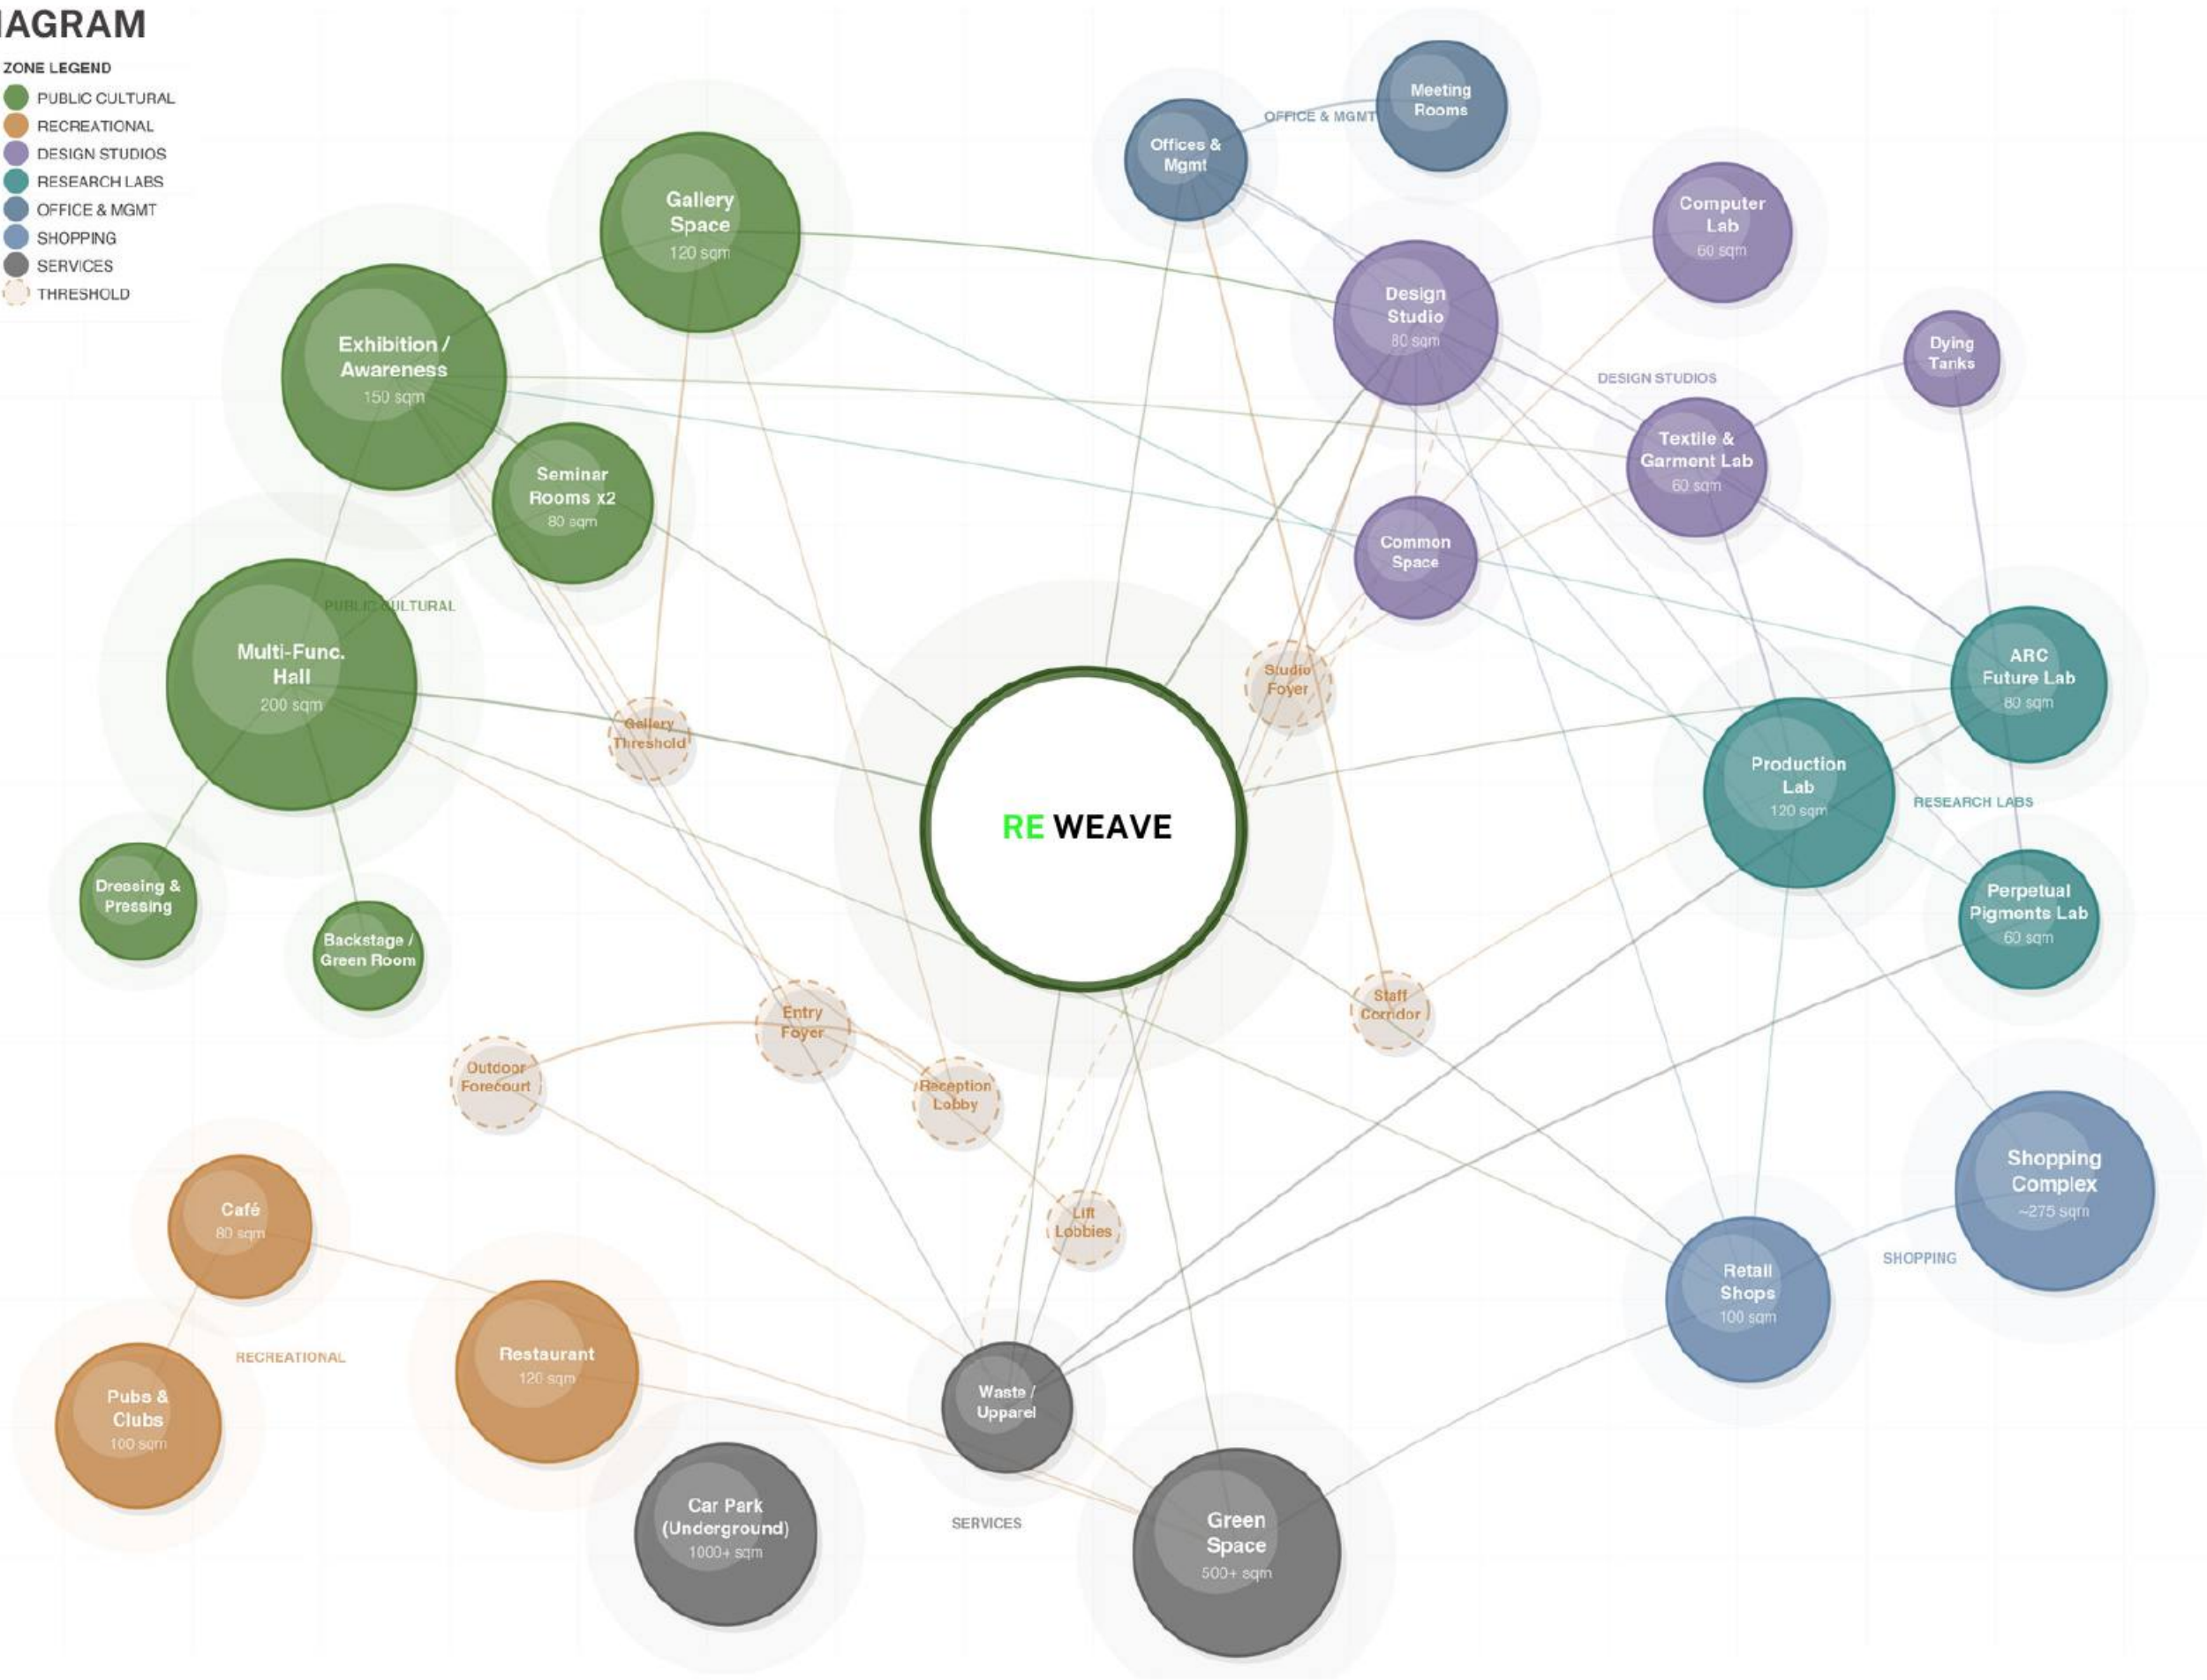

SPATIAL SCHEDULE

DESIGN STUDIOS		
Design Studio (General)	80	Incubation space for designers; natural light, pin-up space
Textile / Garment Lab	60	Sewing, pressing, upcycling; Kengen Institute student extension
Dying Tanks (Wet Area)	20	Textile-pigmented dye processes; drainage required
Common / Collaboration Space	40	Informal, flexible; community meetups
Studio Washrooms	15	Adjacent to studios
RESEARCH LABS (ARC Future Fibres + Perpetual Pigments)		
Product Development Lab (ARC)	80	ARC Future Fibres scientists; fibre research facilities
Product Development Lab (Pigments)	60	Perpetual Pigments scientists; dye & pigment research
Small -Scale Production Lab	120	Sample production on site; textile machinery
Research Common / Collaboration	40	Designers + researchers working together
OFFICE & MANAGEMENT		
Management Offices	40	Glazed; overlooking precinct activity
Printed Meeting Room	25	Client & investor presentations
Staff Meeting Rooms (×3)	45	Bookable; 15sqm each
Staff Washroom	8	Staff only
SERVICES & INFRASTRUCTURE		
Waste Collection Point	20	Upparel textile bin drop-off; screened, vehicle access
Waste Sorting Room	20	Adjacent to collection; pre-processing
Underground Car Park	1000+	Lift access to all levels
